Beyond the Horizon Eugene O'Neill, 1920 *Beyond the Horizon* Eugene O'Neill, 2024-02-03 Excerpt A section of country highway The road runs diagonally from the left forward to the right rear and can be seen in the distance winding toward the horizon like a pale ribbon between the low rolling hills with their freshly plowed fields clearly divided from each other checkerboard fashion by the lines of stone walls and rough snake fences The forward triangle cut off by the road is a section of a field from the dark earth of which myriad bright green blades of fall sown rye are sprouting A straggling line of piled rocks too low to be called a wall separates this field from the road To the rear of the road is a ditch with a sloping grassy bank on the far side From the center of this an old gnarled apple tree just budding into leaf strains its twisted branches heavenwards black against the pallor of distance A snake fence sidles from left to right along the top of the bank passing beneath the apple tree The hushed twilight of a day in May is just beginning The horizon hills are still rimmed by a faint line of flame and the sky above them glows with the crimson flush of the sunset This fades gradually as the action of the scene progresses

Islands Beyond the Horizon Roger Lovegrove, 2012-09-13 Islands have an irresistible attraction and an enduring appeal Naturalist Roger Lovegrove has visited many of the most remote islands in the world and in this book he takes the reader to twenty that fascinate him the most Some are familiar but most are little known they range from the storm bound island of South Georgia and the ice locked Arctic island of Wrangel to the wind swept wave lashed Mykines and St Kilda The range is diverse and spectacular and whether distant offshore inhabited uninhabited tropical or polar each is a unique self contained habitat with a delicately balanced ecosystem and each has its own mystique and ineffable magnetism Central to each story is also the impact of human settlers Lovegrove recounts unforgettable tales of human endeavour tragedy and heroism But consistently he has to report on the mankind's negative impact on wildlife and habitats from the exploitation of birds for food to the elimination of native vegetation for crops By looking not only at the biodiversity of each island but also the uneasy relationship between its wildlife and the involvement of man he provides a richly detailed account of each island its diverse wildlife its human history and the efforts of conservationists to retain these irreplaceable sites
