**Advances in the Leading Paradigms of Urbanism and their Amalgamation** Simon Elias Bibri,2020-06-20 This book explores the recent advances in the leading paradigms of urbanism namely compact cities eco cities and data driven smart cities and the evolving approach to their amalgamation under the umbrella term of smart sustainable cities It addresses these advances by investigating how and to what extent the strategies of compact cities and eco cities and their merger have been enhanced and strengthened through new planning and development practices and are being supported and leveraged by the applied solutions pertaining to data driven smart cities The ultimate goal is to advance sustainability and harness its synergistic effects on multiple scales This entails developing and implementing more effective approaches to the balanced integration of the three dimensions of sustainability as well as to producing combined effects of the strategies and solutions of the prevailing approaches to urbanism that are greater than the sum of their separate effects in terms of the tripartite value of sustainability Sustainable urban development is today seen as one of the keys towards unlocking the quest for a

sustainable world And the big data revolution is set to erupt in cities throughout the world heralding an era where instrumentation datafication and computation are increasingly pervading the very fabric of cities and the spaces we live in thanks to the IoT Big data and the IoT technologies are seen as powerful forces that have tremendous potential for advancing urban sustainability Indeed they are instigating a massive change in the way sustainable cities can tackle the kind of special conundrums wicked problems and significant challenges they inherently embody as complex systems They offer a multitudinous array of innovative solutions and sophisticated approaches informed by groundbreaking research and data driven science As such they are becoming essential to the functioning of sustainable cities Besides yet knowing to what extent we are making progress towards sustainable cities is problematic adding to the fragmented conflicting picture that arises of change on the ground in the face of the escalating rate and scale of urbanization and in the light of emerging ICT and its novel applications In a nutshell new circumstances require new responses This timely and multifaceted book is intended for a wide readership As such it will appeal to researchers academics urban scientists urbanists planners designers policy makers and futurists as well as all readers interested in sustainable cities and their ongoing and future data driven transformation

*Socially Sustainable Neighbourhood Design for Children and Youth* Parisa Ziaesaeidi, 2025-09-05 Socially Sustainable Neighbourhood Design for Children and Youth explores social sustainability in neighbourhood design with a particular focus on providing practical design recommendations to improve the lives of children and youth This book provides insights from research as well as practical actionable design principles and strategies to create inclusive child and youth friendly environments that foster social connections and community engagement The book strongly emphasises how vibrant engaged communities are linked to equity and long term social and environmental sustainability It explores how children and youth perceive social sustainability and the behaviour settings that support it It outlines design principles and recommendations useful for creating spaces that prioritise their wellbeing and development both as individuals and as community members By addressing the unique needs and perspectives of young people the book empowers urban professionals to develop neighbourhoods that are socially sustainable inclusive and resilient It also touches on important topics like decolonisation post colonialism in design co design principles and democratic design approaches and evaluates how current urban planning practices impact the design of spaces for young people This book is an essential resource for urban planners designers architects and landscape professionals who are committed to designing neighbourhoods that foster social connection inclusivity and sustainable community life especially through meaningful children and youth engagement

**The Routledge International Handbook of Glocal Social Work** Panagiotis Pentaris, Janet Walker, 2025-08-25 Global challenges opportunities and developing new social phenomena have always had an impact on and change the circumstances under which social work is practised Whilst social work can take many local forms it is also a global profession which strives to advance the causes of vulnerable and marginalised people with the aim of promoting human rights and social justice In

recent years the increasing impact on social work of global processes changes and challenges has emerged This has led to increased diversity of individual community and citizen identities experiences and needs but also plurality of all these factors As a result needs have diversified even further and pose more and serious challenges that social work needs to respond to The Routledge International Handbook of Glocal Social Work emphasises glocal social work defined as the constant interplay between global issues and their local relevance and between transnational topics and practice and their local application Chapters highlight glocal social work as interwoven with an awareness of the impact of multiple structural transformations at a global level and highlight the structural mechanisms which reproduce global local inequalities and human rights and social justice aspects of sustainability It also demonstrates the importance of interdisciplinarity in glocal social work as collective responsibility with multidisciplinary multi stakeholder engagement approaches This book is divided into four parts Foundations and perspectives Local responses to global phenomena Preparing social workers for global local engagement Broader issues and future directions The range of topics discussed in this volume will enrich our understanding of and capacities in exploring the contextualisation of global phenomena and the dissemination of local learning onto global thinking This volume is a helpful reference to social work practitioners professionals in social care and welfare services social work students academics and researchers in an attempt to continuously explore new ways to respond to the challenges that glocalisation is revealing

*Emotional and social value of organizations* Virginia Barba-Sánchez, Jose Luis Retolaza, Leire San-Jose, Adrian Zicari, 2023-01-05

