support learners at risk of interrupted development Macalane J. Malindi,Johnnie Hay,Thabo Makhalemele,2024-02-23 The COVID 19 pandemic and the restrictions that came with it led to unprecedented disruptions in learner development and put them at risk of poor developmental outcomes It is thus important that the extent of the disruption on their development and the support needs of learners be investigated Researching the impact of the disruption should focus on holistic development In this book the authors use multiple research approaches and methods of gathering data in their respective fields to examine the impact of the disruption and determine the support needs of learners Data gathered through the different methods are processed and findings are presented The findings have implications for both practice and future research in the fields of inclusive education learner support educational psychology movement education Life Orientation and curriculum development **First World, Third World** W. Ryrie,1999-02-23 This new updated and extended edition of First World Third World examines the failures of aid to eliminate poverty The world development effort can claim only limited success and in some parts of the world especially Africa failure must be recognised William Ryrie while starting from a position of sympathy with the aims of the aid effort insists that the record must be analysed with ruthless honesty Well intentioned aid has often had perverse and harmful effects One of these has been to undermine the working of the market economy which offers the best hope for development and growth His book proposes a new approach to the development task which would reconcile it with market philosophies Targeting vulnerability hotspots along the agrifood system Letta,

M.,Montalbano, P.,Morales Opazo, C.,Petrucelli, F.,2024-05-29 We leverage the multi stressor nature of the COVID 19 generalized disruption as an opportunity to test the out of sample forecasting accuracy of both theory based and data driven vulnerability prediction models for the ex ante targeting of preventive interventions Author Taking advantage of the World Bank multitopic surveys for Ethiopia and Nigeria the two most populous African countries our retrospective evaluation assesses the models ability to anticipate households and agrifood system actors experiencing food insecurity and income

losses during the COVID 19 pandemic Author The results are disappointing we document that despite considerable heterogeneity across data and methods both models do not achieve satisfactory out of sample forecasting performances Author Our findings are robust to the use of different data estimation methods and several heterogeneity analyses and sensitivity checks Author This evidence calls for a refinement of current profiling methodologies and for interoperability efforts to close existing microdata gaps Author Such efforts would enable policymakers to implement more effective early warning systems of vulnerability hotspots and improve the cost effectiveness of development interventions aimed at targeting groups vulnerable to future food crises Author
