

SOCIOLOGICAL PARADIGMS

Sociological paradigms are the broad schools of thought in sociology. The three key sociological paradigms are functionalism, conflict theory, and symbolic interactionism.

1. FUNCTIONALISM

Argues that social stability is a prerequisite for a healthy and strong society. Social institutions contribute towards social stability. Abrupt social change imperils social order.

2. CONFLICT THEORY

Argues that society is built upon enduring inequality on the basis of social class, gender, race etc. Structural social change is required to create an egalitarian society.

3. SYMBOLIC INTERACTIONISM

Argues that we construct society through a range of symbols (e.g., words, gestures) and social interactions. People make up their roles as they interact.

Sociological Theory and Philosophical Analysis Dorothy Emmet, Alasdair MacIntyre, 1972 *Sociological Theory and Philosophical Analysis* Dorothy Mary Emmet, Alasdair C. MacIntyre, 1972 Sociological Theory and Philosophical Analysis Dorothy Mary Emmet, 1970 Sociological theory and philosophical analysis: a collection, ed Alasdair C. MacIntyre, Sociological Theory and Philosophical Analysis Alasdair C. MacIntyre, 1970 *Sociological Theory and Philosophical Analysis. A Collection Ed. with an Introd. by D. Emmet and A. MacIntyre. [With Contribs of A. Schutz, S. Morgenbesser, J. Habermas A.o.]* D. Emmet, Alasdair C. MacIntyre, A. Schutz, S. Morgenbesser, Jürgen Habermas, 1970 Sociological Theory in Use (RLE Social Theory) Kenneth Menzies, 2014-08-21 Central to most sociologists self image is the claim that their theories are based on research However using a random sample of 680 articles appearing in major American British and Canadian journals Dr Menzies shows that in some areas of sociology the wide gap between theory and research means that much of sociological theory is virtually untested He explains how theory is embodied in eight particular types of research critically examines these research theories and contrasts them with the positions of modern theorists The sample of journal articles also permits a comparison of British American and Canadian sociology By contrasting on how researchers use theories Dr Menzies is able to reassess several theories For instance symbolic interactionist research uses embedded causal claims and stands in a dialectical relationship to other sociological research while the research version of conflict theory depends on external causes to explain social change The implications of using statistical techniques like factor analysis and regression are also considered in relation to the form of explanation Talcott Parsons and the Conceptual Dilemma (RLE Social Theory) Hans Adriaansens, 2014-08-21 This systematic analysis of the nature and development of Talcott Parson s theory of action offers first an introduction to the conceptual paradigm upon which this theory is based an introduction that is which will make Parson s writing more easily accessible Second the book gives an explanation of the development which the action theory has undergone during the half century of Parson s career Using a scheme of four theory levels the author indicates the crucial premises that can be distilled from Parson s early works He argues that Parsons from the very start of his career was trying to translate abstract premises into a systematically constructed conceptual scheme The first conceptual translation however turned out to be vague and inconsistent in many respects and this study offers a very specific explanation of the inadequacy of this first structural functional version of the theory of action Dr Adriaansens argues that it was not until Parsons had found his way out of this conceptual dilemma that the premises of the action theory could be adequately translated into a conceptual paradigm False Moves in Philosophy and Social Theory Patrick Murray, Jeanne Schuler, 2023-09-12 This book considers diverse philosophical topics unified by the identification of false moves commonly found in modern philosophy mainstream Anglo American philosophy and social theory The authors expose the sources of fundamental problems that recur in philosophy basic problems with what the authors call factoring philosophy Factoring

philosophy fails to attend to the phenomenological task of determining when what is distinguishable is separable and when not. Consequently, factoring philosophy makes phenomenological mistakes: false moves when it treats as separable what is only distinguishable. Analytic philosophy is prone to false moves when it fails to recognize that phenomenology is the necessary complement to analysis. There is nothing wrong with analysis; we might as well give up thinking as give up analysis, and nothing is wrong with the values prized by analytic philosophy. As Hegel observed, philosophizing requires above all that each thought should be grasped in its full precision and that nothing should remain vague and indeterminate. Ultimately, this book contends that false moves prevail in philosophical analysis and social theory when they neglect their phenomenological foundations.

