**Race Sounds** Nicole Brittingham Furlonge, 2018-05-15 We live in a world of talk Yet Race Sounds argues that we need to listen more not just hear things but actively listen particularly in relation to how we engage race gender and class differences Forging new ideas about the relationship between race and sound Furlonge explores how black artists including well known figures such as writers Ralph Ellison and Zora Neale Hurston and singers Bettye LaVette and Aretha Franklin among others imagine listening Drawing from a multimedia archive Furlonge examines how many of the texts call on readers to listen in print In the process she gives us a new way to read and interpret these canonical aurally inflected texts and demonstrates how listening allows us to engage with the sonic lives of difference as readers thinkers and citizens Intervening in discourses of African American and black feminist literatures where sound and voice dominate Furlonge shifts our attention to listening as an aural strategy of cultural social and civic engagement that not only enlivens how we read write and critique texts but also informs how we might be more effective audiences for each other and against injustice in our midst The result is a fascinating examination that brings new insights to African American literature and art American literature democratic philosophy and sound studies

Experiencing Gigli with Quality Audio Paul James, 2021-08-03 Music is a foundational language of being human The singing voice can speak and depict the human condition with great expressiveness and plays a hugely important role in music However scant attention has been paid to vocal reproduction in hi fidelity reproduction of music Despite his huge profile as an opera singer now many years after his passing Beniamino Gigli has been overlooked by many These two themes intersect as no artist no longer living can be better recognised than being brought back to life by playing their music Yet with a singing voice as remarkable as Gigli s no ordinary attempt at audio reproduction will do it justice Not only does this book explore and explain what is involved in the hi fidelity reproduction of the voice it also discusses why Gigli s singing is special and is still relevant in our musical era His music highlights in stark relief changes that have happened in the recording and playback of music In addition while changes to listening practices have been well studied the implications for the experience of music have not As Ernest Hemmingway said most people never listen Listening is an art choice and gift Through Gigli this book also provides insights into the value of thoughtful listening Listening begins and ends with and is inseparable from patience When we make the time music can give us a glimpse of something beyond the horizons of materialism or our contemporary values
