*Public Garden Management: a Global Perspective* BIJAN DEHGAN, 2014-04-15 Public Gardens Management A Global Perspective provides essential information about public gardens and what is involved in designing managing and maintaining one Although suitable as a textbook its audience will include anyone with direct or peripheral responsibility for administration or supervision of a complex organization that requires scientific knowledge as well as public relations and business acumen It may also prove useful for homeowners for there is no fundamental difference between growing plants in a public garden or a home garden a fact reflected in the extensive reference citations The topic is multidisciplinary and as old as the beginning of human civilization when the concept of mental and physical restoration was realized by early man while he/she was in a natural but well ordered garden environment Thus began the art of garden making Many volumes have been written on every applicable subject discussed in this and similar publications Indeed the voluminous literature on history design horticulture and numerous related subjects is nothing short of overwhelming Accordingly anyone involved in management of public gardens whether as a director or area supervisor and irrespective of the type and size of such facility would have to have familiarity with various aspects of garden organization and administration However despite the enormous number and diversity of such publications there are very few books that deal with the multiplicity of the topics in such a manner as to be practical in approach and cover most relevant and unified issues in a single book These volumes provide the essential background information on plants animals management maintenance fundraising and finances as well as history art design education and conservation They also cover a host of interrelated subjects and responsible organization of such activities as creating a children's garden horticultural therapy conservatories zoological gardens and parks hence administration of multidimensional public gardens Nearly 500 full color plates representing illustrations from gardens in more than 30 countries are provided to assist and guide students and other interested individuals with history and the fundamental issues of public garden management The 15 chapters begin with the need for public gardens types of public gardens historical backgrounds as well as design diversity Numerous quotations are included from many garden lovers landscape architects philosophers and others The authors primary aim in writing this book was based on the confidence that a relevant reference between the encyclopedic nature of some and the specific subject matter of others could be used to provide fundamental information for management of public as well as private gardens The boundary between botanical and zoological gardens and parks is no longer as distinct as it once was In part it is because a garden is not a garden without plants and in part it has become apparent that for all practical intents and purposes all animals need plants for their survival Visitors of zoological gardens

expect to see more than just animals zoos are landscaped grounds Moreover most communities find it financially difficult to simultaneously operate a botanical garden or an arboretum as well as a zoological garden and city parks A number of public gardens are currently referred to as botanical and zoological garden Population density and the public's desires and expectations as well as financial requirements are among the reasons for some major city parks such as Golden Gate in San Francisco Central Park in New York City and Lincoln Park in Chicago which integrate botanical or zoological divisions as well as museums and recreational facilities While this book attempts to provide basic principles involved in public garden management it does not claim to be a substitute for broader familiarity **Gardener's Chronicle of America** ,1929

*Analysing the Boundaries of the Ancient Roman Garden* Victoria Austen,2023-02-09 This book demonstrates how the Romans constructed garden boundaries specifically in order to open up or undermine the division between a number of oppositions such as inside outside sacred profane art nature and real imagined Using case studies from across literature and material and visual culture Victoria Austen explores the perception of individual garden sites in response to their limits and showcases how the Romans delighted in playing with concepts of boundedness and separation Transculturally the garden is understood as a marked off and cultivated space Distinct from their surroundings gardens are material and symbolic spaces that constitute both universal and culturally specific ways of accommodating the natural world and expressing human attitudes and values Although we define these spaces explicitly through the notions of separation and division in many cases we are unable to make sense of the most basic distinction between garden and not garden In response to this ambiguity Austen interrogates the notion of the boundary as an essential characteristic of the Roman garden *Dolly Is Dead • The Garden Plot* J.S. Borthwick,2025-06-24 Sarah Deane may be a newly minted college professor but whether she's on the rocky coast of Maine or an elegant English estate her real calling is as the Nancy Drew of the 1980s Publishers Weekly Everybody loves Dolly At least that's what Sarah Deane's sister says But Sarah's siblings aren't so sure and when Dolly turns up drowned they ask Sarah to start asking questions After all in the finest cozy mystery tradition the police may not be up to the task And while Sarah may be more PhD than PD she has a well known knack for nosing around and uncovering secrets like the ones that may have killed Dolly Not long thereafter Sarah is bamboozled into shepherding tiresome Aunt Julia around the great gardens of Europe It helps that her old friend Ellen Trevino is the expert leading the tour but when Ellen misses the plane Sarah's oh so sensitive nose starts twitching When you've solved as many murders as she has you get a sense about these things and before the group sits down to its first cream tea Sarah's nose is jumping like it has springs attached
