Women and the People Helen Rogers, 2017-05-15 Based on extensive new research investigating the range of women s involvement in early nineteenth century popular politics mid Victorian reform and the women s movements of the late century *Women and the People* makes an original intervention in the historiography of the radical tradition by exploring the interconnections of populism liberalism and feminism Attending to authorship the study argues that the representational forms adopted by radicals were as important as the content of what they said in shaping their self perception their construction of others and the reception of their ideas In fiction poetry and autobiography as well as in political writing speeches and journalism women reworked radical conventions and imagined new models of political identity participation and authority Though in general radicals appealed to the people women were often positioned as the

suffering objects of reform rather than as the agents of change By showing how they challenged or reinforced these conceptions of women and the people the book contends that radical women invoked alternative communities of sex class and nation and helped to remake and discipline the political sphere as they strove to make it their own *Women and Reform in a New England Community, 1815-1860* Carolyn J. Lawes, 2021-10-21 Interpretations of women in the antebellum period have long dwelt upon the notion of public versus private gender spheres As part of the ongoing reevaluation of the prehistory of the women's movement Carolyn Lawes challenges this paradigm and the primacy of class motivation She studies the women of antebellum Worcester Massachusetts discovering that whatever their economic background women there publicly worked to remake and improve their community in their own image Lawes analyzes the organized social activism of the mostly middle class urban white women of Worcester and finds that they were at the center of community life and leadership Drawing on rich local history collections Lawes weaves together information from city and state documents court cases medical records church collections newspapers and diaries and letters to create a portrait of a group of women for whom constant personal and social change was the norm Throughout *Women and Reform in a New England Community* conventional women make seemingly unconventional choices A wealthy Worcester matron helped spark a women led rebellion against ministerial authority in the town's orthodox Calvinist church Similarly a close look at the town's sewing circles reveals that they were vehicles for political exchange as well as social gatherings that included men but intentionally restricted them to a subordinate role By the middle of the nineteenth century the women of Worcester had taken up explicitly political and social causes such as an orphan asylum they founded funded and directed Lawes argues that economic and personal instability rather than a desire for social control motivated women even relatively privileged ones into social activism She concludes that the local activism of the women of Worcester stimulated and was stimulated by their interest in the first two national women's rights conventions held in Worcester in 1850 and 1851 Far from being marginalized from the vital economic social and political issues of their day the women of this antebellum New England community insisted upon being active and ongoing participants in the debates and decisions of their society and nation *The Political Mobilization of the European Left, 1860-1980* Stefano Bartolini, 2000-08-28 In an in depth comparative analysis Stefano Bartolini studies the history of socialism and working class politics in Western Europe While examining the social contexts organizational structures and political developments of thirteen socialist experiences from the 1860s to the 1980s he reconstructs the steps through which social conflict was translated and structured into an opposition as well as how it developed its different organizational and ideological forms and how it managed more or less successfully to mobilize its reference groups politically
