Brian Fay, 1975-01-01 *Politics and Social Theory* Will Leggett, 2017-09-16 Under present social conditions neither social theorists nor political scientists can afford to ignore one another This book is a clear structured account of the relationship between politics and social theory examining both the political content of social theory and how social theory has illuminated our understanding of politics *Social Theory and Political Practice* Christopher Lloyd, 1983-01 *Ralf Dahrendorf* Olaf Kühne, Laura Leonardi, 2020-06-27 Ralf Dahrendorf 1929 to 2009 has worked in sociology political practice and political philosophy and is associated with significant impulses in role theory and conflict theory This book presents the first synthesis of his extensive oeuvre in English Dahrendorf's political commitment was driven largely by his desire to maximize life chances thus contributing to the further development of liberalism In the tradition of Karl Popper his work in all areas was aimed at defending the open society and he saw conflicts if they were settled as being suitable in principle for contributing to social progress This book provides insights into the various methodological and theoretical aspects and critiques of Ralf Dahrendorf's work as well as his reflections on the position of sociology in the system of sciences and in relation to political practice The current crisis of liberal politics has made Dahrendorf's work more relevant than ever and this overview will be of great interest to students and researchers across sociology political science political ideologies and European integration

**Studies in Social and Political Theory (RLE Social Theory)** Anthony Giddens, 2014-08-21 The studies which comprise this book are essentially organized around a critical encounter with European social theory in its classical period i e from the middle years of the nineteenth century until the First World War and have the aim of working out some of the implications of that encounter for the position and prospects of the social sciences today The issues involved relate to the following series of problems method and epistemology social development and transformation the origins of sociology in nineteenth century social theory and the status of social science as critique In each of these areas Giddens develops views that challenge existing orthodoxies and connects these ideas to a reconstruction of social theory in the contemporary era

**Structure, Interaction and Social Theory (RLE Social Theory)** Derek Layder, 2014-08-21 A central problem in contemporary social theory is that of providing an account of social interaction that does justice both to the self monitoring capacities of the individuals involved and to the society that frames the interaction This book attempts to resolve this problem arguing for an objectivist or structuralist account which does not undervalue the importance of the indexical and negotiated aspects of interaction and which takes seriously the Marxist rationalist critique of empiricism and humanism and the associated idea that society should be treated as a supra individual preconstituted and constraining object of scientific analysis First Dr Layder pinpoints certain of the strengths and weaknesses of various schools of thought social psychology scrutinized in both its sociological and psychological forms sociology the Marxist rationalist approach Whilst rejecting the mechanistic or naively deterministic theories which are often associated with an objectivist stance he argues that the productive activities of situated actors must be understood as existing in an articulated relationship with and within sets of preconstituted contextual constraints This thesis is illustrated conceptually by the development of a framework which distinguishes two types and levels of social structure with different modes of production and reproduction and empirically by an analysis of aspects of

interaction in the occupation of acting      **Social Theory and Education** Raymond Allen Morrow, Carlos Alberto Torres, 1995-03-09 This book summarizes and critiques theories of social and cultural reproduction as they relate to sociology of education      Taking Sides in Social Research Martyn Hammersley, 2005-08-12 In the past it was generally taken for granted that the goal of social research was the production of objective knowledge and that this required a commitment to value neutrality In more recent times however both these ideals have come to be challenged and it is often argued that all research is inevitably political in its assumptions and effects In this major contribution to the debate Martyn Hammersley assesses the arguments from the classic and still influential contributions of C Wright Mills Howard Becker and Alvin Gouldner to the present day He concludes that the case for partisanship is not convincing and that an intelligent and sceptical commitment to the principles of objectivity and value neutrality must remain an essential feature of research

Praxeological Political Analysis Michael Jonas, Beate Littig, 2016-11-03 With the interest in practice theory and praxeology on the rise praxeology can be considered an emerging new methodological as well as theoretical paradigm which successfully overcomes epistemological dichotomies of conventional approaches The articles in this volume serve as starting points for rendering contemporary practice theory approaches useful for the analysis of political events and processes without reducing the political aspect a priori to the formal policy sphere In this context Praxeological Political Analysis demonstrates that praxeological research is now increasingly addressing issues which are considered virulent in for instance the consumer sustainability or political spheres Following on from this key focus on political analysis this title also seeks to expand the current status of primarily political science adaptations of practice theory approaches to the analysis of predominantly narrowly defined political practices Written with an explicit focus on diverse political aspects and dimensions in the performative enactment of social practices this title will appeal to post graduate students and scholars interested in sociology of politics social and public policy development in social theory and political research methods      **Directory of European political scientists** European Consortium for Political Research, University of Essex.
