South Africa The Political Economy Of Transition:

South Africa: Limits To Change Hein Marais, 2001-09-08 Drawing on the rich structural and political understandings of radical South African intellectuals this book explains why the South African government has been unable to breach the boundaries of change erected by the privileged classes It reveals why it has adopted conservative economic policies and why the country's popular movement has failed to press home more radical opinions Hein Marais compellingly probes the hidden dynamics of South Africa's transition arguing that the democratic breakthrough was much less open ended than generally believed South Africa : Limits to Change ,1998 **The Political Economy of Transition in South Africa** Jeffrey Ira Herbst, 1993* *The Political Economy of South Africa's Transition* Jonathan Michie, Vishnu Padayachee, 1997 The Political Economy of South Africa's Transition provides the basis for a critical examination of the recent history and politics of the process of economic policy formulation in South Africa **South Africa Pushed to the Limit** Hein Marais, 2013-07-04 Since 1994 the democratic government in South Africa has worked hard at improving the lives of the black majority yet close to half the population lives in poverty jobs are scarce and the country is more unequal than ever For millions the colour of people's skin still decides their destiny In his wide ranging incisive and provocative analysis Hein Marais shows that although the legacies of apartheid and colonialism weigh heavy many of the strategic choices made since the early 1990s have compounded those handicaps Marais explains why those choices were made where they went awry and why South Africa's vaunted formations of the left old and new have failed to prevent or alter them From the real reasons behind President Jacob Zuma's rise and the purging of his predecessor Thabo Mbeki to a devastating critique of the country's continuing AIDS crisis its economic path and its approach to the rights and entitlements of citizens South Africa Pushed to the Limit presents a riveting benchmark analysis of the incomplete journey beyond apartheid **The Political Economy of South Africa's Post-apartheid Transition** Benjamin Fine, 2025-05-26 South Africa's post apartheid transition has proven disastrous It is marked by the emergence of a black elite of enriched capitalists out of the globalisation neoliberalisation and financialisation of the economy in general and of its Minerals Energy and Financial Complex in particular By contrast inequalities poverty and failing social provision have persisted Recent attention has shifted to how this disastrous trajectory was initiated some suggesting a lack of available alternative policy options at the time of transition This is shown to be false with a full range of progressive alternatives being rejected with corresponding consequences from state capture to electoral defeat The Political Economy of Clean Energy Transitions Douglas Arent, Channing Arndt, Mackay Miller, Finn Tarp, Owen Zinaman, 2017 A volume on the political economy of clean energy transition in developed and developing regions with a focus on the issues that different countries face as they transition from fossil fuels to lower carbon technologies *The Political Economy of Trade Reform in Emerging Markets* Peter Draper, Phil Alves, Razeen Sally, 2009-01-01 few if any other recent volumes offer a historical perspective on evolving trade policy in several countries this well written well edited volume is suitable for

graduate and research libraries M Larudee Choice This book is a refreshing reminder of the benefits of unilateral trade liberalisation in countries whose leaders dare An important story told with clarity and authority Ross Garnaut The Australian National University Australia That trade liberalization is good for emerging market economies and not just for the rich ones is now widely accepted by both economists and policy makers But the question remains how can these reforms be implemented in practice The answer to that important question lies in understanding the political economy of each reforming country This book makes a splendid contribution to our understanding of this issue by examining the experience of several countries It is therefore an important book to be read by not just students and researchers but also policy makers worldwide Jagdish Bhagwati Columbia University US This timely book brings fresh analysis to the important issue of trade policy reform in emerging markets The subject matter and its significance are comprehensively introduced with a review of developing country liberalization since the 1980s providing an analytical framework for the seven country case studies that follow The case studies Australia Brazil Chile India Malaysia New Zealand and South Africa cover a wide variety of political historical and economic issues but all make clear the important role that crisis or the threat of it plays in meaningful trade policy reform This is of particular relevance in the current global financial crisis These studies together with the conclusions which are drawn from them show how important the trade liberalization agenda remains in the 21st century Written by a combination of both experts and practitioners this highly topical book will make productive reading for policy makers concerned with trade policy in developed and developing countries as well as scholars working in trade policy Postgraduate students studying international business international relations economics politics and international law should not be without this book

