OVERVIEW

Social Values are the principles or standards that a group or society deems important and acceptable. They guide behavior and interactions within a society and often form the basis of social norms and laws. They are necessary to keep the society functioning smoothly and harmoniously. Examples include respect for others, honesty, and cooperation.

EXAMPLES

Social Values And Development:

Values and Development in Southern Africa Hans-Peter Müller, Pinkie Mekingwe, Marvellous Mynard Mhloyi, 2013
Development has been on Africa's agenda for a long time but progress has been both varied and limited partly due to the diverse levels of the discussions on the challenges and the interventions for tackling them Africa's greatest challenge is the uneven development within and between its countries and the pressing issues of extreme poverty in southern Africa and the continent as a whole Poverty causes its victims to suffer social exclusion and political repression In addition societies that experience poverty are also mostly under continuous threat of ecological disasters and diseases This book focuses on the social and cultural dimensions of development dynamics and in particular the role of values in shaping development Values are at the core of the hopes and aspirations of individuals communities and societies The book therefore explains the values that motivate and inform African communities and societies with a view to facilitating a dialogue about sustainable development in Africa among academics intellectuals policy and decisionmakers and the communities themselves

Lonergan, Social Transformation, and Sustainable Human Development Joseph Ogbonnaya, 2013-01-29
Secular contemporary development discourse deals with the problems of societal development and transformation by prioritizing the human good in terms of vital and social values with the aim of providing the basic necessities of life through social institutions that work While such an approach is profitable by promoting economic growth it does not take note of other dynamics of social progress and development Also it fails to notice the consequences of development strategies on human flourishing well being and happiness Ogbonnaya argues for an integral approach to development by engaging in a fruitful dialogue between Bernard Lonergan's philosophical anthropology with contemporary development discourse as represented in select theories of development and in select principles of Catholic social teaching It makes a case for social progress and transformation as emanating from human understanding Also it highlights the parts of Lonergan's theory that contribute to an understanding specifically of his treatment of bias and of the shorter and longer cycles of societal decline In view of the reality of moral impotence and limitations it considers the reversal of societal decline as possible through the supernatural solution of God's grace

Development, Values, and the Meaning of Globalization: A Grassroots Approach Gasper F. Lo Biondo, S.J., Rita M. Rodriguez, 2012-01-03
Can one envision economic growth that is also sustainable because it takes into account the cultural moral and religious values of those intended to benefit from economic development To explore this question the Woodstock Theological Center launched a collaborative research effort involving 40 Jesuit centers around the world taking as its raw material the stories of specific mostly poor individuals and their communities as they were touched by economic globalization Focusing on decisions made by the individuals as they encountered the forces of the global economy the authors discern the values and creativity that

guided these decisions and derive implications for development policy The book's methodology draws on the Jesuit approach to discernment that stresses the ethical responsibility of all development actors It envisions communities partnering with other development agents such as government business and NGO's based on a better understanding of the values that drive decisions

a strategic and self defeating process The book centers on core inconsistencies in the rationale of both discourses as they stand for individual autonomy collective self determination and mutual respect Building these social goals around the requirement of non interference in individual or collective affairs neither discourse can practically enhance nor coherently sustain respect to people s freedom and diversity The author argues that any real alternative to the normative reductions and actual destructions carried on by international development theory and practice would have to recover the non contingent solidarity implied in people s search for self understanding Awareness of this human condition in its turn actively fosters relations of universal inclusion and global friendship Instructors and graduate and undergraduate students in the fields of peace studies development studies political sciences and political philosophy professionals and volunteers working in governmental and non governmental organizations and development agencies will find this volume ideally fit for purpose
