The Numeral Systems of Nigerian Languages Ozo-mekuri Ndimele, S.L. Chan, 2016-04-30 The papers in this collection present the numeral systems of more than twenty Nigerian languages The papers mainly emanate from a workshop on the numeral systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt Nigeria The workshop arose from awareness created by Dr Eugene S L Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages The quantum of mathematical computations addition multiplication subtraction or a combination of two or all of these involved in the numeral systems of Nigerian languages is remarkable The papers reveal that a variety of numeral systems do exist such as binary decimal incomplete decimal duodecimal quinary quaternary ternary mixed body part tally systems and much more The book is a resource about how different languages manipulate their numeral systems

Acquisition Reversal Olanike Ola Orie, 2012-10-01 This is the first comprehensive account of prolonged hearing loss and its impact on a language that was once spoken fluently Although it is currently assumed that hearing loss results in speech deterioration it is shown that language loss occurs when speakers remain deaf for a long time The reader is introduced to a significant deaf population postlingually deafened Yoruba speakers who have been deaf for more than twenty years and who have no access to hearing aids or speech therapy After becoming deaf they continue to speak Yoruba from memory and hear visually through lip reading These speakers exhibit phonological

lexical and syntactic losses which mirror acquisition patterns attested in the speech of Yoruba children Based on these similarities it is argued that a direct link exists between language loss and first language acquisition It is further argued that prolonged deafness results in language reversal Finally the book presents the first description of the sign language and gestures used by deafened speakers to augment their spoken language These findings will be of value to linguists speech language and hearing therapists anthropologists Africanists deaf studies researchers and non specialists who are interested in hearing health and wellness *Data-Rich Linguistics* Oluseye Adesola,Akinbiyi Akinlabi,Olanike Ola Orie,2018-10-09 This collection was compiled by an international group of scholars in recognition of Professor Yiwola Awoyale s contributions to African language and linguistic studies Based at University of Pennsylvania Professor Awoyale is particularly celebrated as a great field linguist who pays special attention to data and data documentation This edited volume presents current research on topics concerning the syntax semantics phonology applied and socio linguistics of African languages providing a state of the art account of contemporary issues in African linguistics today

Pidgins and Creoles: Volume 1, Theory and Structure John A. Holm,1988-05-05 This first volume of Holm s major survey of pidgins and creoles provides an up to date and readable introduction to a field of study that has become established only in the past few decades Written for both students and general readers with a basic knowledge of linguistics the book s original perspective will also attract specialists in the field seeking a broad overview of the linguistic relationships among these languages Creolized or restructured versions of English French Spanish Dutch Portugese and other languages arose during European colonial expansion These resulted in such creoles as Jamaican Haitian Papiamentu and some one hundred others as well as such semi creoles as Afrikaans non standard Brazilian Portugese Papiamentu and American Black English Scholars have tended to work on particular language varieties in relative isolation making comparative research into the genesis development and structure of creoles difficult In writing this book Holm draws on broad studies of many languages to make clear how far reaching creoles similarities are and to challenge current linguistic theories on creoles and pidgins The emphasis of this volume is largely empirical rather than descriptive Its core is a comparative study of creoles based on European languages in Africa and the Caribbean that demonstrates the striking similarities among the languages in terms of their lexical semantics phonology and syntax A forthcoming volume provides a socio historic overview of variety development and text examples with translations of the restructured languages
