## **Snap Happy:**

FutureShop Daniel Nissanoff, 2007-06-26 FutureShop is a book about change. In particular it's about how our consumer culture is rapidly evolving to allow us to live better richer lives for less. The catalyst to this change is eBay and similar sites that are quickly growing into mainstream shopping venues and creating unprecedented levels of liquidity for our everyday goods. The wave of the future will be temporary ownership: consumers will be able to buy what they really want because they'll be able to easily sell it when they are ready to upgrade to the next item on their wish list. Veteran Web entrepreneur Daniel Nissanoff's invaluable heads up explores why this change is taking place and discusses what consumers and businesses can do in order to benefit from this new paradigm.

*Powered by Plants* Clive Gifford, 2022-08-02 Following on from the incredible *Invented by Animals* and *Built by Animals*, *Powered by Plants* introduces us to the wondrous plants whose ingenious features have inspired innovations in human technology. Plants exhibit an incredible range of diversity in their shape, structures and how they interact with other living things and their environment. Some of this great diversity is being increasingly studied and copied, inspiring innovation in science, design, engineering and technology. This book guides readers through a startling collection of fascinating vegetation: from towering cottonwood trees with wind power potential to slippery meat-eating assassins of the plant world and the fast-growing aquatic plant which helps propel ships farther using less energy. Learn surprising applications and spin-offs of both exotic species including the world's largest flower that generates its own heat and more familiar plants such as bamboo, coconut and maize, all depicted in colourful, engaging fashion. Colourful and lively illustrations and pop-out fact boxes bring the science in this book to life, and *Powered by Plants* shows us how much we can learn from studying the myriad magnificence of the natural world. Other fascinating books in this series are *Built by Animals* and *Invented by Animals*.
