Zuni Origins David A. Gregory, David R. Wilcox, 2015-11-01 A Choice Outstanding Academic Title The Zuni are a Southwestern people whose origins have long intrigued anthropologists This volume presents fresh approaches to that question from both anthropological and traditional perspectives exploring the origins of the tribe and the influences that have affected their way of life Utilizing macro regional approaches it brings together many decades of research in the Zuni and Mogollon areas incorporating archaeological evidence environmental data and linguistic analyses to propose new links among early Southwestern peoples The findings reported here postulate the differentiation of the Zuni language at least 7 000 to 8 000 years ago following the initial peopling of the hemisphere and both formulate and test the hypothesis that many Mogollon populations were Zunian speakers Some of the contributions situate Zuni within the developmental context of Southwestern societies from Paleoindian to Mogollon Others test the Mogollon Zuni hypothesis by searching for contrasts between these and neighboring peoples and tracing these contrasts through macro regional analyses of environments sites pottery basketry and rock art Several studies of late prehistoric and protohistoric settlement systems in the Zuni area then express more cautious views on the Mogollon connection and present insights from Zuni traditional history and cultural geography Two internationally known scholars then critique the essays and the editors present a new research design for pursuing the question of Zuni origins By taking stock and synthesizing what is currently known about the origins of the Zuni language and the development of modern Zuni culture Zuni Origins is the only volume to address this subject with such a breadth of data and interpretations It will prove invaluable to archaeologists working throughout the North American Southwest as well as to others struggling with issues of ethnicity migration incipient agriculture and linguistic origins

Ancient Puebloan Southwest John Kantner, 2004-11-11 Ancient Puebloan Southwest traces the evolution of Puebloan society in the American Southwest from the emergence of the Chaco and Mimbres traditions in the AD 1000s through the early decades of contact with the Spanish in the sixteenth century The 2004 book focuses on the social and political changes that shaped Puebloan people over the centuries emphasizing how factors internal to society impacted on cultural evolution even in the face of the challenging environment that characterizes the American Southwest The underlying argument is that while the physical environment both provides opportunities and sets limitations to social and

political change even more important evolutionary forces are the tensions between co operation and competition for status and leadership Although relying primarily on archaeological data the book also includes oral histories historical accounts and ethnographic records as it introduces readers to the deep history of the Puebloan Southwest **The Hohokam and Their World** Linda M. Gregonis,Victoria Riley Evans,2025 The Hohokam and Their World explores how the Hohokam used art forms such as pottery shell ornaments carved stone and rock imagery to convey their views of the world and their ideas about water the Sonoran Desert the ocean travel ancestors and the cosmos Interaction and Connectivity in the Greater Southwest Karen Harry,Barbara J. Roth,2019-03-21 This volume of proceedings from the fourteenth biennial Southwest Symposium explores different kinds of social interaction that occurred prehistorically across the Southwest The authors use diverse and innovative approaches and a variety of different data sets to examine the economic social and ideological implications of the different forms of interaction presenting new ways to examine how social interaction and connectivity influenced cultural developments in the Southwest The book observes social interactions role in the diffusion of ideas and material culture the way different social units especially households interacted within and between communities and the importance of interaction and interconnectivity in understanding the archaeology of the Southwest s northern periphery Chapters demonstrate a movement away from strictly economic driven models of social connectivity and interaction and illustrate that members of social groups lived in dynamic situations that did not always have clear cut and unwavering boundaries Social connectivity and interaction were often fluid changing over time Interaction and Connectivity in the Greater Southwest is an impressive collection of established and up and coming Southwestern archaeologists collaborating to strengthen the theoretical underpinnings of the discipline It will be of interest to professional and academic archaeologists as well as researchers with interests in diffusion identity cultural transmission borders large scale interaction or social organization Contributors Richard V N Ahlstrom James R Allison Jean H Ballagh Catherine M Cameron Richard Ciolek Torello John G Douglass Suzanne L Eckert Hayward H Franklin Patricia A Gilman Dennis A Gilpin William M Graves Kelley A Hays Gilpin Lindsay D Johansson Eric Eugene Klucas Phillip O Leckman Myles R Miller Barbara J Mills Matthew A Peeples David A Phillips Jr Katie Richards Heidi Roberts Thomas R Rocek Tammy Stone Richard K Talbot Marc Thompson David T Unruh John A Ware Kristina C Wyckoff **Climate and Culture Change in North America AD 900-1600** William C. Foster,2012-05-15 Additional keywords Aboriginal or Native peoples Indians First Nations *A Land So Strange* Andrés Reséndez,2007-11-20 From a Bancroft Prize winning historian the gripping tale of a shipwrecked Spaniard who walked across America in the sixteenth century Financial Times In 1528 a mission set out from Spain to colonize Florida But the expedition went horribly wrong Delayed by a hurricane knocked off course by a colossal error of navigation and ultimately doomed by a disastrous decision to separate the men from their ships the mission quickly became a desperate journey of survival Of the four hundred men who had embarked on the voyage only four survived three Spaniards and an African slave

