Michelson,2024-10-15 Rapid changes in communication channels tools and conventions of interaction over the last two
decades have paved the way for increasingly digital learning environments In second language L2 education shifts toward
digital learning and teaching were intensified during the pandemic and many such formats are here to stay At the same time
a growing interest in socially oriented pedagogies in L2 learning and teaching is prompting many L2 researchers and
practitioners to investigate new research areas and explore post communicative language teaching pedagogies that engage
learners more deeply with cultural texts using a range of semiotic and linguistic resources Digital Social Reading DSR is a
pedagogical approach that affords technology mediated collaborative reading where texts are read through a digital platform
that allows two or more readers to highlight the same virtual copy of a text and discuss it through a digital interface that
affords synchronous or asynchronous margin dialogues anchored in specific passages This book offers empirical studies
demonstrating how DSR can foster and illuminate learner interactions that mediate learning and also work that focuses on
language teaching perspectives in DSR environments including task design and assessment issues
