The Fall of Soviet Communism, 1986-1991 Jeremy Smith, 2017-03-16 The fall of communism and the break up of the Soviet Union into 15 independent states in December 1991 was one of the most significant events of the 20th century In the last years of Soviet rule images of mass protests on the streets of Moscow Tbilisi and Vilnius bloodshed in Baku striking miners Mikhail Gorbachev wooing the West and Boris Yeltsin defiantly mounting a tank in front of the White House building in Moscow shattered all of the old certainties about the seemingly unbreakable communist system Gorbachev and Yeltsin were the dominant figures in this process but non Russian national movements workers intellectuals and international developments all had roles to play Jeremy Smith presents the dramatic events of 1985 91 in a clear and succinct form setting out a variety of interpretations for the demise of communism in the Soviet Union and suggesting new approaches to answering the unresolved question of why it happened Smith discusses the long term and short term factors behind the extraordinary

collapse assessing the impact of economic crisis nationalism personalities and democratization in the process

Modernisation in Russia since 1900 Markku Kangaspuro, Jeremy Smith, 2006-12-27 Modernisation has been a constant theme in Russian history at least since Peter the Great launched a series of initiatives aimed at closing the economic technical and cultural gap between Russia and the more advanced countries of Europe All of the leaders of the Soviet Union and post Soviet Russia have been intensely aware of this gap and have pursued a number of strategies some more successful than others in order to modernise the country But it would be wrong to view modernisation as a unilinear process which was the exclusive preserve of the state Modernisation has had profound effects on Russian society and the attitudes of different social groups have been crucial to the success and failure of modernisation This volume examines the broad theme of modernisation in late imperial Soviet and post Soviet Russia both through general overviews of particular topics and specific case studies of modernisation projects and their impact Modernisation is seen not just as an economic policy but as a cultural and social phenomenon reflected through such diverse themes as ideology welfare education gender relations transport political reform and the Internet The result is the most up to date and comprehensive survey of modernisation in Russia available which highlights both one of the perennial problems and the challenges and prospects for contemporary Russia

The Soviet Century Moshe Lewin, 2016-10-11 This classic Soviet Union history traces the USSR from 1917 to its fall offering a master class in understanding the structures and intricate workings of the Soviet system Ian Kershaw historian and Hitler biographer Today the Soviet Union remains the most extraordinary but tragic attempt to create a society beyond capitalism Yet its history was one that for a long time proved impossible to write In The Soviet Century Moshe Lewin follows this history in all its complexity guiding us through the inner workings of a system which is still barely understood In the process he overturns widely held beliefs about the USSR s leaders the State Party system and the powerful Soviet bureaucracy Departing from a simple linear history The Soviet Century traces all the continuities and ruptures that led from the founding revolution of October 1917 to the final collapse of the late 1980s and early 1990s passing through the Stalinist dictatorship the impossible reforms of the Khrushchev years and the glasnost and perestroika policies of Gorbachev

Brezhnev Reconsidered E. Bacon, M. Sandle, 2002-10-11 Leonid Brezhnev was leader of the Soviet Union for almost two decades when it was at the height of its powers This book is a long

