The European Union In A Changing World:

The European Union in a Changing World Order Antonina Bakardjieva Engelbrekt, Niklas Bremberg, Anna Michalski, Lars Oxelheim, 2019-08-06 This book explores how the European Union responds to the ongoing challenges to the liberal international order. These challenges arise both within the EU itself and beyond its borders and put into question the values of free trade and liberal democracy. The book's interdisciplinary approach brings together scholars from economics, law, and political science to provide a comprehensive analysis of how shifts in the international order affect the global position of the EU in dimensions such as foreign and security policy, trade, migration, populism, rule of law, and climate change. All chapters include policy recommendations which make the book particularly useful for decision makers and policy advisors, besides researchers and students as well as for anyone interested in the future of the EU.

The European Union in a Changing World Rajendra Kumar Jain, 2002 Revision of papers presented at a seminar organized by West European Studies Division of the Centre for American and West European Studies, School of International Studies, Jawaharlal Nehru University in association with the Centre for Human Sciences of the French Embassy, New Delhi on 6-7 September 2001.

European Union Foreign Policy in a Changing World Karen E. Smith, 2013-04-16 The second edition of *European Union Foreign Policy in a Changing World* provides a clear introduction to the complexities of contemporary European foreign policy and offers a fresh and distinctive perspective on the nature of the EU's international identity. Thoroughly revised and expanded, the book explores how and why the EU tries to achieve five core foreign policy objectives: the encouragement of regional cooperation, the advancement of human rights, the promotion of democracy and good governance, the prevention of violent conflict, and the promotion of sustainable development.

EU Development Policy in a Changing World Andrew Mold, 2007 On many fronts, European Union development policy is at a critical juncture in the face of new obstacles. The EU has been forced to rethink trade, security, and its relationship with neighbors in North Africa and the Middle East. Contentious questions have centered on the effects of EU expansion, agricultural protectionism, and development-friendly trade policy in the EU and its member nations. To answer these questions and others, this expertly edited volume draws on analysis from well-known specialists in fields such as public policy and economic development, providing a critical overview of EU development policy and the challenges it must confront in an increasingly volatile and changing world.

EU Geopolitical Actorness in a Changing World Liridon Lika, Dealan Riga, 2025-02-24 This book elaborates on the assumption that the European Union's actorness might be shifting from normative to geopolitical and strategic focus. Over the past few years, the EU has faced growing challenges such as disruptions in its vicinity, diffusion of global power, and renewed geopolitical competition. These external pressures have significantly impacted the EU, prompting it, among other measures, to announce a Geopolitical Commission. Academic literature has acknowledged the EU's shift from normative power to an increasingly geoeconomic and geopolitical approach. However, the notion of geopolitical actorness warrants closer scrutiny of its implications on foreign policy. This edited volume

critically examines the EU's evolving strategy in a changing world. It provides a conceptual framework for rethinking the Union's global role and the renewal of foreign policy tools. The book offers a fresh and innovative perspective on whether the EU's ambition to assert new geopolitical leadership is actually backed by the effective implementation of policies and strategies needed to address emerging global challenges. *European Union* Jeremy John Richardson, 2006. Richardson introduces the policy making processes at work in the EU. This edition has been significantly improved to make it even more accessible for second and third year undergraduates. A website will also support this edition featuring some of the more technical material such as statistics.

The EU under Strain? Mechthild Roos, Daniel Schade, 2023-06-06. When EU member states signed the Treaty of Lisbon in 2007 they did not anticipate the manifold crises in store for them over the following years. Instead of the intended consolidation of a Union which had just gone through its most profound modernisation and biggest round of enlargements the EU has since then had to weather a wide range of political, economic, social, legal, health and even military crises with major repercussions within and beyond its own territory. Indeed, this time of polycrisis has induced change on many levels. Across the continent and its many fora of European supra-national and international collaboration, established institutions, rule systems and normative frameworks have been put into question and power balances have been shifting. Against this background, actors from social, political, economic and cultural life have sought new ways to overcome the manifold pressing problems of their time, be it through intensified collaboration or attempts to increasingly resolve issues at the national level. This volume offers a compilation of case studies on EU crisis responses covering the most impactful of the various crises the EU has had to face in recent years. It provides theoretical and conceptual guidelines for the study of political actors' responses to crisis at all levels of the EU multilevel governance system and beyond.

The European Union and Global Development S. Gänzle, S. Grimm, D. Makhan, 2012-04-17. An assessment of the capacity of the EU to coordinate actors and policies with regards to global development. The authors argue that the EU and its member states have the potential to act for global development when they are able to improve policy and actor coherence such as through better linking of bilateral and community programmes. *European Union* Jeremy Richardson, 2006-01-16. This best-selling book delivers a comprehensive introduction to the policy making processes at work in the European Union. Written by some of the leading authorities in the field, this new edition has been significantly improved to make it even more accessible for second and third year undergraduates. Addressing some of the more contentious areas in order to stimulate students' interest, this book also continues to cover the vital elements of EU courses including theory, history, institutions, policy relations with member states, external relations, enlargement. A companion website also supports this edition with a clear guide to more technical material such as statistics as well as regular updates. This volume is essential reading for all students of politics and the European Union.

The European Union's Evolving External Engagement Chad Damro, Sieglinde Gstöhl, Simon Schunz, 2017-11-07. In recent decades the external action of the European Union (EU) has been

undergoing considerable change An expansion of the EU's external policy portfolio can be observed in many areas as previous policies for internal purposes such as competition energy the environment justice and home affairs or monetary governance but also gender science culture or higher education have developed external dimensions This book addresses the EU's potential to become a more joined up global actor in its external engagement It uses a single and innovative analytical framework to examine three clusters of policies EU internal sectoral and cross cutting policies with long standing external engagement those which have been undergoing considerable change and originally internal policies whose external dimensions are comparatively more recent It identifies key explanatory factors for the emergence of certain forms of EU external engagement and identifies patterns of the evolving relations between EU internal and external sectoral policies As such the book examines and assesses exciting new empirical and theoretical research avenues into European integration studies and offers insights into the extent to which the EU may be considered a more joined up global actor developing sectoral diplomacies This text will be of key interest to scholars and students as well as practitioners in the fields of European Union politics European Union foreign policy European Politics diplomacy studies and more broadly law and international relations
