The State of State Nils Karlson, 2017-09-08 One of the most astonishing features of social economic and political life is that large scale patterns structures and behavioral regularities sometimes develop without anyone intentionally planning their occurrence or without anyone deliberately working to bring them about They evolve as a specific kind of unintended consequence of human action They are the result of invisible hands Building on Adam Smith's classic concept of the invisible hand this study presents a general approach based on the theory of games and evolutionary theory to explain such large scale unintended consequences within markets communities and the state This analysis by Nils Karlson is further used to explain the growth of the modern welfare state It shows how an unconstrained democratic state through two

distinct invisible hand processes the logic of conceit and the logic of opportunism may develop into a equilibrium state The State of State His work moves classic political economy into the world of political sociology A normative contractual model is presented and the relative desirability of the state markets and communities is discussed A major conclusion is that it is a choice between imperfect alternatives involving decisions about more or less rather than absolute judgments of an either or variety It is nevertheless suggested that society ought to be radically depoliticized and that constitutional constraints should be introduced in the universe of policy making Democratic Governance and Social Inequality Joseph S. Tulchin, Amelia Brown, 2002 Contributors examine challenges that social inequities present to democratic governments arguing that issues of poverty and inequality are becoming more important in the global environment They consider the effects of globalization on the distribution of income and wealth within state borders the impact of inequality on the stability and quality of democratic governance and the future of vulnerable democracies in light of the decline in the ability of governments to reduce inequality Tulchin is director of the Latin American Program at the Woodrow Wilson International Center for Scholars Annotation copyrighted by Book News Inc Portland OR **Liberty in an Evil Age** Carl W. Economic Futures Ruth Irwin, 2024-10-02 The life of our planet has reached a critical stage Its survival depends on our ability to rethink our relationship with ecology and create a new economy which does not rely on economic growth and supports care and sustainability for our planet This book examines histories of alternative economic theories to advocate for different ways of economic distribution that do not keep producing emissions It calls into question our philosophy of time our relationship with ecology and the original creation of debt interest and ways of avoiding exponential economic growth The author uses ideas from Maori philosophy Mesopotamian finance and quantum mechanics to set out a new basis for economic theory which is no longer set up on greedy individualism or a hierarchical trickle down effect or even overall economic growth Instead this new materialist philosophy emphasises the integration of humanity and the ecosystem and sets out to create a philosophy of economics built on interconnection and care

Adventure Capitalism Raymond Craib, 2022-07-05 Imagine a capitalist paradise An island utopia governed solely by the rules of the market and inspired by the fictions of Ayn Rand and Robinson Crusoe Sound far fetched It may not be The past half century is littered with the remains of such experiments in what Raymond Craib calls libertarian exit Often dismissed as little more than the dreams of crazy rich Caucasians exit strategies have been tried out from the southwest Pacific to the Caribbean from the North Sea to the high seas often with dire consequences for local inhabitants Based on research in archives in the US the UK and Vanuatu as well as in FBI files acquired through the Freedom of Information Act Craib explores in careful detail the ideology and practice of libertarian exit and its place in the histories of contemporary capitalism decolonization empire and oceans and islands Adventure Capitalism is a global history that intersects with an array of figures Fidel Castro and the Koch brothers American segregationists and Melanesian socialists Honolulu based real estate speculators and British Special Branch spies soldiers of fortune and English lords Orange County engineers and Tongan navigators CIA operatives and CBS news executives and a new breed of techno utopians and an old guard of Honduran coup leaders This is not only a history of our time but given the new iterations of privatized exit seasteads free private cities and space colonization it is also a history of our future