overdue reappraisal of Brezhnev the man and the system over which he ruled By incorporating much of the new material available in Russian it challenges the received wisdom about the Brezhnev years and provides a fascinating insight into the life and times of one of the twentieth century s most neglected political leaders **Russia in the Twentieth Century** David R. Marples,2014-01-14 The history of Russia as the natural successor to the Soviet Union is of crucial importance to understanding why communism ultimately lost out to Western democracy and the free market system David Marples presents a balanced overview of 20th century Russian history and shows that although contemporary Russia has retained many of the practices and memories of the Soviet period it is not about to revert back to the Soviet example *The Modernisation of Russia, 1856-1985* John Laver,2002 This book is directed at students studying the economic and social development of Russia and the Soviet Union as well as the nature of Russian government and its impact on the Russian people in this period at AS A level It forms part of the new Heinemann Advanced History series which has been written specifically to cover modules set by each of the three Awarding Bodies OCR Edexcel and AQA **The Cold War in the 1950s** Nicolas Lewkowicz,2024-03-12 The book claims that the United States and the Soviet Union attained the mastery of the international order by projecting universalist values that responded to the particularist markers of the domestic order that was generated in the 1950s The geopolitical orientation adopted by the superpowers in the 1950s was shaped by the way in which their societies developed politically socially and economically in the 1950s The main argument of this book is that the quest for the mastery of the international order that informed superpower relations in the 1950s was guided by the need to respond to the local circumstances that emerged in the United States and the Soviet Union The particularist markers that arose in the 1950s led to the establishment of a geopolitical project underpinned by certain universalist values that could be applied in order to build the superpowers sphere of influence *Red Holocaust* Steven Rosefielde,2009-12-16 Twentieth and twenty first century communism is a failed experiment in social engineering that needlessly killed approximately 60 million people and perhaps tens of millions more These high crimes against humanity constitute a Red Holocaust that exceeds the combined carnage of the French Reign of Terror Ha Shoah Showa Japan s Asian holocaust and all combat deaths in World War I and II This fascinating book investigates high crimes against humanity in the Soviet Union eastern and central Europe North Korea China Vietnam Laos and Cambodia 1929 2009 and compares the results with Ha Shoah and the Japanese Asian Holocaust As in other studies blame is ascribed to political ideological and personal causes but special emphasis is given to internal contradictions in Marx s utopian model as well as Stalinist and post Stalinist transition systems concocted to realize communist ends This faulty economic engineering forms a bridge to the larger issue of communism s historical failure The book includes a comprehensive study of the transcommunist holocaust a judicial assessment of holocaust culpability and special pleadings an obituary for Stalinism everywhere except North Korea and a death watch for contemporary communism in China Vietnam Laos Cambodia North Korea Cuba and Nepal a comparative assessment of

totalitarian high crimes against humanity a call for memory as a defense against recurrent economic racial and ethnic holocausts The book will be useful to undergraduate and higher level students interested in Russian history Stalinism communism North and South Korean economic performance and international affairs Steven Rosefielde is a Professor of Economics at the University of North Carolina Chapel Hill and a member of the Russian Academy of Natural Sciences

The Dictators: Hitler's Germany, Stalin's Russia Richard Overy, 2006-01-17 A book of great importance it surpasses all others in breadth and depth Commentary If the past century will be remembered for its tragic pairing of civilized achievement and organized destruction at the heart of darkness may be found Hitler Stalin and the systems of domination they forged Their lethal regimes murdered millions and fought a massive deadly war Yet their dictatorships took shape within formal constitutional structures and drew the support of the German and Russian people In the first major historical work to analyze the two dictatorships together in depth Richard Overy gives us an absorbing study of Hitler and Stalin ranging from their private and public selves their ascents to power and consolidation of absolute rule to their waging of massive war and creation of far flung empires of camps and prisons The Nazi extermination camps and the vast Soviet Gulag represent the two dictatorships in their most inhuman form Overy shows us the human and historical roots of these evils

Soviet Economics Michael Charles Kaser, 1970 European Industrial Policy James

Foreman-Peck, Giovanni Federico, 1999 At the end of the 20th century with stagnating industrial output unemployment in many European countries has climbed to levels not seen since the 1930s Interventionist industrial policies thus find new popularity after the gentle flirtation with liberalization in the early 1990s Under the Maastricht Treaty the European Union was granted industrial policy powers for the first time The present study aims to contribute to an understanding of European industrial policy by introducing an historical perspective National policy continuities and the considerable time over which industrial performance responds to changed environments emerge with greater clarity in the long run The chapters in this book take a broad view of industrial policy including those policies that establish the framework such as competition law as well as sector for firm specific policies The overall conclusion is that improved framework policies such as liberalization and re regulation are still essential Monetary union in the core will increase tensions arising from economic inflexibility Although

there are often strong political barriers blocking implementation of appropriate industrial policies they will be even more necessary under monetary union Engineering Earth Stanley D. Brunn, 2011-03-19 This is the first book to examine the actual impact of physical and social engineering projects in more than fifty countries from a multidisciplinary perspective The book brings together an international team of nearly two hundred authors from over two dozen different countries and more than a dozen different social environmental and engineering sciences Together they document and illustrate with case studies maps and photographs the scale and impacts of many megaprojects and the importance of studying these projects in historical contemporary and postmodern perspectives This pioneering book will stimulate interest in examining a variety of both social and physical engineering projects at local regional and global scales and from disciplinary and trans disciplinary perspectives **Red Holocaust** , **The Family in Central Asia** Sophie Roche, 2020-08-10 No detailed description available for The Family in Central Asia
