Elena Fiddian-Qasmiyeh, Patricia Daley, 2018-12-18 South South cooperation is becoming ever more important to states policy makers and academics Many Northern states international agencies and NGOs are promoting South South partnerships as a means of sharing the burden in funding and undertaking development assistance and protection activities often in response to increased political and financial pressures on their own aid budgets However the mainstreaming of Southern led initiatives by UN agencies and Northern states is paradoxical in many ways especially because the development of a South South cooperation paradigm was originally conceptualised as a necessary way to overcome the exploitative nature of North South relations in the era of decolonisation This handbook critically explores diverse ways of defining the South and of conceptualising and engaging with South South relations Through 30 state of the art reviews of key academic and policy debates the handbook evaluates past present and future opportunities and challenges of South South cooperation and lays out research agendas for the next 5 10 years The book covers key models of cooperation including internationalism Pan Arabism and Pan Africanism diverse modes of South South connection exchange and support including South South aid transnational activism and migration and responses to displacement violence and conflict including Southern led humanitarianism peace building and conflict resolution In so doing the handbook reflects on decolonial postcolonial and anticolonial theories and methodologies exploring urgent questions regarding the nature and implications of conducting research in and about the global South and of applying a Southern lens to a wide range of encounters processes and dynamics across the global South and global North alike This handbook will be of great interest to scholars and post graduate students in anthropology area studies cultural studies development studies history geography international relations politics postcolonial studies and sociology China's South-South Relations Bettina Gransow, 2013 Beijing has formed South South relations with many developing countries and emerging economies by providing foreign aid setting up trade agreements making investments and employing public diplomacy China's economic rise and diplomatic initiatives to expand strategic partnerships with countries of the Global South are starting to impact the very structure of international relations The contributions to this volume provide insights into the rapidly unfolding trans regional dynamics of China's fast developing formal and informal ties to Africa the Middle East and Latin America The book also reveals the inadequacies of the traditional architecture of area studies in taking up the challenge of trans regional research Series Chinese History and Society Berliner China Hefte Vol 42 *Developing Countries and the Global Trading System* John Whalley, 2016-03-07

The Changing Global Order Madeleine O. Hosli, Joren Selleslaghs, 2019-11-22 This volume offers a comprehensive evaluation of the concept of global order with a particular emphasis on the role of regional organisations within global governance institutions such as the United Nations Building from a solid theoretical base it draws upon the expertise of numerous leading international scholars offering a broad array of timely and relevant case studies These all take into consideration the historical setting before analysing the contemporary situation and offering suggestions for potential

realignments and readjustments that may be witnessed in the future The volume adopts an interdisciplinary approach when addressing some of the most pressing issues of global governance which our global community must tackle This presents the readers an opportunity to understand related topics such as political economy international law institutions of global governance in conjunction with the academic field of International Relations IR It further helps students and interested readers understand the theoretical and practical foundations to the changing nature of global affairs *The Palgrave Handbook of Africa and the Changing Global Order* Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order By connecting the past present and future in a continuum that shows the paradox of existence for over one billion people the book underlines the centrality of the African continent to global knowledge production the global economy global security and global creativity Bringing together perspectives from top Africa scholars it actively dispels myths of the continent as just a passive recipient of external influences presenting instead an image of an active global agent that astutely projects soft power Unlike previous handbooks this book offers an eclectic mix of historical contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world **South-South Aid** Donald Bobiash, 1992-06-18 More and more Third World countries are providing development assistance to other developing countries This book examines a range of these South South aid projects sponsored by such countries as China Korea Cuba and Brazil The Future of South-South Economic Relations Adil Najam, Rachel Thrasher, 2012-12-13 In recent years it has become apparent that South South economic relations are increasing and will continue to do so There will be more trade agreements and more trade more economic alliances and more political alliances with economic goals more investment flows and an increasing acknowledgement that the Global South has more to offer than it has in the past These new economics relations have great potential both for harm and for good In the absence of directed policies and intentional actors imbalances of power and growing gaps in development will persist With the right policies in place however these relationships could forge a new global order with greater economic and political equality Covering a wide range of topics including regional trade integration in Africa the environmental impact of increased South South trade the changing patterns of South South investment and the effect of conflict on trade in South Asia this ground breaking volume presents an analysis of South South economic relations and how they might impact and be impacted by the rest of the world *Emerging Powers in Africa* Justin van der Merwe, Ian Taylor, Alexandra Arkhangelskaya, 2016-12-09 This empirically and theoretically grounded book provides insights into the ascendance of powers such as Turkey South Korea and Indonesia and their relationship with Africa Leading scholars present case studies from the BRICS and beyond to demonstrate the constantly evolving and complex character of these ties and their place in the global capitalist order They also offer new theoretical insights as well as theorisation of the spatio temporal dynamics involved in processes of accumulation within the African space Their contention is that despite their supposed anti

imperialism these emerging powers have become agents for continued uneven development This innovative edited collection will appeal to students and scholars of international relations political science development studies area studies geography and economics