Conversation Analysis and Sociological Theory Melisa Stevanovic, David Inglis, Anssi Peräkylä, Emmi Koskinen, 2024-08-22. The relations between Conversation Analysis (CA), sociology, and social theory are complex, often ambiguous, and have sometimes been rather fraught. While there might be some relatively high level of agreement amongst their practitioners on what CA is, what it does, and what it is meant to achieve, that is not so much the case for the more open and broad terrains of sociology and social theory. Moreover, each of the domains in question has changed in orientation, composition, and academic location since CA first came into existence in the late 1960s. While initially a child of sociology, as CA has matured and extended its substantive and methodological reach, it has become a large intellectual domain in its own right with inputs from and relevance for a host of other disciplines, notably linguistics, anthropology, and psychology. It is now no longer at all clear how CA relates to sociology and social theory, what each side currently does, or what it could bring to the other in the future.

Marx and Mead (RLE Social Theory) Tom W. Goff, 2014-08-13. It has often been suggested that a resolution of issues generated by the sociological study of ideas might be reached through a synthesis of specific insights to be found in the works of Karl Marx and George Herbert Mead. The present study originated in an investigation of this hypothesis, particularly as it bears on the central issue of sociological relativism. The author began by delineating the specific problems such a synthesis might resolve and in the process became aware that the nature and depth of differences separating the sociology of knowledge and its critics have never been fully analysed or understood. This volume therefore opens with a clarification of these differences, a clarification which leads to considerable redefinition of the problem as it has traditionally been understood by critics and proponents of the discipline alike. The author points out in particular that it is less a debate than a thoroughgoing contradiction which characterizes the literature dealing with the inadequacies of various formulations of the sociology of knowledge. In consequence, the study of Marx and Mead presented here is not simply yet another effort to discover a perspective which will satisfy the particular demands of the critics. Rather, it argues that an adequate perspective, fully consistent with the central insight of the discipline—that knowledge is radically social in character—is to be found in a synthesis of elements in the perspectives of Marx and Mead.

The Normative Structure of Sociology (RLE Social Theory) Hermann Strasser, 2014-08-13. In this provocative analysis of the central issues and developments in

modern social theory Dr Strasser contends that enquiry into the function tasks and mission of sociology as a discipline can be understood only in relation to the subject's historical development He believes that a discussion of the origin and intention of sociology particularly in relation to the established social order enables us to grasp fully the nature of sociological theory both past and present He maintains that a sociologist's own position in society and consequently his views on its development and his way of expressing those views will affect the theoretical position he takes up

Structure, Interaction and Social Theory (RLE Social Theory) Derek Layder, 2014-08-21 A central problem in contemporary social theory is that of providing an account of social interaction that does justice both to the self-monitoring capacities of the individuals involved and to the society that frames the interaction This book attempts to resolve this problem arguing for an objectivist or structuralist account which does not undervalue the importance of the indexical and negotiated aspects of interaction and which takes seriously the Marxist rationalist critique of empiricism and humanism and the associated idea that society should be treated as a supra-individual preconstituted and constraining object of scientific analysis First Dr Layder pinpoints certain of the strengths and weaknesses of various schools of thought social psychology scrutinized in both its sociological and psychological forms sociology the Marxist rationalist approach Whilst rejecting the mechanistic or naively deterministic theories which are often associated with an objectivist stance he argues that the productive activities of situated actors must be understood as existing in an articulated relationship with and within sets of preconstituted contextual constraints This thesis is illustrated conceptually by the development of a framework which distinguishes two types and levels of social structure with different modes of production and reproduction and empirically by an analysis of aspects of interaction in the occupation of acting

