**The Social Dynamics of Pronominal Systems** Paul Bouissac, 2019-07-15 Personal pronouns have a special status in languages As indexical tools they are the means by which languages and persons intimately interface with each other within a particular social structure Pronouns involve more than mere grammatical functions in live communication acts They variously signal the gender of speakers as parts of utterances or in their anaphoric roles They also prominently indicate with a range of degrees the kind of social relationships that hold between speakers from intimacy to indifference from dominance to submission and from solidarity to hostility Languages greatly vary in the number of pronouns

and other address terms they offer to their users with a distinct range of social values Children learn their relative position in their family and in their society through the correct use of pronouns When languages come into contact because of population migrations or through the process of translation pronouns are the most sensitive zone of tension both psychologically and politically This volume endeavours to probe the comparative pragmatics of pronominal systems as social processes in a representative set from different language families and cultural areas Coordination: Neural, Behavioral and Social Dynamics Armin Fuchs,Viktor K. Jirsa,2007-12-11 One of the most striking features of Coordination Dynamics is its interdisciplinary character The problems we are trying to solve in this field range from behavioral phenomena of interlimb coordination and coordination between stimuli and movements perception action tasks through neural activation patterns that can be observed during these tasks to clinical applications and social behavior It is not surprising that close collaboration among scientists from different fields as psychology kinesiology neurology and even physics are imperative to deal with the enormous difficulties we are facing when we try to understand a system as complex as the human brain The chapters in this volume are not simply write ups of the lectures given by the experts at the meeting but are written in a way that they give sufficient introductory information to be comprehensible and useful for all interested scientists and students
