The Publishers' Circular and Booksellers' Record, 1911 *History and Material Culture* Karen Harvey, 2017-09-18 Sources are the raw material of History but whereas the written word has traditionally been seen as the principal source, historians now recognize the value of sources beyond text. In this new edition of *History and Material Culture*, contributors consider a range of objects from an eighteenth-century bed curtain to a twenty-first-century shopping trolley which can help historians develop new interpretations and new knowledge about the past. Containing two new chapters on healing objects in East Africa and the shopping trolley in the social world, this book examines a variety of material sources from around the globe and across centuries to assess how such sources can be used to study the distant and the recent past. In a revised introduction, Karen Harvey discusses some of the principal issues raised when historians use material culture, particularly in the context of the material turn, and suggests some initial steps for those unfamiliar with these kinds of sources. While the sources are discussed from interdisciplinary perspectives, the emphasis of the book is on what historians stand to gain from using material culture as well as what historians have to offer the broader study of material culture. Clearly written and accessible, this book is the ideal introduction to the opportunities and challenges of researching material culture and is essential reading for all students of historical theory and method. **The United States Catalog** Mary Burnham, Carol Hurd, 1928 **Chambers's encyclopædia** Chambers W. and R., Ltd, 1901 American Book Publishing Record, 2002

Architecture in the United States, 1800-1850 William Barksdale Maynard, 2002-01-01 This study traces the development of American architecture from the age of Jefferson to the antebellum era, providing a survey of this important period. W Barksdale Maynard overturns the long-accepted notions that the chief theme of early 19th-century American architecture was a patriotic desire to escape from European influence and that competing styles chiefly reflected the American struggle for cultural uniqueness. Instead, deep and consistent aesthetic ties, especially with England, shaped American architecture and house designs. Maynard shows that the Greek Revival, in particular, was an international phenomenon with American

achievements inspired by British example and with taste taking precedence over patriotism
