Symposium on Motivation, 1980 **Why We Lie** David Livingstone Smith, 2007-08-07 Deceit lying and falsehoods lie at the very heart of our cultural heritage Even the founding myth of the Judeo Christian tradition the story of Adam and Eve revolves around a lie We have been talking writing and singing about deception ever since Eve told God The serpent deceived me and I ate Our seemingly insatiable appetite for stories of deception spans the extremes of culture from King

Lear to Little Red Riding Hood retaining a grip on our imaginations despite endless repetition These tales of deception are so enthralling because they speak to something fundamental in the human condition The ever present possibility of deceit is a crucial dimension of all human relationships even the most central our relationships with our very own selves Now for the first time philosopher and evolutionary psychologist David Livingstone Smith elucidates the essential role that deception and self deception have played in human and animal evolution and shows that the very structure of our minds has been shaped from our earliest beginnings by the need to deceive Smith shows us that by examining the stories we tell the falsehoods we weave and the unconscious signals we send out we can learn much about ourselves and how our minds work Readers of Richard Dawkins and Steven Pinker will find much to intrigue them in this fascinating book which declares that our extraordinary ability to deceive others and even our own selves lies at the heart of our humanity **Truth and Post-Truth**

in Public Policy Frank Fischer,2021-12-09 The phenomenon of post truth poses a problem for the public policy oriented sciences including policy analysis Along with fake news the post truth denial of facts constitutes a major concern for numerous policy fields Whereas a standard response is to call for more and better factual information this Element shows that the effort to understand this phenomenon has to go beyond the emphasis on facts to include an understanding of the social meanings that get attached to facts in the political world of public policy The challenge is thus seen to be as much about a politics of meaning as it is about epistemology The analysis here supplements the examination of facts with an interpretive policy analytic approach to gain a fuller understanding of post truth The importance of the interpretive perspective is illustrated by examining the policy arguments that have shaped policy controversies related to climate change and coronavirus denial **Studies in Deceit** Hugh Hartshorne,1928 Advances in Child Development and Behavior
