Doerflinger,1957      **Class American Socty IIs 103** Leonard Reissman,2013-08-21 This is Volume II of twenty one in a collection of Race Class and Social Structure Originally published in 1960 this book is about the place of class and its synonyms status prestige and power in the structure of American society A dominant theme of the book is that classes do exist even though individuals are not chained to these social positions with unequivocal finality      **The Oxford Handbook of Social Class in Counseling** William Ming Liu,2013-03-28 This book summarizes and synthesizes the available research on social class and classism around counseling practice and research The authors offer interesting and provocative applications of social class and classism to varied practice and research settings and provide suggestions toward education training and practice      *Human Behavior Theory and Applications* Elizabeth DePoy,Stephen French Gilson,2011-09-21 In *Human Behavior Theory and Applications* authors Elizabeth DePoy and Stephen Gilson use a critical thinking approach to engage students to think in depth about theory and its use in social work practice With a strong focus on diversity this book expands its theory coverage to include progressive and the most cutting edge contemporary thinking The authors skillfully introduce theory critically examine each theory including developmental theories environmental theories diversity theories systems theories and new and emerging theories and then apply each theory to social work practice providing a synthesis of classical and contemporary theory for scholarly analysis and application to professional intellectual and social action      *The Sociology of Elite Distinction* J. permeated the entire social fabric Supermarkets and shopping malls must be interpreted in the light of their ritual significance as temples and holy cities of a new symbolic order In the consumeristic era many people are led to think and imagine in consumer terms to identify themselves through consumption rituals The impact of consumerism on culture from literature to art should not be underestimated Many artists have tried to develop their aesthetics by triggering a dialectical or openly critical confrontation with consumerism This book also takes into account the development of violence and the effects of consumerism on childhood and new generations The book contains a preface by the German anthropologist Christoph Wulf and the images illustrating the text are by Belgian artist Michel Couturier

**Getting Rich** Lisa A. Keister,2005-05-30 Although basic facts about wealth inequality are no longer a mystery we still know very little about who the wealthy are how they got there and what prevents other people from becoming rich That is we know very little about the process of wealth mobility This book explores wealth by investigating some of the most basic questions about wealth mobility How much mobility is there Has the nature of mobility changed over time Is entrepreneurship important How much does inheritance matter What other factors encourage or prevent wealth mobility and how do these change over the course of a person s life

**The Sociological Inheritance of the 1960s** Jiří Šubrt,2023-11-27 The 1960s saw pioneering changes in the realms of international politics science culture and art Turning this historical lens onto the study of sociology this book reveals both the continuities and the departures the field has seen in its core principles and approaches over the past several decades

**Social Structure and Mobility in Economic Development** Seymour Lipset,2018-04-27 The foundation of this volume is the notion that the several processes of change constituting economic and social development are systematically interrelated The essence of development is the appearance of rapid rates of increases in many different indices output per capita political participation literacy and the like These quantitative changes are however commonly accompanied by vast changes in the social structure markets emerge political bureaucracies arise and new educational systems appear Written by the leading authorities on the subject this group of papers tackles the causes and consequences of social mobility Each author brings his particular skills to bear on various aspects of the problem in studies of persons moving from rural to urban settings from one kind of industry to another and from one prestige level to another Several of the papers review the theoretical and methodological issues involved in comparative research on social mobility while others compare and contrast traditional and modern stratification systems Various papers explore the economic religious and psychological basis of social mobility concluding with enquiry into the

consequences of rapid mobility especially in terms of the political stability of developing nations Because social mobility is a central consideration in any study of economic and social change every student of change will use this pioneering reference source as a text for all future research Contributors include Otis Dudley Duncan Harold L Wilensky Michael G Smith Bert F Hoselitz Wilbert E Moore Natalie Rogoff Rams y Gideon Sjoberg Reinhard Bendix Harry Crockett David Matza Lester Seligman and Gino Germani Neil J Smelser is emeritus professor Department of Sociology University of California Berkeley Seymour Martin Lipset was professor of sociology and director of the Institute of International Studies at the University of California Berkeley *Promoting Creative Tourism: Current Issues in Tourism Research* Ahmad Hudaiby Galih Kusumah,Cep Ubad Abdullah,Dewi Turgarini,Mamat Ruhimat,Oce Ridwanudin,Yeni Yuniawati,2021-04-23 The papers presented in this work cover themes such as sustainable tourism ICT and tourism marine tourism tourism and education tourism economics and finance tourism marketing recreation and sport tourism halal culture and indigenous tourism destination management tourism gastronomy politic social and humanities in tourism heritage tourism medical film induced tourism community based tourism tourism planning and policy meeting incentive convention and exhibition supply chain management hospitality management restaurant management and operation safety and crisis management corporate social responsibility CSR tourism geography disruptive innovation in tourism infrastructure and transportation in tourism development urban and rural tourism planning and development community resilience and social capital in tourism The 4th ISOT 2020 aimed at 1 bringing together scientists researchers practitioners professionals and students in a scientific forum and 2 having discussions on theoretical and practical knowledge about current issues in tourism The keynote speakers contributing to this conference are those with expertise in tourism either in an academic or industrial context Equity and Quality Dimensions in Educational Effectiveness Leonidas Kyriakides,Bert Creemers,Evi Charalambous,2018-01-03 This book aims to make a contribution to the theory research and practice on quality and equity in education by providing a comprehensive overview of these two dimensions of educational effectiveness and proposing a methodological instrument that may be used to measure the contribution that each school can make to promoting equity The importance of using this instrument is demonstrated by analysing results of various effectiveness studies conducted over the last decade The book draws upon research across the world especially research conducted in the Europe the United States and Australasia It is shown that promoting equity has no negative effect on the promotion of quality The importance of using this methodological instrument to identify factors that promote both quality and equity at different educational levels i e teacher school and educational system is stressed The book also demonstrates how we can measure stability and changes in the effectiveness status of schools over time in terms of fostering quality and equity In addition it underlines the importance of identifying factors measuring changes in the effectiveness status of schools in terms of equity and points to the alternative strategies that can be used at school and system level In our attempt to encourage the further development and use of this methodology

for school improvement purposes we demonstrate how experimental studies can be conducted to discover whether and under which conditions the proposed methodology can help schools promote both quality and equity Finally implications for school evaluation research educational policy and practice are drawn In this way the book contributes significantly to the debate on how quality and equity can be achieved and encourages policy makers and practitioners not to view these two dimensions of effectiveness as being in competition with each other but as constituting the major objectives of any reform policy and or improvement effort at school and or national levels
