The Children's Rights Movement Overcoming The Oppression Of Young People:

The Children's Rights Movement Beatrice Gross, Ronald Gross, 1977 A research book that deals with the subjects of children's rights movement vexing questions about the rights of children and especially about the treacherous territory where the rights of children conflict with traditionally acknowledged rights of parents to raise their children as they choose without interference from outside authorities *What's Wrong with Children's Rights* Martin Guggenheim, 2007-09-30 Children's rights the phrase has been a legal battle cry for twenty five years But as this provocative book by a nationally renowned expert on children's legal standing argues it is neither possible nor desirable to isolate children from the interests of their parents or those of society as a whole From foster care to adoption to visitation rights and beyond Martin Guggenheim offers a trenchant analysis of the most significant debates in the children's rights movement particularly those that treat children's interests as antagonistic to those of their parents Guggenheim argues that children's rights can serve as a screen for the interests of adults who may have more to gain than the children for whom they claim to speak More important this book suggests that children's interests are not the only ones or the primary ones to which adults should attend and that a best interests of the child standard often fails as a meaningful test for determining how best to decide disputes about children Children's Rights from Below M. Liebel, 2012-01-25 This book presents an integral cross cultural reflection on the social reality of children's rights and citizenship giving an insight into new perspectives on the history and different concepts of children's rights in a contextualized and localized manner **The Future of Children's Rights** Michael Freeman, 2015-01-08 This volume is in part intended to celebrate the 25th anniversary of the United Nations Convention on the Rights of the Child We are now a generation on from its formulation and as this varied collection of articles by leading thinkers in the field reflects children's rights have come a long way Yet the aim of this volume is not to look back but to take stock and look forward It explores subjects as diverse as socio economic rights corporal punishment language and scientific progress as they relate to children and their rights and offers new insights and new ideas Edited by one of the most respected and leading scholars in the field *The Future of Children's Rights* constitutes a stimulating and useful resource for academics and practitioners alike **Children's Rights and Refugee Law** Samantha Arnold, 2017-08-09 Children make up half of the world's refugees and over 40 per cent of the world's asylum seekers However children are largely invisible in historical and contemporary refugee law Furthermore there has been very limited interaction between the burgeoning children's rights framework in particular the Convention on the Rights of the Child CRC and the 1951 Convention relating to the Status of Refugees Refugee Convention This book explores the possibility of a children's rights approach to the interpretation of the Refugee Convention and within that what such an approach might look like In order to construct a children's rights approach the conceptualisations of children outside the legal discipline within international children's rights law and then within refugee law and refugee discourse are analysed The approach taken is socio legal and comparative in

nature and the suitability of the Refugee Convention as a framework for the interpretation of child claims is examined. The book analyses to what extent the Refugee Convention is capable of dealing with claims from children based on the modern conceptualisation of children which is underscored by two competing ideologies: the child as a vulnerable object in law to be protected and the child as subject with rights and the capacity to exercise their agency. The influence each regime has had on the other is also analysed. The work discusses how a children's rights approach might improve outcomes for child applicants. The book makes an original contribution to child refugee discourse and as such will be an invaluable resource for academics, researchers and policymakers working in the areas of migration and asylum law, children's rights and international human rights law.

The Rights of the Child and the Changing Image of Childhood Philip E. Veerman, 2021-11-01. In this book Philip E. Veerman presents and discusses milestones in the evolution of children's rights as well as the work of a number of important pioneers in this field in order to examine whether the concept of childhood has changed in our century. With Samuel Shye's Systemic Quality of Life Model as a conceptual framework and uniform standard, more than forty Declarations and Conventions are analysed and compared. Veerman thus unfolds an exciting picture of the changing image of childhood starting at the beginning of this century and culminating in the United Nations Convention on the Rights of the Child of 1989 and the World Summit for Children of 1990. Finally, the author proposes together with Samuel Shye a Declaration on the Rights of the Child based on the Systemic Quality of Life Model. All the important Declarations and Conventions are reprinted as appendices. This makes Veerman's study a complete and up-to-date textbook on children's rights. Dr Veerman is the coordinator of the Israel Section of Defence for Children International (DCI) and Fellow of the Youth Policy Center of Haifa University.

Thatcher's Children? Dr Jane Pilcher, Jane Pilcher, Stephen Wagg, 2005-06-28. That childhood is a social construction is understood both by social scientists and in society generally. The authors of this book examine the political issues surrounding childhood, including law-making, social policy, government provisions and political activism. This text examines current social and political issues involving childhood. It looks at the impact of the New Right who talk of family values, parent power in schools, irresponsible provision of contraception to young girls and the increase in child violence as a result of mass media. It also considers the response of the caring professions and the Modern Left who campaign amongst other things for the establishment of children's rights.

Youth-Led Community Organizing Melvin Delgado, Lee Staples, 2008. Youth-led organizing is increasingly receiving attention from scholars, activists and the media. Delgado and Staples have produced the first comprehensive study of this dynamic field. Their well-organized book takes an important step toward bridging the gap between academic knowledge and community practice in this growing area.

