Breaking the Glass Armor Kristin Thompson,2020-05-05 Classical works have for us become covered with the glassy armor of familiarity wrote Victor Shklovsky in 1914 Here Kristin Thompson defamiliarizes the reader with eleven different films Developing the technique formulated in her Eisenstein s Ivan the Terrible Princeton 1981 she clearly demonstrates the flexibility of the neoformalist approach She argues that critics often use cut and dried methods and choose films that easily fit those methods Neoformalism on the other hand encourages the critic to deal with each film differently and to modify his or her analytical assumptions continually Thompson s analyses are thus refreshingly varied and revealing ranging from an ordinary Hollywood film Terror by Night to such masterpieces as Late Spring and Lancelot du Lac She proposes a formal historical way of dealing with realism using Bicycle Thieves and The Rules of the Game as examples Stage Fright and Laura provide cases in which the classical cinema defamiliarizes its own conventions by playing with audience expectations Other chapters deal with Tati s Les Vacances de Monsieur Hulot and Play Time and Godard s Tout va bien and Sauve qui peut la vie Although neoformalist analysis is a rigorous distinctive approach it avoids extensive specialized vocabulary and esoteric concepts the essays here can be read separately by those interested in the individual films The book s overall purpose however goes beyond making these particular films more accessible and intriguing to propose new ways of looking at cinema as a whole

Committee on Resources, Land Use, and Energy, 1975 Hearings on proposition 15 *Economic Power in the Sino-U.S. Relationship* Kevin F. Donovan, 1995 Military strength has become inconsequential in the pursuit of any industrialized nation's most vital interests Alternatively states would do well to focus on the possibilities of exploitation of power through economic strength and economic interdependence This research reviews the theoretical approaches to power and interdependence and applies these concepts to the bilateral relationship between the U S and People's Republic of China This case study suggests that 1 the post Cold War national interests of these two disparate countries typify the international shift to economics based power and 2 under carefully qualified circumstances power can arise from asymmetries in economic Although engagement has failed to capture the strategic imagination of its predecessor President Clinton undoubtedly sees his election as rooted in national economic rejuvenation not grand security strategies Clear signals exist that demonstrate the Chinese leadership's dedication to economic growth as the nation's number one priority New career paths have emerged for clever revisionists who can accommodate Maoist Marxism to Western capitalism

Knowledge, Desire and Power in Global Politics Chengxin Pan, 2012-01-01 China threat or China opportunity like beauty is in the eyes of the beholder Western imaginations of China come under close scrutiny in this book in a new philosophical depth seldom attempted before Dr Pan displays in full force his analytical skills and his mastery of knowledge both East and West Contrary to conventional approaches he takes a step back to exercise a powerful reflective process to watch the China watchers with illuminating results Dr Pan s book deserves wide and careful reading Professor Gerald Chan University of Auckland New Zealand The rise of China is largely seen as either a threat or an opportunity Chengxin Pan exposes both of these representations as expressions of Western fears and desires for certainty and predictability His call for a more reflective and culturally sensitive understanding of China offers an important contribution to one of the big political debates of our time Professor Roland Bleiker University of Queensland Australia This is a brilliant and insightful treatment of Western representations of China with a theoretical framework suggesting they come not only from China itself but also the West Although it is not the first treatment of this topic it is innovative in considering the China threat and China opportunity both aspects of the rise of China are of crucial importance for our times With provocative conclusions it is a truly path breaking contribution to the literature I recommend it highly Emeritus Professor Colin Mackerras Griffith University Australia Pan has produced a book which not only challenges some basic assumptions about the nature of China s rise but more importantly forces us to rethink the very basic starting points of how we know what we know about China Professor Shaun Breslin University of Warwick UK How is the rise of China perceived in the West Why is it often labelled as threat and or opportunity What are the implications of these China imageries for global politics Taking up these important questions this groundbreaking book argues that the dominant Western perceptions of China s rise tell us less about China and more about Western self imagination and its desire for certainty Chengxin Pan expertly illustrates how this desire masked as China knowledge is bound up with the political

economy of fears and fantasies thereby both informing and complicating foreign policy practice in Sino Western relations Insofar as this vital relationship is shaped not only by China s rise but also by the way we conceptualise its rise this book makes a compelling case for critical reflection on China watching Knowledge Desire and Power in Global Politics is the first systematic and deconstructive analysis of contemporary Western representation of China s rise Setting itself apart from the mainstream empiricist literature its critical interpretative approach and unconventional and innovative perspective will not only strongly appeal to academics students and the broader reading public but also likely spark debate in the field of Chinese international relations
