Southeast Asia South Africa's Transkei What Happened To It:

Poverty, War, and Violence in South Africa Clifton Crais, 2011-09-19 Poverty and violence are issues of global importance. In Poverty War and Violence in South Africa Clifton Crais explores the relationship between colonial conquest and the making of South Africa's rural poor. Based on a wealth of archival sources, this detailed history changes our understanding of the origins of the gut wrenching poverty that characterizes rural areas today. Crais shifts attention away from general models of economic change and focuses on the enduring implications of violence in shaping South Africa's past and present. Crais details the devastation wrought by European forces and their African auxiliaries. Their violence led to wanton bloodshed, large scale destruction of property and famine. Crais explores how the survivors struggled to remake their lives, including the adoption of new crops and the world of inequality and vulnerability colonial violence bequeathed. He concludes with a discussion of contemporary challenges and the threats to democracy in South Africa.

Nation, State, and Territory George W. White, 2004 Nation State and Territory shows that national identities are as potent as ever. Today many conflicts rage over places and territories of historical linguistic and religious significance. Most analyses of conflicts only consider the economic and geostrategic value of territory. George W. White shows that national identity is intimately bound to specific places and territories by cultural ties. Nation state and territory are mutually defining and reinforcing phenomena, and through careful analysis, White provides a better understanding of the interactions and conflicts of the world's nation states. Zimbabwe's Migrants and South Africa's Border Farms Maxim Bolt, 2015-09-25 During the Zimbabwean crisis, millions crossed through the apartheid era border fence searching for ways to make ends meet. Maxim Bolt explores the lives of Zimbabwean migrant labourers, of settled black farm workers and their dependants, and of white farmers and managers as they intersect on the border between Zimbabwe and South Africa. Focusing on one farm, this book investigates the role of a hub of wage labour in a place of crisis. A close ethnographic study, it addresses the complex shifting labour and life conditions in northern South Africa's agricultural borderlands. Underlying these challenges are the Zimbabwean political and economic crisis of the 2000s and the intensified pressures on commercial agriculture in South Africa following market liberalization and post apartheid land reform. But amidst uncertainty, farmers and farm workers strive for stability. The farms on South Africa's margins are centers of gravity, islands of residential labour in a sea of informal arrangements.

Lost Crops of Africa National Research Council, Policy And Global Affairs, Board on Science and Technology for International Development, Office Of International Affairs, 1999-04 Africa has more native cereals than any other continent, a legacy that has largely been bypassed in modern times. This book draws attention to traditional African cereals, their potential for expanding and diversifying African world food supplies. A number of grains, including African rice, finger millet, fonio, pearl millet, sorghum, tef, other cultivated wild grains, are discussed with attention paid to their uses, nutrition, agronomy, harvesting prospects, limitations for use. Includes information on species distribution, cultivated varieties, environmental requirements.
