Sources Of Conflict In The 21st Century Regional Futures And U S Strategy:

Sources of Conflict in the 21st Century Zalmay Khalilzad, Ian O. Lesser, Project Air Force (U.S.), 1998 How will the world change in the next century **Sources of Conflict in the 21st Century; Regional Futures and U.S. Strategy**, 1998 This book brings together three regional security assessments along with an overview of global trends in the strategic environment Each of the regional assessments covering Asia the greater Middle East and Europe and the former Soviet Union examines key trends and potential sources of conflict through the year 2025 and identifies the implications for the U S Air Force and for U S national security policy more broadly The chapters in this volume reflect research undertaken in 1996 for a study on Sources of Conflict and Their Implications for Air Force Operations conducted within the Strategy and Doctrine Program of RAND s Project AIR FORCE The study sponsored by the Deputy Chief of Staff Plans and Operations was intended to serve Air Force long range planning needs The findings are also relevant to broader ongoing debates within the Department of Defense and elsewhere especially in the context of the Quadrennial Defense Review Our analyses and conclusions should be of interest to a wide foreign and security policy audience **U.S. Army War College Guide to Strategy**, The Twenty-First Century: The World Without Russia Олег Арин/Алекс Бэттлер, In this book Alex Battler questions the assertion of Russia s status as a great power in the acuminate form The author reveals the contradictions between Russia s real modern potential and its foreign policy objectives formulated by official Moscow The author has formulated laws on the Pole the Center of Power and Force Battler introduces some new concepts of the Theory of International Relations The Foreign Policy Potential of the State and The Law on the Optimal Balance Between the Costs of Domestic and Foreign Policy On almost all problems raised by the author his views do not coincide with generally accepted interpretations and approaches The second extended edition of the book The Twenty First Century The World Without Russia includes updated copyright and newly added parts and paragraphs *European Security* Bjørn Møller, 2016-04-22 Europe has undergone quite profound changes since the end of the Cold War Having been a highly militarised conflict ridden and war ridden region the core of Europe today constitutes a security community where armed conflicts among the constituent states has become inconceivable This comprehensive book offers a theoretically founded and thoroughly documented analysis of European security with a special emphasis on the role played by the United Nations and the various regional and sub regional organisations especially the North Atlantic Treaty Organisation the Organisation for Security and Cooperation in Europe the Council of Europe and the European Union When it comes to explaining peace in Europe opinions differ widely Some argue that it was only because the West refused to give in to Soviet threats that the latter eventually gave up or that the long peace in Europe was due to the combination of a bipolar alliance structure pitting the North Atlantic Treaty Organisation NATO against the Warsaw Pact with the presence of nuclear weapons on both sides Others point instead to the extraordinarily dense network of international institutions and organisations in Europe offering a wide panoply of fora in

which to handle disputes peacefully or to the web of interdependence in economic and other affairs tying together all states in Europe in relations which militate strongly against war Still others believe that the external peace between the states in Europe is simply a reflection of a convergence of cultures democracies with marked economies that are open towards the world market These questions are the focal point of this book which concentrates on security albeit not in the sense of being a treatise on military matters but security obtainable by much more indirect and non military means It will be required reading for all students and scholars of European security and the organisations which underpin it The Greek-Turkish Relationship and NATO Dr Fotios Moustakis,2004-11-23 This publication shows that the Eastern Mediterranean having been transformed from a region of secondary importance during the Cold War to one of greater importance for the western interests in the post Cold War era is in a state of flux Despite sporadic periods of rapprochement tensions between Greece and Turkey still exist Therefore one must question the grounds behind the lack of normal relations that exist between these two NATO members and its effects on the NATO organisation as a whole Hence this volume has two purposes first to examine Greek and Turkish foreign security and defence policies during and after the post Cold War period and second to investigate why these policies have been formulated **Unconquerable Nation** Brian Michael Jenkins,2006 The author presents a clear sighted and sobering analysis of where we are today in the struggle against terrorism Jenkins an internationally renowned authority on terrorism distills the jihadists operational code and outlines a pragmatic but principled approach to defeating the terrorist enterprise We need to build upon our traditions of determination and self reliance he argues and above all preserve our commitment to American values **Small State Security Dilemma: Kuwait after 1991** Radhika Lakshminarayanan,2019-12-31 The Arabian Gulf region is a vulnerable flashpoint Small states in this region try to leverage their core interests against big power domination This book narrates the problematique of Kuwait whose geostrategic weakness was exposed in 1990 forcing her to trade resource strength for security guarantees In recent years challenged by regional rivalries environmental impacts falling oil prices and the dangers of terrorist insurgency Kuwait faces an escalating security dilemma With the imminent disengagement of the U S from Middle Eastern entanglements should Kuwait resort to hedging partnerships with emerging multipolar giants like China Russia or India Can Kuwait survive domestic challenges of a youth bulge a huge expatriate population budgetary deficits increasing public welfare and costs of desalination What would be the main security options for Kuwait in a world that is increasingly volatile uncertain complex and ambiguous **QDR 2001: Strategy-Driven Choices for America's Security** , **Politics of Terrorism** Andrew T .H. Tan,2010-10-18 This concise guide to the politics of terrorism provides a unique selection of resources on this important topic **Conflict in the Former USSR** Matthew Sussex,2012-10-04 This book examines a major concern in international security the nature and causes of conflict in the former Soviet Union *The Coming Democracy* Ann Florini,2013-04-10 National governments are proving ill equipped to manage an increasingly complicated suite of global problems from

