The Legal Protection of Foreign Investments Against Political Risk Thomas Nektarios Papanastasiou,2015-08-19 The Legal Protection of Foreign Investments Against Political Risk examines how political risks associated with foreign direct investment in the energy sector are managed or mitigated and suggests new ways to deal with the possibility of such risk It applies its analysis using case studies and international law and examining actual contracts to the specific context of foreign investment in five Asian countries power infrastructure projects Legal protection of foreign investments against political risk

has been a problem for a long time Professor Papanastasiou's book brilliantly balances the legitimate regulatory power of host states with legitimate business interests of foreign investors by presenting a neatly designed multi-layered legal framework for political risk management. This is an important contribution to both the study of international investment law and the practice of foreign investment business transactions.

Junji Nakagawa, Professor of International Economic Law, Institute of Social Science, University of Tokyo, Author, *International Harmonization of Economic Regulation*, Oxford University Press, 2011. This book is an impressive and important entry into the field of international investment law scholarship. While maintaining a focus on the important Japanese and Asian regions, it also provides a general and up-to-date coverage of relevant international investment law and political risk considerations faced by multinational corporations. It is impressively concise yet thorough; it is practical yet takes into account relevant and recent legal scholarship; it is well written and organized. The ultimate goal is to help foreign investors and their advisors understand the current international investment law framework and climate to enable them to devise strategies to help their clients reduce political risk and to protect their clients' property rights and investments. This work should be of interest to in-house counsel and international law practitioners as well as to law students and scholars for its coverage of current international investment law standards, scholarship, and practices.

N. Stephan Kinsella, Attorney, Houston, Texas, Co-author, *International Investment, Political Risk and Dispute Resolution*, OUP, 2005. This study contributes insightfully to the literature on international economics and in particular on the laws protecting foreign investment. The book is unique in two ways. First, it analyzes and measures the impact of such multi-tier legal frameworks as FTAs, investment contracts, FDI regulations, and insurance by combining legal interpretative tools and scoring techniques. Second, it adds a new narrative on how Japanese business can use law to secure investments from political risks in the energy sector of foreign countries.

Shujiro Urata, Professor of International Economics, Graduate School of Asian Pacific Studies, Waseda University, Co-editor, *Economic Consequences of Globalization: Evidence from East Asia*, Routledge, 2012.

[The Challenge Of The New International Economic Order](#), Edwin P. Reubens, 2019-07-11. This volume deals with the recent proposals in the United Nations and elsewhere for reconstructing the existing economic relations between less developed and more developed countries. The contributors to the book undertake to clarify the NIEO proposals, asking specifically to what extent they are really new, fully international, realistically economic, and are the constituents of a workable order. The confrontation of NIEO demands and real-world constraints is a leading feature of the book, and each of the chapters deals with one or more elements of the NIEO proposals against the background of relevant conditions in both the countries and the international institutions and practices that interrelate them. The authors arrive at a considerable degree of consensus, mostly agreeing that the NIEO is not really a new order but endorsing specific NIEO proposals that will achieve gradual progress for LDCs in

Stability and Legitimate Expectations in International Energy Investments Rahmi

Kopar, 2021-08-12 This book assesses stability guarantees through the lens of the legitimate expectations principle to offer a new perspective on the stability concept in international energy investments The analysis of the interaction between the concepts of stability and legitimate expectations reveals that there are now more opportunities for energy investors to argue their cases before arbitral tribunals The book offers detailed analyses of the latest energy investment arbitral awards from Spain Italy and the Czech Republic and reflects on the state of the art of the legitimate expectations debate and its relationship with the stability concept The author argues that in order to achieve stability the legitimate expectations principle should be employed as the main investment protection tool when a dispute arises on account of unilateral host state alterations This timely work will be useful to both scholars and practitioners who are interested in international energy law investment treaty arbitration and international investment law
