Behavioural Responses to a Changing World Bob B. M. Wong, Ulrika Candolin, 2025-04-23 For many animals, behavioural adjustments represent the first response to human-modified conditions. By improving reproduction and survival, such adjustments can play the lead in maintaining viable populations in the face of rapid environmental change. Behavioural responses, however, can also be maladaptive and reduce individual fitness, particularly if favourable reaction norms have not yet evolved, because animals are encountering conditions that they have never experienced before. Clearly, behaviour matters. But how can we capitalise on our understanding of animal behaviour to improve conservation and management outcomes? Behavioural Responses to a Changing World: Challenges and Applications, a companion volume to the first edition published in 2012, examines wildlife behavioural responses to human-induced environmental change through a translational lens. Despite considerable and growing interest in research on the topic, the predictive value and practical application of what has been learned remains underappreciated and underutilized in the context of developing real-world solutions. To redress this, the current book builds upon the foundations of the original volume but with a more applied perspective that focuses on highlighting how different forms of environmental challenges, from climate change to urbanisation, influence animal behaviour and how we can effectively harness knowledge of animal

behaviour to effect practical solutions to predicting and mitigating the weighty impacts of a radically changed and changing world

Wildlife in a Changing World Jean-Christophe Vié, Craig Hilton-Taylor, S. N. Stuart, 2009 Wildlife in a Changing World presents an analysis of the 2008 IUCN Red List of Threatened Species Beginning with an explanation of the IUCN Red List as a key conservation tool it goes on to discuss the state of the world's species and provides the latest information on the patterns of species facing extinction in some of the most important ecosystems in the world highlighting the reasons behind their declining status Areas of focus in the report include freshwater biodiversity the status of the world's marine species species susceptibility to climate change impacts the Mediterranean biodiversity hot spot and broadening the coverage of biodiversity assessments

The Changing World of Farming in Brexit UK Matt Lobley, Michael Winter, Rebecca Wheeler, 2018-11-22 The 2016 referendum resulted in a vote for the United Kingdom to withdraw from the European Union This has led to frenzied political debate across the whole spectrum of policy and agriculture is no exception For the first time in a generation the future of agriculture is unclear and unfettered by the constraints and incrementalism of the Common Agricultural Policy This book makes an empirical contribution to the Brexit debate bringing a social dimension to agri Brexit and sustainable agriculture discourses Understanding the social in the context of farmers is vital to developing a way forward on food security and agricultural sustainability Farmers are the recipients of the market and policy signals that link to global uncertainties and challenges This book is a commitment to understanding farmers as occupiers and managers of land Chapters in this book explore farmers' own aspirations and knowledge about patterns of land use and production which underpin discussions around the environment and sustainability There is a deficit in understanding what kind of agricultural industry we now have following years of restructuring and repositioning This book is an attempt to address that deficit and will appeal to students and researchers exploring agriculture food politics and rural sociology