infectious diseases to climate change to conflicts over international trade In *The Coming Democracy* leading political analyst Ann Florini sets forth a compelling new paradigm for transnational governance one based on the concept of transparency the idea that the free flow of information on topics ranging from corporate and government behavior to nuclear proliferation to biodiversity protection provides powerful ways to hold decision makers accountable and to give ordinary people meaningful voice in shaping the policies that affect them Dramatic breakthroughs in information technology of the past decade have made such transparency possible on a global scale Florini offers a clear and comprehensive assessment of the possibilities for using transparency to develop effective approaches to transnational governance She shows how this new form of governance promises real hope for managing global problems and provides a compelling scenario that demonstrates how existing conventions and institutions can lead the way in the evolution of a better system of global governance *Dawn of a New Order* Rein Mullerson, 2017-06-30 The most significant development in global politics following the end of the bi polar Cold War era has been the rise of a multi polar state system This has led to the emergence of major potential super powers global rivalry international terrorism and the gradual weakening of the one remaining hegemonic uni polar state after the Cold War the US The idealistic hopes following the collapse of communism have evaporated and Cold War competition between liberal capitalism and communism has been replaced by multi polar global rivalry that can only be resolved by a balance of power buttressed by international law In this ambitious and thought provoking book Professor Rein Mullerson outlines the challenges associated with the new geopolitics of the twenty first century Based on in depth research over several decades it is an essential tool for understanding the new world order and the ensuing crises in global politics **Globalization and Environmental Challenges** Hans Günter Brauch, Úrsula Oswald Spring, Czeslaw Mesjasz, John Grin, Pál Dunay, Navnita Chadha Behera, Béchir Chourou, Patricia Kameri-Mbote, P. H. Liotta, 2008-01-23 Put quite simply the twin impacts of globalization and environmental degradation pose new security dangers and concerns In this new work on global security thinking 91 authors from five continents and many disciplines from science and practice assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization as well as the multifarious impacts of global environmental change in the early 21st century *Evaluation of Options for Overseas Combat Support Basing* Mahyar A. Amouzegar, 2006 The ability of U S forces to provide swift and tailored responses to a multitude of threats across the globe is a crucial component of security in today s complex political environment To realize its goals of global strike and persistent dominance it is vital that the Air Force support the warfighter seamlessly and efficiently in all phases of deployment employment and redeployment One of the major pillars for achieving these objectives is a global combat support basing architecture This report presents an analytic framework and model for evaluating options for overseas combat support basing The authors develop several sets of deployment scenarios to measure the effect of timing location and intensity of operational requirements on combat support and to account for the inherent uncertainties in future planning They apply

political geographical and vulnerability constraints to the model and present a feasible set of candidate locations for consideration by the Air Force *Strengthening the Partnership* Bruce Pirnie,2000 Many humanitarian interventions led and supported by the United States go beyond simple disaster relief and include such difficult tasks as protecting refugees securing humanitarian aid and restoring civil order The U S Air Force often plays an important role in such complex contingency operations This book explores how the military might improve coordination with relief agencies and with European allies in such operations It examines the dynamics of complex contingency operations provides an overview of the relief community delineates barriers to better cooperation discusses the European contribution and recommends steps the military might take to improve coordination in future crises Steps include improving military familiarization with key relief organizations perhaps appointing a humanitarian advisor establishing more centers of excellence and bringing relief organizations into the planning process The military should encourage information sharing with relief organizations improve procedures for managing the flow of aid and leverage European capabilities **Air Force Magazine** ,1998 *Comparative Perspectives on Refugee Youth Education* Alexander W. Wiseman,Lisa Damaschke-Deitrick,Ericka L. Galegher,Maureen F. Park,2019-05-22 This volume explores the shared expectations that education is a panacea for the difficulties that refugees and their receiving countries face This book investigates the ways in which education is both a dream solution as well as a contested landscape for refugee families and students Using comparative cross national perspectives across five continents the editors and contributors critically analyze the educational structures policies and practices intended to support refugee youth transition from conflict and post conflict zones to mainstream classrooms and schools in their new communities