This tiny band endured a horrific march through Florida a harrowing raft passage across the Louisiana coast and years of enslavement in the American Southwest They journeyed for almost ten years in search of the Pacific Ocean that would guide them home and they were forever changed by their experience The men lived with a variety of nomadic Indians and learned several indigenous languages They saw lands peoples plants and animals that no outsider had ever before seen In this enthralling tale of four castaways wandering in an unknown land Andr s Res ndez brings to life the vast dynamic world of North America just a few years before European settlers would transform it forever Bodies, Ontology, and Bioarchaeology Ann M. Palkovich,2024-05-11 This volume introduces the place of Arroyo Hondo Pueblo in our understanding of Southwestern Archaeology in the Northern Rio Grande The author discusses the reanalysis of the skeletal and mortuary remains that draws on a half century of research since the original excavations were conducted by the School of American Research from 1970 1974 under the direction of Douglas W Schwartz The volume offers a close read of the mortuary evidence at Arroyo Hondo Pueblo and integrates ideas about corn as a central feature of Tewa cosmology with this crop as the paramount dietary staple The author discusses the health consequences of dry farming subsistence and present evidence for malnutrition and other dietary issues and finally describes the impact of malnutrition and other maladies on the everyday lives of Arroyo Hondo s villagers This volume is for readers interested in bioarchaeology paleopathology and Southwestern Archaeology **Reframing Paquimé** Michael E. Whalen,Paul E. Minnis,2025 Based on twenty five years of survey and excavation work in the Casas Grandes region this book presents an interpretation of Paquim that differs greatly from the traditional ideas that have dominated the literature for the last half century This massive reinterpretation of the inner workings of the Casas Grandes region tackles the essential question of how Paquim affected its near neighbors and also addresses the enigmatic end to the great city An essential archaeological text Reframing Paquim will generate debate for a generation of future scholars of Northwest Mexico and the adjacent U S Southwest Historic Native Peoples of Texas William C. Foster,2009-02-17 An incredibly detailed account of Indigenous lifeways during the initial rounds of European exploration in south central North America Several hundred tribes of Native Americans were living within or hunting and trading across the present day borders of Texas when Cabeza de Vaca and his shipwrecked companions washed up on a Gulf Coast beach in 1528 Over the next two centuries as Spanish and French expeditions explored the state they recorded detailed information about the locations and lifeways of Texas s Native peoples Using recent translations of these expedition diaries and journals along with discoveries from ongoing archaeological investigations William C Foster here assembles the most complete account ever published of Texas s Native peoples during the early historic period AD 1528 to 1722 Foster describes the historic Native peoples of Texas by geographic regions His chronological narrative records the interactions of Native groups with European explorers and with Native trading partners across a wide network that extended into Louisiana the Great Plains New Mexico and northern Mexico Foster provides extensive ethnohistorical information about Texas s