Mapping China's 'One Belt One Road' Initiative Li Xing, 2018-08-13 This book sets out to analyze how the OBOR initiative will influence the world's geo-political and geo-economic environment with specific regard to the Belt and Road countries and regions It evaluates what opportunities the OBOR can offer them in light of the constraints they face paying particular attention to how security issues may keep some nations from fully participating Questions are also asked about the tension and conflict along the Belt and Road which after all takes in the Middle East's most tumultuous regions as well as the much disputed South China Sea Finally consideration is given as to how the world's other economic powers will react when the OBOR inevitably brings about capital and resource competitions

East-West Asia Relations in the 21st Century Rotem Kowner, Yoram Evron, P.R. Kumaraswamy, 2023-10-02 This book examines the changing relations between the Asian part of the Middle East and the rest of the continent during the 21st century Written by leading experts this ground-breaking volume utilizes a comprehensive and multi-dimensional perspective to offer a novel and unique outlook on the evolving shape of East West Asia relations and their global impact Critically it demonstrates that the intensification and diversification of East West Asia relations since the 1990s have altered them from a set of separated bilateral ties into complex interregional relations The book presents a nuanced comparative look at Asian countries' responses to global developments and China's rise in particular and offers a new perspective on the very concept of Asia itself It will be of interest to scholars students and practitioners working in the fields of International Relations Asian Studies and Middle Eastern Studies

Brazil-Africa Relations Gerhard Seibert, Paulo Gilberto Fagundes Vizentini, 2019 Fills an important gap in the study of Africa's international relations and its engagement with rising economies in the Global South

Africa Rising? Ian Taylor, 2014 Africa is said to be rising turning a definitive page in its history heralding new and exciting possibilities for the continent This discourse maintains that with upsurge in economic growth comes improved governance and endogenous dynamics that the emerging economies and especially the BRICS Brazil Russia India China South Africa have been instrumental in diversifying Africa's international relations perhaps leading to a radical change in the global order favourable to the developing world But to what extent is this true and how deep and how broad has been the impact on society at large This book takes a critical look at the prevalent Africa Rising discourse and explores the nature and implications of Africa's rise and the role that the BRICS have played in it The author argues that Africa has still to undergo any structural transformation that there is strong evidence that deindustrialisation and jobless growth have accompanied the upsurge of interest in the continent and that far from making a

radical turn in its developmental trajectory Africa is being pushed into the resource corner as commodity exporters to the North and now the BRICS with little scope for industrial progress or skills advancement Hope that the BRICS might offer an alternative to the extant neoliberal order are misplaced for the BRICS have a stake in maintaining the current global inequality Africa must therefore fashion its own independent path while the emerging economies will be important relying on external actors may simply reproduce anew the current state of underdevelopment Ian Taylor is Professor in International Relations and African Politics University of St Andrews Chair Professor Renmin University of China Professor Extraordinary University of Stellenbosch South Africa Honorary Professor Institute of African Studies Zhejiang Normal University China and a Visiting Scholar at Mbarara University of Science and Technology Uganda

The Concertation Impulse in World Politics Andrew F. Cooper, 2023-11-30 This book unravels the centrality of contestation over international institutions under the shadow of crisis Breaking with the widely accepted image in the mainstream US centric literature of an advance of global governance supported by pillars of institutionalized formality Andrew Cooper points to the retention of a habitual impulse towards concertation related to informal institutionalism Rather than endorsing the view that world politics is moving inexorably towards a multilateral rules based order he places the onus on the resilience of a hierarchical self selected concert model that combines a stigmatized legacy with the ability to reproduce in an array of associational formats Relying for conceptual guidance on the recovery of a valuable component in the intellectual contribution of Hedley Bull a compelling case is made that concertation represents a fundamental institution as a peer competitor to multilateralism In effect the debate over institutional design is recast away from an emphasis on utilitarian maximization towards a wider set of cardinal and highly contested questions the nature of rules at the global level the salience of institutional clubs and the meaning and impact of inequality and cooperation coordination among states across the incumbent West non incumbent Global South divide