New Philosophies of Social Science: Realism, Hermeneutics and Critical Theory William Outhwaite, 1987-12-08 The demise of empiricist philosophies of science has contributed to the current disarray of philosophy in the social sciences This book argues that a realist analysis of the structures and processes which make up the social world can provide a way out of its present impasse These processes ranging from the interpersonal negotiation of meaning to the constraining influence of administrative or market structures cannot be understood as mere constructs either in the minds of the theorist or of the social factors themselves since they actually generate the social world as we know it The author develops some implications of this approach and presents a realist view of some of the principal theoretical traditions and controversies within sociology and other social sciences

Sociology, Phenomenology and Marxian Analysis Barry Smart, 2013-10-15 Sociology is an established academic discipline but there has been continuing debate over its status as a science and the nature of its subject matter This led to the emergence of a phenomenological sociology and to critiques of positivist sociology This critical reappraisal of the relevance of Marxian analysis for a science of society shows how these developments within sociology have had their counterpart in Marxism The author analyses the status of Marx's work and the Marxist tradition in sociology He focuses upon those concerns which are common to both Marxian analysis and sociology the

Christians, Mark Fackler, Peggy J. Kreshel, Kathy Brittain Richardson, 2020-03-26 Media Ethics Cases and Moral Reasoning challenges readers to think analytically about ethical situations in mass communication through original case studies and commentaries about real life media experiences This text provides a comprehensive introduction to the theoretical principles of ethical philosophies facilitating ethical awareness It introduces the Potter Box with its four dimensions of moral analysis to provide a framework for exploring the steps in moral reasoning and analyzing the cases Focusing on a wide spectrum of ethical issues faced by media practitioners the cases in this Eleventh Edition include the most recent issues in journalism broadcasting advertising public relations and entertainment Cases touch on issues and places worldwide from Al Jazeera to the Xinhua News Agency from Nigerian brown envelopes to PR professional standards in South Africa Racially divisive language comes up in different communication contexts as does celebrity influence on culture A core textbook for classes in media ethics communication

ethics and ethics in journalism public relations and advertising **Science and the Sociology of Knowledge (RLE Social Theory)** Michael Mulkay, 2014-08-07 How far is scientific knowledge a product of social life In addressing this question the major contributors to the sociology of knowledge have agreed that the conclusions of science are dependent on social action only in a very special and limited sense In Science and the Sociology of Knowledge Michael Mulkay's first aim is to identify the philosophical assumptions which have led to this view of science as special and to present a systematic critique of the standard philosophical account of science showing that there are no valid epistemological grounds for excluding scientific knowledge from the scope of sociological analysis The rest of the book is devoted to developing a preliminary interpretation of the social creation of scientific knowledge The processes of knowledge creation are delineated through a close examination of recent case studies of scientific developments Dr Mulkay argues that knowledge is produced by means of negotiation the outcome of which depends on the participants use of social as well as technical resources The analysis also shows how cultural resources are taken over from the broader social milieu and incorporated into the body of certified knowledge and how in the political context of society at large scientists technical as well as social claims are conditioned and affected by their social position Knowledge and Politics (RLE Social Theory) Volker Meja, Nico Stehr, 2014-08-13 Karl Mannheim's Ideology and Utopia has been a profoundly provocative book The debate about politics and social knowledge that was spawned by its original publication in 1929 attracted the most promising younger scholars some of whom shaped the thought of several generations The book became a focus for a debate on the methodological and epistemological problems confronting German social science More than thirty major papers were published in response to Mannheim's text Writers such as Hannah Arendt Ernst Robert Curtius Max Horkheimer Herbert Marcuse Helmuth Plessner Hans Speier and Paul Tillich were among the contributors Their positions varied from seeing in the sociology of knowledge a sophisticated reformulation of the materialist conception of history to linking its popularity to a betrayal of Marxism The English publication in 1936 defined formative issues for two generations of sociological self reflection Knowledge and Politics provides an introduction to the dispute and reproduces the leading contributions It sheds new light on one of the greatest controversies that have marked German social science in the past hundred years