Native peoples as well as data on the various regions animals plants and climate Accompanying each regional account is an annotated list of named Indigenous tribes in that region and maps that show tribal territories and European expedition routes A very useful encyclopedic regional account of the Europeans and Native peoples of Texas who encountered one another during the relatively unexamined two hundred years before the Spanish occupation of Texas and the French establishment of Louisiana Southwestern Historical Quarterly The Chaco Meridian Stephen H. Lekson, 2015-03-19 In this return to his lively provocative reconceptualization of the meaning of Chaco Canyon and its monumental 11th century structures Stephen H Lekson expands over time and distance our understanding of the political and economic integration of the American Southwest Lekson s argument that Chaco did not stand alone but rather was the first of three capitals in a vast networked region incorporating most of the Pueblo world has gained credence over the past 15 years Here he marshals new evidence and new interpretations to further the case for ritual astronomical alignment of monumental structures and cities great ceremonial roads and the shift of the regional capital first from Chaco Canyon to the Aztec Ruins site and then to Paquim all located on the same longitudinal meridian Along the line from Aztec to Paquim Lekson synthesizes 1000 years of Southwestern prehistory explaining phenomena as diverse as the Great North Road macaw feathers Pueblo mythology the recycling of iconic symbols over time founder burials and the rise of kachina ceremonies to yield a fascinating argument that will interest anyone concerned with the prehistory and history of the American Southwest Clothing the New World Church Maya Stanfield-Mazzi, 2021-02-15 The book provides the first broad survey of church textiles of Spanish America and demonstrates that while overlooked textiles were a vital part of visual culture in the Catholic Church When Catholic churches were built in the New World in the sixteenth century they were furnished with rich textiles known in Spanish as church clothing These textile ornaments covered churches altars stairs floors and walls Vestments clothed priests and church attendants and garments clothed statues of saints The value attached to these textiles their constant use and their stunning visual qualities suggest that they played a much greater role in the creation of the Latin American Church than has been previously recognized In Clothing the New World Church Maya Stanfield Mazzi provides the first comprehensive survey of church adornment with textiles addressing how these works helped establish Christianity in Spanish America and expand it over four centuries Including more than 180 photos this book examines both imported and indigenous textiles used in the church compiling works that are now scattered around the world and reconstructing their original contexts Stanfield Mazzi delves into the hybrid or mestizo qualities of these cloths and argues that when local weavers or embroiderers in the Americas created church textiles they did so consciously with the understanding that they were creating a new church through their work The chapters are divided by textile type including embroidery featherwork tapestry painted cotton and cotton lace In the first chapter on woven silk we see how a silk standard was established on the basis of priestly preferences for this imported cloth The second chapter explains how Spanish style embroidery was introduced in the New World and

mastered by local artisans The following chapters show that in select times and places spectacular local textile types were adapted for the church reflecting ancestral aesthetic and ideological patterns Clothing the New World Church makes a significant contribution to the fields of textile studies art history Church history and Latin American studies and to interdisciplinary scholarship on material culture and indigenous agency in the New World

Exploring the Mesoamerican Subterranean Realm James E. Brady, Cristina Verdugo, 2025-09-01 Exploring the Mesoamerican Subterranean Realm brings together recent work and interpretations on the use of underground cavities by Mesoamerica's pre-Columbian cultures demonstrating their invaluable cultural purpose Case studies from across the region investigate the ways in which these highly charged points in the sacred landscape were the focus of countless political and religious activities The volume expands the study of caves to focus on the broader realm of subterranean space introducing the concept of the constructed subterranean a space in which the Maya deliberately created sacred landmarks through excavation Chapters critically examine chultuns previously thought to be subterranean storage chambers and sascaberas previously considered mines demonstrating that the traditional archaeological models are deeply flawed A wealth of data on both features is used to envision a new sacred landscape filled with thousands of subterranean sacred landmarks Natural caves are also examined a survey conducted around the ancient site of Yaxchilan considers the obvious importance of large stalagmites set up in the site core as monuments Long distance pilgrimages to these caves fundamentally reevaluates the nature of pilgrimage and reveals an economic and political importance that structured settlement and activities around the pilgrimage sites Finally evidence is analyzed to show that the human bones recovered from Midnight Terror Cave Belize were the result of human sacrifice Dealing equally with the archaeology of both natural and constructed subterranean spaces Exploring the Mesoamerican Subterranean Realm challenges preconceived notions of these spaces and their meanings dramatically shifting the field's focus and extending the understanding of the critical importance of this dark side of archaeology

The Neighbors of Casas Grandes Michael E. Whalen, Paul E. Minnis, 2009 Casas Grandes or Paquim in northwestern Mexico was one of the few socially complex prehistoric civilizations in North America Now based on more than a decade of surveys excavations and field work Michael Whalen and Paul Minnis provide a comprehensive new look at Casas Grandes and its surrounding communities in The Neighbors of Casas Grandes This volume provides a fascinating and detailed look into the culture of the Casas Grandes area involving not just the research of the architecture and artifacts left behind but also the ecology of the area The authors' research reveals the complex relationship Casas Grandes had with its neighbors varying from very direct contact with some communities to more indirect links with others Important internal influences on the area's development come to light and population sizes throughout the period demonstrate the absorption of the surrounding populations into Casas Grandes as it reached the peak of its power in the region New discoveries suggest the need to revise the previously held beliefs about the age of Casas Grandes and the dates of its rise to power This ancient civilization may

have developed as early as 1180 AD. Such breakthroughs provide fresh insight about not only Casas Grandes but the nearby settlements as well. *The Neighbors of Casas Grandes* is an important and vital piece of primary field research for all those interested in the Southwest's archaeology and history. Its contribution to the knowledge of the Casas Grandes region is monumental in helping us better understand the society that once flourished there.