Visions of Entitlement Mary A. Jensen, Stacie G. Goffin, 1993-10-12. As part of a re-examination of our societal values and obligations, this book focuses on illuminating the various meanings and issues of entitlement in relation to the basic needs of children in our society. Drawing on the perspectives of philosophy, law, education, sociology, child development, economics and public health,

the authors discuss the implications of their vision of entitlement for the well being of America's children. The book also points out specific family and cultural contexts for the provision of entitlements for young children. And finally it turns our attention to the moral commitments needed to effect changes in policies and programs. In this way the book provides valuable information for all who are trying to improve the nurture and education of America's children. *Childhoods of the Global South* Manfred Liebel, 2023-09-14 Children in the Global South continue to be affected by social disadvantage in our unequal post colonial world order. With a focus on working class children in Latin America this book explores the challenges of promoting children's rights in a context of decolonization. Liebel and colleagues give insights into the political lives of children and demonstrate ways in which the concept of children's rights can be made meaningful at the grassroots level. Looking to the future they consider how collaborative research with children can counteract their marginalization and oppression in society. **Children in Court** Susan Gluck Mezey, 1996-07-03 Through an analysis of Supreme Court and lower court decisions over the last several decades this book determines the extent to which the federal courts have affected the legal, political, economic and social status of children in the U.S. **The Case Against Adolescence** Robert Epstein, 2007 This groundbreaking book argues that adolescence is an unnecessary period of life that people are better off without. Robert Epstein, former editor in chief of *Psychology Today*, shows that teen turmoil is caused by outmoded systems put into place a century ago which destroyed the continuum between childhood and adulthood. Where this continuum still exists in other countries there is no adolescence. Isolated from adults, American teens learn everything they know from their media-dominated peers. The last people on earth they should be learning from, says Epstein. Epstein explains that our teens are highly capable in some ways more capable than adults and argues strongly against infantilizing young people. We must rediscover the adult in every teen, he says, by giving young people adult authority and responsibility as soon as they can demonstrate readiness. This landmark book will change the thinking about teens for decades to come. Reinventing Childhood After World War II Paula S. Fass, Michael Grossberg, 2011-11-29 In the Western world the modern view of childhood as a space protected from broader adult society first became a dominant social vision during the nineteenth century. Many of the West's sharpest portrayals of children in literature and the arts emerged at that time in both Europe and the United States and continue to organize our perceptions and sensibilities to this day. But that childhood is now being recreated. Many social and political developments since the end of the World War II have fundamentally altered the lives children lead and are now beginning to transform conceptions of childhood. *Reinventing Childhood After World War II* brings together seven prominent historians of modern childhood to identify precisely what has changed in children's lives and why. Topics range from youth culture to children's rights, from changing definitions of age to nontraditional families, from parenting styles to how American experiences compare with those of the rest of the Western world. Taken together the essays argue that children's experiences have changed in such dramatic and important ways since 1945 that parents, other adults, and girls and boys themselves have

had to reinvent almost every aspect of childhood *Reinventing Childhood After World War II* presents a striking interpretation of the nature and status of childhood that will be essential to students and scholars of childhood as well as policy makers educators parents and all those concerned with the lives of children in the world today *Critical Children's Rights Studies* Valeria Llobet, Didier Reynaert, Afua Twum-Danso Imoh, Wouter Vandenhoe, 2025-06-13 The field of children's rights studies is well established and largely dominated by a top down approach that considers these rights as objective standards requiring implementation in practice or policy This book argues for a critical perspective which views the area as contested terrain with conflicting normative foundations and traditions The collection brings together established and rising scholars whose work has been central to not only challenging mainstream children's rights discourses but also provides alternative pathways to conceptualizing children's rights It moves beyond critiques of these dominant discourses and sets out the emerging paradigm of Critical Children's Rights Studies drawing on contexts in both the Global North and Global South It proposes new pathways and subjects these to scrutiny illuminating the importance of contextual situatedness and acknowledging the need to consider researchers own positionality when outlining their stance on children's rights Containing both empirical and theoretical scholarship the book will be an essential resource for students academics researchers and policy makers working in the multidisciplinary areas of childhood studies children's rights studies and international human rights *Spanked* Christina L. Erickson, 2022-08-22 Why do we accept hitting children and call it discipline when we don't accept hitting other people Erickson reviews more than 100 years of research sharing little known but astounding facts about spanking outcomes Interwoven with relatable human stories Erickson encourages a conversation about this common and nearly universal disciplinary practice [Abolish the Family](#) Sophie Lewis, 2022-10-04 What if we could do better than the family We need to talk about the family For those who are lucky families can be filled with love and care but for many they are sites of pain from abandonment and neglect to abuse and violence Nobody is more likely to harm you than your family Even in so called happy families the unpaid unacknowledged work that it takes to raise children and care for each other is endless and exhausting It could be otherwise in this urgent incisive polemic leading feminist critic Sophie Lewis makes the case for family abolition *Abolish the Family* traces the history of family abolitionist demands beginning with nineteenth century utopian socialist and sex radical Charles Fourier the Communist Manifesto and early twentieth century Russian family abolitionist Alexandra Kollontai Turning her attention to the 1960s Lewis reminds us of the anti family politics of radical feminists like Shulamith Firestone and the gay liberationists a tradition she traces to the queer marxists bringing family abolition to the twenty first century This exhilarating essay looks at historic rightwing panic about Black families and the violent imposition of the family on indigenous communities and insists only by thinking beyond the family can we begin to imagine what might come after **Organized Miracles** James Tull Richardson, Mary White Stewart, Robert B. Simmonds, Excellent study which moves back and forth between theory and empirical observations It looks at religious groups from

several different theoretical positions as well as raises a number of significant issues about the conduct of educational research
