The European Community Progress Or Decline:

Understanding Attitudes to the European Community Miles Hewstone, 2011-04-14 This 1986 study presents an insightful perspective on public attitudes towards the European Community It contains a review of the findings from public opinion surveys of the time on this issue but goes beyond straightforward description to provide a real understanding of European attitudes A variety of social psychological theories are used to test a model of the structure underlying Community attitudes The original data reported in the present study parallel the findings from much larger representative and long term surveys of public opinion Thus Miles Hewstone is able to derive from his research a wide ranging analysis of cross national differences in attitudinal support the Community's impact on its citizens and the likely trends in attitude and voting behaviour At a time when the entry of Spain and Portugal had further expanded the Community's membership such issues were particularly timely and this clear and penetrating study especially welcome

Decision-making in the European Community Emil Joseph Kirchner, 1992 In this first major assessment of EC decision making at the highest levels for ten years Emil Kirchner examines the Council Presidency's role in European integration The author demonstrates how the EC Council Presidency plays a crucial role in the integration process enhanced by the Single European Act and the two Intergovernmental Conferences on EMU and Political Union He evaluates the balance and distribution of power between national and Community actors and asks whether the Council Presidency is primarily an instrument to maintain national control of EC decision making rather than a device for promoting integration He sheds light on the negotiations which led to the SEA and the two Intergovernmental Conferences and argues for a new interpretation of the relationship between the EC and its constituent states EC decision making is not characterised by a transfer of powers from the national to the EC level but by a sharing of competences between national and Community institutions and a pooling of sovereignties among member governments that is analogous to co operative federalism Decision making in the European Community will be vital reading for political scientists and students interested in the EC and for all those seeking to understand European integration potentially the 1990s most important political development