The Political Economy of Coal Michael Jakob, Jan C. Steckel, 2022-02-01 This volume provides an overview of the political economy of coal in diverse country contexts Coal is the largest source of greenhouse gas emissions globally accounting for about 40 percent of energy related CO₂ emissions Continued construction of coal fired power plants could make the climate targets of the Paris Agreement infeasible to achieve In spite of sharply declining costs for renewable energy sources many countries still heavily rely on coal to meet their energy demand The predominance of coal can only be adequately understood in light of the political factors that determine energy policy formulation To this end this edited volume assembles a wide variety of case studies exploring the political economy of coal for across the globe These includes industrial and developing nations coal importers and exporters as well as countries that are either substantial coal users are just beginning to ramp up their capacities or have already initiated a coal phase out Importantly all case studies are structured along a unifying framework that focuses on the central actors driving energy policy formulation their main objectives as well as the context that determines to what extent they can influence policy making This large set of comparable studies will permit drawing conclusions regarding key similarities as well as differences driving coal use in different countries This book will be of great interest to students and scholars of energy climate change resource management and sustainable development It will also appeal to practitioners and policymakers involved in sustainable development The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Smart Transitions in City Regionalism Tassilo Herrschel, Yonn Dierwechter, 2018-03-22 In recent years smartness has risen as a buzzword to characterize novel urban policy and development patterns As a result of this debates around what smart actually means both theoretically and empirically have emerged within the interdisciplinary arenas of urban and regional studies This book explores the changes in discourse rationality and selected responses of smartness through the theme of transition The concept of transition provides the broader context and points of reference for adopting smartness in reconciling competing interests and agendas in city regional governance Using case studies from around the world including North America Europe and South Africa the authors link external regime transition in societal values and goals with internal moves towards smartness While reflecting the growing integration of overarching themes and analytical concerns this volume further develops work on smartness smart growth transition city regionalism governance and sustainability *Smart Transitions in City Regionalism* explores how smart cities and city regions interact with conventional

state structures It will be of great interest to postgraduates and advanced undergraduates across urban studies geography sustainability studies and political science *Shadow of Liberation* Vishnu Padayachee,Robert Van Niekerk,2019-10-01

Shadow of Liberation explores the intricate twists turns contestations and compromises of ANC economic and social policymaking with a focus on the transition era of the 1990 s and the early years of democracy With the damning revelations by the Zondo Commission of Inquiry into State Capture on the massive corruption of the South African body politic the timing of this book could not be more relevant South Africans need to confront the economic and social policy choices that the liberation movement made and to see how these decisions may have facilitated the conditions for corruption to emerge and flourish Answers are needed Padayachee and van Niekerk focus their attention on the primary question of how and why the ANC given its historical anti inequality re distributive stance come in the 1990s to such a dramatic turn around and move towards an essentially market dominated approach Were they pushed or did they go willingly What role if any did Western governments and international financial institutions play And what of the role of the late apartheid state and South African business Did leaders and comrades sell out the ANC s emancipatory policy vision *Shadow of Liberation* tries to provide answers to these questions drawing on the best available primary archival evidence as well as extensive interviews with key protagonists across the political non government and business spectrum The authors argue that the ANC s emancipatory policy agenda was broadly to establish a social democratic welfare state upholding rights of social citizenship However its economic policy framework to realise this emancipatory mission was either non existent or egregiously misguided *A Just Transition to a Low Carbon Future in South Africa* Nqobile Xaba,Saliem Fakir,2022-02-01

Deliberations on the just transition in South Africa have intensified and will continue to do so for the next few years and decades Climate change widening socio economic inequality the precarious future of work and emergent approaches to financing arrangements have brought new urgency to the issues It therefore remains critical to interrogate how South Africa can ensure a just transition to a low carbon economy This book underlines the fact that the low carbon transition in South Africa has to grapple with complex historical social economic cultural and political factors The main message is that the transition to a low carbon society is possible but it can only succeed if it is just and handled collaboratively In addition the book aims to broaden the discourse on low carbon transition and explore the opportunities in and impediments to making the transition fair affordable and socio economically viable **Business and Government Relations in Africa** Robert A.
