*Research for Social Justice* Elly Malihah, Tutin Aryanti, Vina Adriany, Hani Yulindrasari, Alicia Izharuddin, 2019-10-24. Individuals are equipped with a wide range of knowledge that enhances their employability, health, family life, and social engagement. On this basis, providing equality for all has been set to be achieved as one of the United Nations sustainable development priorities. However, the international understandings are not only of what equality and inclusivity entail but also the social vision to achieve social justice. Best practices provide a meaningful cross national discussion with respect to the following topics: power relations within research, social inequalities in society, science research for social justice, the redefinition of the notion of social justice, education for social justice, spatial justice, the research of gender and marginalized groups, the re conceptualization of the epistemological foundation of research, hegemonic discourses on research, science technology for social justice and welfare as well as culture and social justice. This edited book aims to provide a new perspective for other benefits of research because generally the research carried out only aims to answer scientific problems and often override aspects of humanities. In response to these concerns, the book attempts to re map the main objectives of the research. The authors in this book offer new perspectives especially in formulating the purposes of the studies they will perform. Therefore, this book presents a unique review of research with a variety of approaches that are coherent with the state of society in the world, followed by eleven scopes of various cases from a variety of perspectives that highlight theoretical and methodological questions about research and social justice. This book presents outstanding applications through multiple types of approaches that are relevant to the current context of world community issues. The articles in this book will be of interest to undergraduate and graduate students as well as researchers who are
