O'Loughlin, 2014-08-12 Through the use of a poststructuralist perspective Antony O Loughlin challenges the most basic tenets of International Relations Theory and deploys Rawlsian ideas of public reason in conjunction with Kratochwil's conceptions of practical reason in order to put forward a theory that overcomes the challenges posed by poststructuralism

Rectifying International Injustice Daniel Butt, 2009 *Rectifying International Injustice* examines the theory behind claims for reparations and compensation as a result of historic international injustice **The Moral Standing of the State in**

International Politics Milla Emilia Vaha, 2021-07-15 Kant's moral and political philosophy has been important in developing ethical thinking in international relations. This study argues that his theory of the state is crucially important for understanding the moral agency of the state as it is discussed in contemporary debates. For Kant it is argued that the state has not only duties but also controversially inalienable rights that ground its relationship to its citizens and to other states. Most importantly the state regardless of its governmental form or factual behaviour has a right to exist as a state. The Kantian account provided therefore explores not only the moral agency but also the moral standing of the state examining the status of different kinds of states in world politics and expectations towards their ethical behaviour. Every state has a moral standing that must be respected in a morally imperfect world gradually transforming towards the ideal condition of perpetual peace.

Routledge Handbook of Critical International Relations Jenny Edkins, 2019-03-11 Critical international relations is both firmly established and rapidly expanding and this Handbook offers a wide ranging survey of contemporary research. It affords insights into exciting developments, more challenging issues and less prominent topics examining debates around questions of imperialism, race, gender, ethics and aesthetics and offering both an overview of the existing state of critical international politics and an agenda setting collection that highlights emerging areas and fosters future research. Sections cover critique and the discipline, relations beyond humanity, art and narrative, war, religion and security, otherness and diplomacy, spaces and times, resistance and embodiment and intimacy. An international group of expert scholars whose contributions are commissioned for the volume provide chapters that facilitate teaching at advanced undergraduate and postgraduate level, inspire new generations of researchers in the field and promote collaboration, cross fertilisation and inspiration across sub-fields often treated separately such as feminism, postcolonialism and poststructuralism. The volume sees these strands as complementary, not contradictory and emphasises their shared political goals, shared theoretical resources and complementary empirical practices. Each chapter offers specific, focused in-depth analysis that complements and exemplifies the broader coverage, making this Routledge Handbook of Critical International Relations essential reading for all students and scholars of international relations.

Punishment, Justice and International Relations Anthony F. Lang Jr., 2009-10-16 This volume argues that a wide range of policies in the international system today: economic sanctions, military intervention and counter terrorism policy are part of a punitive ethos that has arisen since the end of the Cold War.

Justifying the Obligation to Die Ilan Zvi Baron, 2009-06-16 One of the state's key features is its ability to oblige its citizens to risk their lives on its behalf by being sent into war. However, what is it about the state or its equivalent that makes this obligation justifiable? *Justifying the Obligation to Die* is the first monograph to explore systematically how this obligation has been justified. Using key texts from political philosophy and just war theory it provides a critical survey of how this obligation has been justified and using illustrations from Zionist thought and practice demonstrates how the various arguments for the obligation have functioned. The obligation to risk one's life for the state is often presumed by theorists and practitioners who

take the state for granted but for the Zionists a people without a state but in search of one and who have little history of state based political thought it became necessary to explain this obligation As such this book examines Zionism as a Jewish political theory reading it alongside the tradition of Western political thought and critiques how Zionist thought and practice sought to justify this obligation to risk one's life in war_what Michael Walzer termed the obligation to die Finally turning to the political thought of Hannah Arendt the author suggests how the obligation could become justifiable although never entirely justified For the obligation to become at all justifiable the type of politics that the state enables must respect human diversity and individuality and restrict violence so that violence is not a continuation of politics

Political Ontology and International Political Thought Vassilios Paipais, 2016-11-09 This book challenges received notions of ontology in political theory and international relations by offering a psychoanalytically informed critique of depoliticisation in prominent liberal post liberal dialogic and agonistic approaches to pluralism in world politics Paipais locates the temptation of depoliticisation in their labouring under the fundamental fantasy of various guises of foundationalism in the form of either political anthropology or ontology as in the last instance ground or conversely anti foundationalism the denial of all grounds yet still operating within a foundationalist imaginary He argues instead for a formal political ontology of the void against historicism shot through an incarnate messianic nihilism against ethicism and teleological forms of politics In so doing the author offers critical readings of the messianic nihilism of Benjamin Agamben Taubes and i ek by problematising the antinomian tendencies in their respective politicaltheologies The book argues for a version of i ek s Badiouian politics of militancy supplemented by a proper participatory understanding of St Paul s messianic meontology and incarnational Christology as a means to reconceptualise the nexus between subjectivity universality and political action in world politics It will be of interest to students and scholars

International NGOs Keith Horton,Chris Roche,2010-03-29 In recent decades there has been a great expansion in the number size and influence of International Non Governmental Organisations INGOs involved in international relief and development These changes have led to increased scrutiny of such organisations and this scrutiny together with increasing reflection by INGOs themselves and their staff on their own practice has helped to highlight a number of pressing ethical questions such organisations face such as should INGOs attempt to provide emergency assistance even when doing so risks helping to fuel further conflict How should INGOs manage any differences between their values and those of the people they seek to benefit How open and honest should INGOs be about their own uncertainties and failures This book consists of sustained reflections on such questions It derives from a workshop held at Melbourne University in July 2007 that brought together a group of people for the most part reflective practitioners and moral and political philosophers to discuss such questions It explores honestly some of the current challenges and dilemmas that INGOs face and also suggests some new ideas for meeting these challenges Our hope is that the kind of explicit reflection on the ethical issues INGOs face exemplified in this publication will help to promote a wider debate about these issues a debate that in turn will help INGO managers and others to make better wiser more ethically informed decisions International Ethics Richard

Shapcott,2013-04-30 Is it justifiable to make any basic moral distinction between insiders and outsiders Do we have substantive duties of justice to all human beings or merely Humanitarian duties of aid and assistance These are two of the most crucial questions confronting world politics and the field of international ethics today International Ethics A Critical Introduction provides an engaging and accessible introduction to these foundational questions In a cogent and carefully argued analysis Richard Shapcott critically examines the theories of cosmopolitanism communitarianism realism and pluralism and scrutinises their approaches to the various obligations which members of bounded communities primarily nation states have to outsiders and foreigners He then takes the theoretical approaches in context by discussing the ethics of hospitality and membership of political communities issues of mutual aid and humanitarianism abroad the ethics of harm related to interstate international violence and the challenge of severe global poverty The book concludes by suggesting that the terms of international ethical life in the 21st century require reframing in a way that focuses more intently on the nature of harm between communities and individuals This book provides students and scholars with a conceptual framework with which to analyse the policies actions and philosophy of governments NGOs and international corporations Above all it offers the means whereby individuals can assess their own positions on contemporary ethical issues such as global poverty humanitarian intervention migration and refugees and global warming Justice and Peace Caroline Fehl,Dirk

Peters,Simone Wisotzki,Jonas Wolff,2019-07-05 This book studies the justice concerns of political actors in important international regimes and international and domestic conflicts and traces their effects on peace and conflict The book

demonstrates that such justice concerns play an ambivalent role for the resolution of conflicts and maintenance of order. While arrangements that actors perceive as just will provide a good basis for peaceful relations, the pursuit of justice can create conflicts or make existing ones more difficult to resolve.
