**ATLANTIS IS REAL FACT INDONESIA HISTORY BEFORE** Santo Saba, KONSTANTA SUMURUPING GENI NUSANTARA The literal meaning of the word constant is constancy constant or unchanging In mathematics constant or constant is a constant value Constants are used in various scientific disciplines as opposed to arbitrary variables The definition of variable includes meaning changeable not fixed the declaration of something that has a variety of values in the programming language is also called a symbol that represents a certain value variables known in sub programs are called local variables while those that are known in general intact in one program are called Global Variables History or real events in the past is Certain not Variable only the records are affected by the interests of the Subjective in power which makes this uncertain and even Ambiguous this must be straightened out Constant is a type of variable whose value cannot be changed Value initialization is only done once at the beginning after which it cannot be changed Some constants are named according to the name of the discoverer Examples of constants c speed of light 299 792 458 meters per second h Planck's constant  $6.626 \times 10^{-34}$  Joule seconds G constant gravity  $6.6742 \times 10^{-11}$  m<sup>3</sup> s<sup>-2</sup> kg<sup>-1</sup> Hubble constant 70 km s Mpc pi the constant of the ratio of the circle to the diameter the value is close to 3.141592653589793238462643 E the value is close to 2.718281828459045235360287 golden ratio the value is close to 1.618033988749894848204586 So Constant is Constant whose value cannot be changed Value initialization is only done once at the beginning after which the value cannot be changed the number of years in recording real events in history is correct in that year not Variable If the determination of the number of years in historical recording is ambiguous or can be refuted truth then it needs to be

corrected and revised this is what happened to our country's history recording. The discoveries at the end of the 20th century showed that the Cosmological Constant was needed to explain the existence of Dark energy. The cosmological constant is the density of space energy or vacuum energy that appears in the field equation in General Relativity. This constant was introduced by Einstein in his theory of General Relativity so that the universe remains static. Einstein then discarded or abandoned the cosmological constant when observations showed that the universe is expanding or moving to expand. This is the biggest mistake in my life. Einstein, who once modified the nature of the general theory of relativity, felt that he had corrupted his own theory. He regretted so much that the addition of the cosmological constant was the biggest mistake of his life. Naturally, as an ordinary human, Einstein is not free from mistakes; here we learn that mistakes are a very human nature; they can happen to anyone, including scientists of Einstein's caliber. Likewise, in the calculation of the year in the recording of historical years in the archipelago, Konstanta, or the determination of the calculation of the historical year on the inscription with the number of Saka, which has been calculated as Must started in 78 AD, is obsolete, must be discarded or not used again, because it is proven that there are many historical facts that occurred before that year in the archipelago. Mistakes, or in polite language, mistakes can happen to anyone, including scientists of Einstein's caliber as well as chroniclers in this country, that the year 78 AD is the year of the Saka nation of the ancestors of the Archipelago nation that year conquered Raja Salivahana in south India. It is not the beginning of the Saka year to calculate the number of years in the Inscription of this early calculation of the Saka year, causing our history to be lost before the year 78 AD. In fact, there is already an advanced civilization in this country, and if this is considered to the Khilafan, so when do we want to be considered a Primitive nation? That means, if we have found the numbers, Constants, or Decisions in the early years of the calculation of the Saka year in the inscriptions, we will find a lot of real facts that the History of the Archipelago is more advanced than what is written today. The Sumuruping Geni Constant is the determination of the return of the bright light from the fire that once lit the world, and the source of that fire has ever occurred and originated in this land. History naturally rotates towards the point where it was once passed and that triumph has occurred and will be repeated again with valid provisions or constants, so now the time has come for the Sumuruping Geni Constant to occur again in this archipelago. The generation of this nation will understand who their true ancestors were, that their ancestors were not Primitive, did not embrace Animism. Dynamics were also the philosophy of their teachings that colored 3/4 of the earth, which underlies the birth and growth of 3 teachings on Indian soil. *INDON SIARY* By Santosaba Info eBook pdf WA 62813 2132 9787 <https://wa.me/message/OO5THVF7RNND01>
