The Encyclopedia of Aging George L. Maddox, 2013-12-11 Comprehensive multidisciplinary encyclopedia dealing with aging processes and older adults Intended for the educated inquirer who needs a brief authoritative introduction to key topics and issues in aging Signed entries

contain cross references Contains lengthy bibliography General index *Aging* Lewis R. Aiken, 1994-08-17 The aging process is a complex sometimes mysterious evolution we will all experience In this interdisciplinary text author Lewis R Aiken acquaints you with the elements and effects influencing people in the later stages of life Beginning with an historical overview of gerontology Aiken discusses both pragmatic and philosophical concerns within the field Factors impacting the process and results of aging are carefully outlined and explicated these address such areas as biology psychology sociology economics and politics The interpersonal variability of the older population is stressed throughout the book recognizing gender ethnic racial and cultural differences Each chapter concludes with a thorough review of the material covered a series of questions and activities designed to enhance the learning experience and a list of suggested readings that expand on the topics being discussed Clearly written authoritative rich in information and integration of research material in a wide range of disciplines *Aging An Introduction to Gerontology* is valuable for undergraduate certificate and community college programs in gerontology as well as graduate courses in applied professional disciplines The book makes a contribution to the field it is a praiseworthy effort and it has substantive merit It reveals competence good grasp of the subject matter and a very good integration of research material in a wide range of disciplines The information is generally very much up to date and relevant It constitutes the right introduction for people interested to learn about the field of gerontology The text is lucid clearly written and easy to read It is definitely well attuned to its targeted audience It introduces technical terminology with all the proper caveats and facilitates its comprehension with a glossary Abraham Monk School of Social Work Columbia University This is a basic textbook of human gerontology that comprehensively covers aging and the aged with a special emphasis on the psychology of aging The purpose is to review what is known about aging and older adulthood the methods by which this information is obtained and to provide practical guidelines for dealing with the problems of an aged population The author meets these goals very well This book is written for undergraduate and graduate students Even geriatricians in training will find this a lucid exposition of human gerontology This book's well organized chapters are clearly illustrated There are boxes that highlight concepts and a list of further readings in addition to well cited references At the end of each chapter there are questions and exercises This textbook is a welcome addition to the field It is very well written and organized Both teachers and students will enjoy using this textbook Rating 98 Doody's Health Sciences Book Review Journal *Aging* is rich in information and integration of research material in a wide range of disciplines and valuable for undergraduate certificate and community college programs in gerontology and as well graduate courses in applied professional disciplines Turning Pages **Age and the Reach of Sociological Imagination** Dale Dannefer, 2021-08-09 The dominant narratives of both science and popular culture typically define aging and human development as self contained individual matters failing to recognize the degree to which they are shaped by experiential and contextual contingencies Our understandings of age are thereby boxed in and constricted by assumptions of normality and naturalness that limit our

capacities to explore possible alternative experiences of development and aging and the conditions both individual and social that might foster such experiences Combining foundational principles of critical social science with recent breakthroughs in research across disciplines ranging from biology to economics this book offers a scientifically and humanly expanded landscape for apprehending the life course Rejecting familiar but false dichotomies such as nature vs nurture and structure vs agency it clarifies the organismic fundamentals that make the actual content of experience so centrally important in age and development and it also explores why attention to these fundamentals has been so resisted in studies of individuals and individual change and in policy and practice as well In presenting the basic principles and reviewing the current state of knowledge Dale Dannefer introduces multi levelled social processes that shape human development and aging over the life course and age as a cultural phenomenon organizing his approach around three key frontiers of inquiry that each invite a vigorous exercise of sociological imagination the Social Structural Frontier the Biosocial Frontier and the Critical Reflexive Frontier

Emotion Communication by the Aging Face and Body Ursula Hess,Reginald B. Adams, Jr.,Robert E. Kleck,2023-12-07 As our society ages questions concerning the relations between generations gain importance The quality of human relations depends on the quality of emotion communication which is a significant part of our daily interactions Emotion expressions serve not only to communicate how the expresser feels but also to communicate intentions whether to approach or retreat and personality traits such as dominance trustworthiness or friendliness that influence our decisions regarding whether and how to interact with a person Emotion Communication by the Aging Face and Body delineates how aging affects emotion communication and person perception by bringing together research across multiple disciplines Scholars and graduate students in the psychology of aging affective science and social gerontology will benefit from this overview and theoretical framework