**Urban Regeneration and Social Sustainability** Andrea Colantonio, Tim Dixon, 2011-02-02 Urban regeneration is a key focus for public policy throughout Europe This book examines social sustainability and analyses its meaning The authors offer a comprehensive European perspective to identify best practices in sustainable urban regeneration in five major cities in Spain Italy Netherlands Germany and the UK This authoritative overview of the scholarly literature makes the book essential reading for researchers and post graduate students in sustainable development real estate geography urban studies and urban planning as well as consultants and policy advisors in urban regeneration and the built environment

Modern Management Science Practices in the Age of AI Wongmahesak, Kittisak, Phongkraphan, Nattharawee, Lekhavichit, Nuchnapa, 2024-08-26 Management has always been a multifaceted and continuously changing aspect of the business world Today with the introduction of revolutionary technology working environments and new individual attitudes it is essential to understand more information than ever A comprehensive knowledge of the interworking of accounting behavior decision making strategy data marketing and revenue management is a must for any manager to act as efficiently and effectively as possible Modern Management Science Practices in the Age of AI offers a thorough and interdisciplinary exploration of management addressing key aspects such as challenge resolution strategic planning execution and performance measurement It refines and transforms organizational operations across various sectors including public private and civil society Drawing on insights from global scholars researchers and

practitioners the volume provides a rich collection of contemporary knowledge that is invaluable for both academics and practitioners By integrating these diverse fields the book equips both researchers and organizational managers with the tools needed to adapt and thrive in a rapidly evolving environment

**Smart Sustainable Cities of the Future** Simon Elias Bibri, 2018-02-24 This book is intended to help explore the field of smart sustainable cities in its complexity heterogeneity and breadth the many faces of a topical subject of major importance for the future that encompasses so much of modern urban life in an increasingly computerized and urbanized world Indeed sustainable urban development is currently at the center of debate in light of several ICT visions becoming achievable and deployable computing paradigms and shaping the way cities will evolve in the future and thus tackle complex challenges This book integrates computer science data science complexity science sustainability science system thinking and urban planning and design As such it contains innovative computer based and data analytic research on smart sustainable cities as complex and dynamic systems It provides applied theoretical contributions fostering a better understanding of such systems and the synergistic relationships between the underlying physical and informational landscapes It offers contributions pertaining to the ongoing development of computer based and data science technologies for the processing analysis management modeling and simulation of big and context data and the associated applicability to urban systems that will advance different aspects of sustainability This book seeks to explicitly bring together the smart city and sustainable city endeavors and to focus on big data analytics and context aware computing specifically In doing so it amalgamates the design concepts and planning principles of sustainable urban forms with the novel applications of ICT of ubiquitous computing to primarily advance sustainability Its strength lies in combining big data and context aware technologies and their novel applications for the sheer purpose of harnessing and leveraging the disruptive and synergetic effects of ICT on forms of city planning that are required for future forms of sustainable development This is because the effects of such technologies reinforce one another as to their efforts for transforming urban life in a sustainable way by integrating data centric and context aware solutions for enhancing urban systems and facilitating coordination among urban domains This timely and comprehensive book is aimed at a wide audience across science academia industry and policymaking It provides the necessary material to inform relevant research communities of the state of the art research and the latest development in the area of smart sustainable urban development as well as a valuable reference for planners designers strategists and ICT experts who are working towards the development and implementation of smart sustainable cities based on big data analytics and context aware computing

**Environmental Social Governance** Karlheinz Spitz, John Trudinger, Matthew Orr, 2022-03-27 Increasingly companies are being judged by their performance in terms of Environmental Social Governance ESG But exactly what does it mean and what should be done about it While much ambiguity exists it is no longer sufficient to negotiate the environmental assessment process successfully ESG is an ongoing process that spans the entire life cycle of a company and its operations This book is aimed at business leaders senior

executives and company directors and particularly those involved in the extractive industries and other ventures that significantly affect the environment and host communities Guidance is provided on the major ESG issues that confront all business leaders Strategies are provided to address ESG risk and to handle crises when they occur QUESTIONS FOR BUSINESS LEADERS Are you at all prepared for an environmental or social crisis event How will you cope with the unknown unknowns What do your shareholders expect you to do about climate change Are your employees proud of the company s ESG performance How does your bank evaluate your biodiversity impacts

