An Index to Anglo-American Psalmody in Modern Critical Editions Karl Kroeger, Marie Kroeger, 2000-01-01 **Sources and Composition of Ambient Particulate Matter** Manousos-Ioannis Manousakas, 2021-09-10 Research related to ambient particulate matter PM remains very relevant today due to the adverse effects that PM have on human health PM are pollutants with varying chemical compositions and may originate from multiple emission sources which directly affects their toxicity To formulate effective control and mitigation strategies it is necessary to identify PM sources and to estimate their influence on ambient PM concentration a process that is known as source apportionment SA Depending on the geographical location and characteristics of an area many anthropogenic and natural sources may contribute to PM concentration levels such as dust resuspension sea salt traffic secondary aerosol formation industrial emissions ship emissions biomass burning power plant emissions etc Different methodological approaches have been used over the years to study the aforementioned topics but some scientific challenges remain mainly related to the following subjects real time chemical analysis and SA uncertainty estimation of SA results and analytical optimization for PM samples Additionally there are areas in the world for which the results regarding composition and sources of PM are still scarce The objective of this collection was to include studies on all aspects of PM chemical characterization and source apportionment regarding the inorganic and or organic fractions of PM **The Educator's Handbook for Teaching With Primary Sources** Scott M. Waring, 2023 Educators across subject areas are striving to integrate primary sources into their pedagogy and teaching Yet despite their importance to authentic disciplined inquiry the implementation of primary source activities in the pre K 12 classroom has been limited This lack of utilization can largely be attributed to the perception that these activities are too complex to design implement and grade Many teachers also feel that primary source analysis and the construction of evidence based narratives is too difficult for students to complete in the traditional classroom Waring argues that this is not the case and with this handbook provides teacher candidates and inservice teachers with detailed and specific perspectives activities approaches and resources to help them effectively and authentically use primary sources in their classrooms Book Features Introduces teaching with primary sources including detailed examples of authentic and tested instructional ideas and approaches Designed to meet the needs of classroom teachers and teacher candidates in social studies English and language arts mathematics science and other fields Offers dozens of primary sources and links to resources throughout the book Aligns to national standards frameworks and the C3 framework for social studies Can be used to meet the needs of emerging English learners and students with special needs Focuses on ways in which educators are utilizing a variety of emerging technologies to engage students in deeper and more authentic ways of learning Contributors include Peter DeCraene Lisa Fink Eric J Pyle Stefanie R Wager Sarah Westbrook and Trena L Wilkerson **What's Fair?** Robert H. Giles, Robert W. Snyder, What s fair It is an old question in journalism In 1999 it seems more difficult to answer than ever The cycle of story spin and counterspin

that surrounds the White House is only the most obvious part of the problem In the past 25 years the practice of journalism has changed enormously particularly in the United States The demarcation of public and private life that once ruled certain kinds of stories out of bounds has eroded leaving reporters with the unenviable challenge of having to cover events whose seaminess inevitably taints all who touch them Commercial pressures and a tidal wave of information and entertainment media have engulfed the news business leaving the definitions of journalism and journalistic standards vague and uncertain And the technology of news reporting is speeding up news cycles in ways that leave little time for sober and measured judgments What's Fair is a collection of essays from experts in the field that are sure to spark compelling questions and ideas about journalism and its place in our time In Fairness A Struggle journalists explore a subject that they normally share only with close friends and colleagues their own struggles with fairness that occurred in places as different as South Africa Washington and the South Bronx In Fairness A History nine contributors examine the history of the fairness question specifically the establishment of the Hutchins Commission report of 1947 which is evaluated here by a historian a journalist and a First Amendment authority In a comparative vein two authorities on international communications law examine British regulations for fairness in broadcasting at the end of the 20th century In Fairness A Goal contributors explore what struggles for fairness mean in a variety of contexts from American newsrooms to post Communist Poland to Northern Ireland Many discussions of fairness are either numbingly abstract or impossibly righteous To avoid those hazards Robert Giles and Robert Snyder have grounded this volume in stories the kind of stories journalists tell each other and the kind of stories people tell about journalism This volume is a testament to journalism that is free yet fair probing yet credible and authoritative in content yet open to many voices Robert Giles is editor in chief of Media Studies Journal senior vice president of the Freedom Forum and executive director of Media Studies Center Formerly the editor and publisher of The Detroit News he is the author of Newsroom Management A Guide to Theory and Practice Robert W Snyder is editor of the Media Studies Journal a historian and most recently author of Transit Talk New York's Bus and Subway Workers Tell Their Stories He has taught at Princeton University and New York University from which he holds a doctorate in history
