Annual Workshop on Formal Approaches to Slavic Linguistics James Eric Lavine, 2006 The present volume consists of revised and edited versions of papers originally presented at the fourteenth annual meeting of Formal Approaches to Slavic Linguistics held at Princeton University May 6-8 2005. P v

The Cambridge Handbook of Slavic Linguistics Danko Šipka, Wayles Browne, 2024-05-31 The linguistic study of the Slavic language family with its rich syntactic and phonological structures, complex writing systems and diverse socio-historical context is a rapidly growing research area. Bringing together contributions from an international team of authors this Handbook provides a systematic review of cutting edge research in Slavic linguistics. It covers phonetics and phonology, morphology and syntax, lexicology and sociolinguistics.

and presents multiple theoretical perspectives including synchronic and diachronic Each chapter addresses a particular linguistic feature pertinent to Slavic languages and covers the development of the feature from Proto Slavic to present day Slavic languages the main findings in historical and ongoing research devoted to the feature and a summary of the current state of the art in the field and what the directions of future research will be Comprehensive yet accessible it is essential reading for academic researchers and students in theoretical linguistics linguistic typology sociolinguistics and Slavic East European Studies **The Oxford Handbook of Grammatical Number** Patricia Cabredo Hofherr, Jenny

Doetjes, 2021-07-06 This volume offers detailed accounts of current research in grammatical number in language Following a detailed introduction the chapters in the first three parts of the book explore the multiple research questions in the field and the complex problems surrounding the analysis of grammatical number Part I presents the background and foundational notions Part II the morphological semantic and syntactic aspects and Part III the different means of expressing plurality in the event domain The final part offers fifteen case studies that include in depth discussion of grammatical number phenomena in a range of typologically diverse languages written by or in collaboration with native speakers linguists or based on extensive fieldwork The volume draws on work from a range of subdisciplines including morphology syntax semantics and psycholinguistics and will be a valuable resource for students and scholars in all areas of theoretical descriptive and experimental linguistics **Segmental Structure and Tone** Wolfgang Kehrein, Björn Köhnlein, Paul

Boersma, Marc Oostendorp, 2017-12-18 This volume seeks to reevaluate the nature of tone segment interactions in phonology The contributions address among other things the following basic questions what tone segment interactions exist and how can the facts be incorporated into phonological theory Are interactions between tones and vowel quality really universally absent What types of tone consonant interactions do we find across languages What is the relation between diachrony and synchrony in relevant processes The contributions discuss data from various types of languages where tonal information plays a lexically distinctive role from pure tone languages to so called tone accent systems where the occurrence of contrastive tonal melodies is restricted to stressed syllables The volume has an empirical emphasis on Franconian dialects in the Netherlands Belgium and Germany but also discusses languages as diverse as Slovenian Livonian Fuzhou Chinese and Xhosa *Competing Comparative Constructions in Europe* Thomas Stolz, 2013-10-24 This in depth areal typological study analyzes the grammatical means which are employed in the languages of Europe to express the comparative of inequality superiority The extant theories and hypotheses about the morphosyntactic structure and the cross linguistic distribution of construction types are reviewed The behavior of comparatives under the conditions of language contact is discussed Data from more than 170 standard and nonstandard varieties of European languages are scrutinized systematically The synchronic picture is complemented by a chapter on the diachrony of comparative constructions The European facts are compared to those of the geographically adjacent Asian and African regions It is argued that cross linguistic investigations

must take account also of so called secondary options These secondary options suggest strongly that the supposedly dominant role of the particle comparative cannot be upheld for Europe Moreover only the secondary options allow us to draw isoglosses which cross the borders between Europe and Asia and Africa **The Emergence of Distinctive Features** Jeff

Mielke,2008-03-13 The Emergence of Distinctive Features will be of essential interest to phonologists and typologists as well as to syntacticians cognitive scientists and scholars outside linguistics interested in the nature of language and its acquisition

in the construction of culinary taste lifestyle and class through cookbook language style in post socialist Slovenia Using a critical discourse studies approach it demonstrates how the representation of culinary advice in standard and celebrity cookbooks has changed in recent decades as a result of general social transformations such as postmodernity and globalization It argues that compared to the standard cookbooks where nutritionist ideology is at the forefront the celebrity cookbooks reflect the conversational hybrid nature of the genre through which they promote global foodie discourse while at the same time localizing the global trends to the Slovene context The book lays at the intersection of discourse analysis sociology food cultural communication and media studies and post socialism and should be of interest to those interested in celebrities food media socialism and post socialism cookbooks globalization and discourse change