Big Data Science and Analytics for Smart Sustainable Urbanism Simon Elias Bibri,2019-05-30 We are living at the dawn of what has been termed the fourth paradigm of science a scientific revolution that is marked by both the emergence of big data science and analytics and by the increasing adoption of the underlying technologies in scientific and scholarly research practices Everything about science development or knowledge production is fundamentally changing thanks to the ever increasing deluge of data This is the primary fuel of the new age which powerful computational processes or analytics algorithms are using to generate valuable knowledge for enhanced decision making and deep insights pertaining to a wide variety of practical uses and applications This book addresses the complex interplay of the scientific technological and social dimensions of the city and what it entails in terms of the systemic implications for smart sustainable urbanism In concrete terms it explores the interdisciplinary and transdisciplinary field of smart sustainable urbanism and the unprecedented paradigmatic shifts and practical advances it is undergoing in light of big data science and analytics This new era of science and technology embodies an unprecedentedly transformative and constitutive power manifested not only in the form of revolutionizing science and transforming knowledge but also in advancing social practices producing new discourses catalyzing major shifts and fostering societal transitions Of particular relevance it is instigating a massive change in the way both smart cities and sustainable cities are studied and understood and in how they are planned designed operated managed and governed in the face of urbanization This relates to what has been dubbed data driven smart sustainable urbanism an emerging approach based on a computational understanding of city systems and processes that reduces urban life to logical and algorithmic rules and procedures while also harnessing urban big data to provide a more holisticand integrated view or synoptic intelligence of the city This is increasingly being directed towards improving advancing and maintaining the contribution of both sustainable cities and smart cities to the goals of sustainable development This timely and multifaceted book is aimed at a broad readership As such it will appeal to urban scientists data scientists urbanists planners engineers designers policymakers philosophers of science and futurists as well as all readers interested in an overview of the pivotal role of big data science and analytics in advancing every academic discipline and social practice concerned with data intensive science and its application particularly in relation to sustainability

*Theory and Practice in Heritage and Sustainability* Elizabeth Auclair,Graham Fairclough,2015-04-22 This book explores cultural sustainability and its relationships to heritage from a wide

interdisciplinary perspective By examining the interactions between people and communities in the places where they live it exemplifies the diverse ways in which a people centred heritage builds identities and supports individual and collective memories It encourages a view of heritage as a process that contributes through cultural sustainability to human well being and socially and culturally sensitive policy With theoretically informed case studies from leading researchers the book addresses both concepts and practice in a range of places and contexts including landscape townscape museums industrial sites every day heritage ordinary places and the local scene and even UNESCO designated sites The contributors most of whom like the editors were members of the COST Action Investigating Cultural Sustainability demonstrate in a cohesive way how the cultural values that people attach to place are enmeshed with issues of memory identity and aspiration and how they therefore stand at the centre of sustainability discourse and practice The cases are drawn from many parts of Europe but notably from the Baltic and central and south eastern Europe regions with distinctive recent histories and cultural approaches and heritage discourses that offer less well known but transferable insights They all illustrate the contribution that dealing with the inheritance of the past can make to a full cultural engagement with sustainable development The book provides an introductory framework to guide readers and a concluding section that draws on the case studies to emphasise their transferability and specificity and to outline the potential contribution of the examples to future research practice and policy in cultural sustainability This is a unique offering for postgraduate students researchers and professionals interested in heritage management governance and community participation and cultural sustainability

**Social Innovations in Urban Sanitation in India** Shubhagato Dasgupta,Kaustuv Kanti Bandyopadhyay,Anju Dwivedi,Sumona Das Gupta,Ms Bharti,2023-04-25 This book discusses effective social innovation strategies facilitated by civil society organisations CSOs to tackle India s significant urban sanitation challenge It presents the contours of an ecosystem that includes citizen participation and strengthening community managed systems for improved sanitation and public health The book analyses case studies of effective sanitation programmes as well as experiments with innovative ideas in different regional contexts by CSOs to meet the contextual needs of the community and to ensure access to safe sanitation especially among the urban poor It highlights the challenges and the need for active participation of communities for change in behaviour increasing institutional capacities of municipalities for standardising and scaling up strategies which work The authors highlight the need for designing low cost solutions organising informal sanitation workers serving marginalised communities and building effective alliances between communities and institutions to influence public policy Rich in empirical data this book will be useful for scholars and researchers of urban studies public policy governance political science development studies and sociology as well as for CSOs and non governmental organisations NGOs working on urban sanitation urban planning and public policy

The City as Fulcrum of Global Sustainability Ernest J. Yanarella,Richard S. Levine,2011 This book responds to the some of the twenty first century s most assuming problems of our times global warming sub national terrorism natural

resource depletion and economic environmental and financial crises It finds short and long term solutions to these global woes by looking to the city as the fulcrum for introducing sustainability around the world Beginning with an outline of a robust strategy of sustainable cities or sustainable city regions that has emerged out of over two and a half decades of theoretical and practical work the authors show why these portentous problems can best be addressed at the local regional scale In the process this book cuts through the received wisdom and popular misunderstandings about sustainability and peels away the conceptual fog and ideological confusion about the meaning of sustainability Drawing upon extensive fieldwork in North America Europe and Asia the authors examine both strong and weak examples of sustainable city approaches that validate their distinctive urban sustainability strategy They discover keen insights and important lessons in these case studies for sustainability practice across the globe whether in small towns in the US and Canada large cities in Europe or tiny Chinese villages in Asia Their concluding chapter argues that only the road less travelled holds real promise of creating sustainable city regions around the world guided by the toolkit of ecological and technological conviviality
