Demobilized Veterans in Late Stalinist Leningrad Robert Dale, 2015-10-29 This book investigates the demobilization and post war readjustment of Red Army veterans in Leningrad and its environs after the Great Patriotic War Over 300 000 soldiers were stood down in this war ravaged region between July 1945 and 1948 They found the transition to civilian life more challenging than many could ever have imagined For civilian Leningraders reintegrating the rapid influx of former soldiers represented an enormous political economic social and cultural challenge In this book Robert Dale reveals how these former soldiers became civilians in a society devastated and traumatized by total warfare Dale discusses how and how successfully veterans became ordinary citizens Based on extensive original research in local and national archives oral history interviews and the examination of various newspaper collections *Demobilized Veterans in Late Stalinist Leningrad* peels back the myths woven around demobilization to reveal a darker history repressed by society and concealed from

historiography While propaganda celebrated this disarmament as a smooth process which reunited veterans with their families reintegrated them into the workforce and facilitated upward social mobility the reality was rarely straightforward Many veterans were caught up in the scramble for work housing healthcare and state hand outs Others drifted to the social margins criminality or became the victims of post war political repression Demobilized Veterans in Late Stalinist Leningrad tells the story of both the failure of local representatives to support returning Soviet soldiers and the remarkable resilience and creativity of veterans in solving the problems created by their return to society It is a vital study for all scholars and students of post war Soviet history and the impact of war in the modern era Ivan's War Catherine Merridale, 2024-09-04

May be the best historical portrait of life in the Red Army yet published researched with extraordinary patience and a wonderful ear for nuance Anne Applebaum The New York Review of Books Of the thirty million who fought in the eastern front of World War II eight million died driven forward in suicidal charges shattered by German shells and tanks They were the men and women of the Red Army a ragtag mass of soldiers who confronted Europe's most lethal fighting force and by 1945 had defeated it Sixty years have passed since their epic triumph but the heart and mind of Ivan as the ordinary Russian soldier was called remain a mystery We know something about how the soldiers died but nearly nothing about how they lived how they saw the world or why they fought Sourced from previously inaccessible military archives personal diaries and intimate veterans narratives author Catherine Merridale unveils the untold journey of these soldiers from their first encounter with the German offensive to their hard earned victory in Stalingrad a place where survival was measured in mere hours Accompany these brave hearts into the morose streets of Berlin as they face their anger fear and finally a bitter homecoming denied of the new life for which they sacrificed everything Discover this unique fusion of patriotism courage and human spirit that drove these undernourished poorly led troops to overthrow the Nazi menace Ivan's War emphatically places these invisible millions at the core of their deserved historical context accounting for their major role in shaping a new era A marvelous book confirms that Merridale is a superb historian Tony Judt author of Postwar

American Writers and the Approach of World War II, 1930-1941 Ichiro Takayoshi, 2015 Ichiro Takayoshi's book argues that World War II transformed American literary culture From the mid 1930s to the American entry into World War II in 1941 pre eminent figures from Ernest Hemingway to Reinhold Neibuhr responded to the turn of the public's interest from the economic depression at home to the menace of totalitarian systems abroad by producing novels short stories plays poems and cultural criticism in which they prophesied the coming of a second world war and explored how America could prepare for it The variety of competing answers offered a rich legacy of idioms symbols and standard arguments that were destined to license America's promotion of its values and interests around the world for the rest of the twentieth century Ambitious in scope and addressing an enormous range of writers thinkers and artists this book is the first to establish the outlines of American culture during this pivotal period Provided by publisher

Red Air Sanu Kainikara, 2007-10 The Russian Air Force carries

the mantle of the erstwhile Red Air Force of the Soviet Union and has a long and illustrious history backed by grand traditions and customs The Russian Air Force is still coming to grips with its changed circumstances after the collapse of the Soviet Union and is perhaps in the best shape of the three armed forces to be able to lend credence to the Russian Federation's claim to international influence and power projection capabilities Doctrine is the reflection of a nation's character and air power doctrine is influenced by the strategic culture of a nation Nowhere else is this more apparent than in the case of the Russian Air Force The Red Air Force has been directly influenced by the political upheavals in the Soviet Union and now Russia but has displayed exemplary resilience in continuing to provide adequate support for government policies The impact of political ideology on the development of doctrine and air power has not been greater in any other air force around the world This book is an extension of a doctoral thesis produced in 2005 and is essential reading for anyone trying to come to grips with the intricate relationship that exists between national security imperatives political ideology and the development of military doctrine Back cover

Acculturation and Psychological Adaptation Vanessa S. Castro, 2003-01-30 This volume addresses the psychological impact of interethnic contact and acculturation in Latin American settings focusing on the effects of acculturation on self esteem among adolescents Opening with an account of relevant theoretical and empirical literature on interethnic contact and acculturation this book represents an acid test of the cross cultural applicability of theory and method largely derived from research on acculturation to North American and European settings Much research has focused on acculturation processes among ethnic immigrants and ethnic minorities leading to the impression that host or majority groups remain unchangeable during acculturation By contrast this volume shows that psychological changes occur in all groups involved in the contact reinforcing the idea that acculturation is a special case of mutual influence This book will be of special interest for researchers scholars or students seeking to understand the acculturation process outside North America and Europe Strong evidence is presented showing the development of positive ties with both one's own and other relevant groups provides a more solid basis for self esteem than relinquishing ties to the ethnic group of reference