Exploring Human Behavior Through Isotope Analysis Melanie M. Beasley, Andrew D. Somerville, 2023-06-23. This edited volume compiles a series of chapters written by experts of isotopic analysis in order to highlight the utility of various isotope systems in the reconstruction of past human behaviors. Rather than grouping contributions by specific isotopes or analytical techniques, as many isotope review articles are arranged, the volume organizes chapters by broadly defined themes of archaeological research. These include paleodiet and life histories, human-animal interactions, and migration and mobility. In this sense, the book is arranged with the intent of being as much question-based as method-based. Chapters under these themes provide background information on the principles of the techniques and on the theoretical underpinnings of the research, yet they are written with the non-specialist in mind and attempt to convey these ideas clearly and succinctly. In addition to the case studies and reviews, three chapters provide greater context to the field of isotopic archaeology, discussing its history, basic principles, and future potential. The volume aims to serve as a reference source for students and practicing archaeologists seeking to apply isotopic studies to their own research projects or to act as a reader for courses in archaeological science. The Davis Ranch Site Rex E. Gerald, 2019-04-30. In this new volume, the results of Rex E. Gerald's 1957 excavations at the Davis Ranch Site in southeastern Arizona's San Pedro River Valley are reported in their entirety for the first time. Annotations to Gerald's original manuscript in the archives of the Amerind Museum and newly written material place Gerald's work in the context of what is currently known regarding the late thirteenth-century Kayenta diaspora and the relationship between Kayenta immigrants and the Salado phenomenon. Data presented by Gerald and other contributors identify the site as having been inhabited by people from the Kayenta region of northeastern Arizona and southeastern Utah. The results of Gerald's excavations and Archaeology Southwest's San Pedro Preservation Project 1990-2001 indicate that the people of the Davis Ranch Site were part of a network of dispersed immigrant enclaves responsible for the origin and spread of Roosevelt Red Ware pottery, the key material marker of the Salado phenomenon. A companion volume to Charles Di Peso's 1958 publication on the nearby Reeve Ruin, archaeologists working in the U.S. Southwest and other researchers interested in ancient population movements and their consequences will consider this work an essential case study.

The La Salle Expedition on the Mississippi River Nicolas de La Salle, 2003. *The La Salle Expedition on the Mississippi River* presents the definitive English translation of Nicolas de La Salle's diary account of René Robert Cavelier, Sieur de La Salle's 1682 discovery expedition of the Mississippi River from Canada to the Gulf of Mexico. This previously unknown manuscript copy was discovered recently in the collection

of rare books in the Texas State Archives It provides the most complete and authoritative account available of this historic North American adventure and territorial claim By careful cross document analysis Foster projects an extended expedition chronology that adds about two weeks to the journey corrects the date that La Salle s claim was announced and revises erroneous interpretations made by most contemporary French and American scholars The work includes maps prepared by the noted Southwest cartographer John V Cotter

Wings in the Desert Amadeo M. Rea, 2022-04-12 There is a common but often unspoken arrogance on the part of outside observers that folk science and traditional knowledge the type developed by Native communities and tribal groups is inferior to the formal science practiced by Westerners In this lucidly written and humanistic account of the O odham tribes of Arizona and Northwest Mexico ethnobiologist Amadeo M Rea exposes the limitations of this assumption by exploring the rich ornithology that these tribes have generated about the birds that are native to their region He shows how these peoples observational knowledge provides insights into the behaviors mating habits migratory patterns and distribution of local bird species and he uncovers the various ways that this knowledge is incorporated into the communities traditions and esoteric belief systems Drawing on more than four decades of field and textual research along with hundreds of interviews with tribe members Rea identifies how birds are incorporated both symbolically and practically into Piman legends songs art religion and ceremonies Through highly detailed descriptions and accounts loaded with Native voice this book is the definitive study of folk ornithology It also provides valuable data for scholars of linguistics and North American Native studies and it makes a significant contribution to our understanding of how humans make sense of their world It will be of interest to historians of science anthropologists and scholars of indigenous cultures and folk taxonomy
