## **Soviet Air Force:**

**The Soviet Air Force Since 1918** Alexander Boyd, 1977      *The Russian Air Force in the Eyes of German Commanders* Generalleutnant Walter Schwabedissen, 2017-06-28

The Russian Air Force in the Eyes of German Commanders by Generalleutnant a D Walter Schwabedissen is one of a series of historical studies written by or based on information supplied by former key officers of the GAF for the United States Air Force Historical Division. The overall purpose of the series is twofold: 1 To provide the U S Air Force with a comprehensive and insofar as possible authoritative history of a major air force which suffered defeat in World War II; a history prepared by many of the principal and responsible leaders of that air force; 2 to provide a firsthand account of that air force's unique combat in a major war especially its fight against the forces of the Soviet Union. This series of studies therefore covers in large part virtually all phases of the Luftwaffe's operations and organization from its camouflaged origin in the Reichswehr during the period of secret German rearmament following World War I through its participation in the Spanish Civil War and its massive operations and final defeat in World War II with particular attention to the air war on the Eastern Front. In World War II the Russian Air Force came of age. The men most vitally concerned with this aside from the Russians themselves were commanders in the German armed forces. The experience of these commanders then constitutes a unique source for information on an organization whose capabilities both past and future are of vital concern to the world. The chief German experience with the Russian Air Force derives from World War II. It was during this period that the Russians learned most from the Germans and the Germans learned most about the Russians. This study exploits this broad German experience. Compiled from the official records of the German Air Force and from reports written by German commanders who saw action in the Russian campaign, it documents many of the Russian Air Force's achievements as well as its failures.

Red Air Sanu Kainikara, 2007-10

The Russian Air Force carries the mantle of the erstwhile Red Air Force of the Soviet Union and has a long and illustrious history backed by grand traditions and customs. The Russian Air Force is still coming to grips with its changed circumstances after the collapse of the Soviet Union and is perhaps in the best shape of the three armed forces to be able to lend credence to the Russian Federation's claim to international influence and power projection capabilities. Doctrine is the reflection of a nation's character and air power doctrine is influenced by the strategic culture of a nation. Nowhere else is this more apparent than in the case of the Russian Air Force. The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies. The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world. This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives, political ideology and the development of military doctrine.

**Measuring Military Power** Joshua M. Epstein, 2014-07-14 Joshua M Epstein argues that prevailing assumptions about the East West balance of power rest on erroneous measures of military strength He develops a method for analyzing military capabilities and applies that general procedure to the Soviet tactical air threat to NATO Originally published in 1984 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 *Red Phoenix Rising* Von Hardesty, Ilya Grinberg, 2021-07-01 A groundbreaking account of the Soviet Air Force in World War II the original version of this book Red Phoenix was hailed by the Washington Post as both brilliant and monumental That version has now been completely overhauled in the wake of an avalanche of declassified Russian archival sources combat documents and statistical information made available in the past three decades The result Red Phoenix Rising is nothing less than definitive The saga of the Soviet air force one of the least chronicled aspects of the war marked a transition from near annihilation in 1941 to the world's largest operational tactical air force four years later Von Hardesty and Ilya Grinberg reveal the dynamic changes in tactics and operational art that allowed the VVS to bring about that remarkable transformation Drawing upon a wider array of primary sources well beyond the uncritical and ultra patriotic Soviet memoirs underpinning the original version this volume corrects updates and amplifies its predecessor In the process it challenges many official accounts and revises misconceptions promoted by scholars who relied heavily on German sources thus enlarging our understanding of the brutal campaigns fought on the Eastern Front The authors describe the air campaigns as they unfolded with full chapters devoted to the monumental victories at Moscow Stalingrad and Kursk By combining the deeply affecting human drama of pilots relentlessly confronted by lethal threats in the air and on the ground

with a rich technical understanding of complex military machines they have produced a fast paced riveting look at the air war on the Eastern Front as it has never been seen before They also address dilemmas faced by the Soviet Air Force in the immediate postwar era as it moved to adopt the new technology of long range bombers jet propulsion and nuclear arms Drawing heavily upon individual accounts down to the unit level Hardesty and Grinberg greatly enhance our understanding of their story s human dimension while the book s more than 100 photos many never before seen in the West vividly portray the high stakes and hardware of this dramatic tale In sum this is the definitive one volume account of a vital but still underserved dimension of the war surpassing its predecessor so decisively that no fan of that earlier work can afford to miss it

The Soviet Air Force And Strategic Bombing Major Philip A. Stemple, 2015-11-06 It is the purpose of this project to show why the Soviet Air Force did not embrace the revolutionary Douhetian concept of strategic bombing as did other world powers during the 1920 s 30 s and World War II It is also to explain that in addition to technological shortcomings there was a combination of theoretical and doctrinal reasons taken to rigidity that was responsible for this Moreover to show that when the revolution in military affairs RMA of nuclear weapons occurred strategic bombing was adopted Additionally that even as strategic bombing became fundamental to Soviet strategic doctrine during the Cold War it was not at the exclusion of a more traditional Red Air Force role
