The Experts Speak The Definitive Compendium Of Authoritative Misinformatio:

The Experts Speak Christopher Cerf, Victor S. Navasky, 1984 Includes index *The Experts Speak* Cerf, Christopher Cerf, 1990-09-01 Confronting the Experts Brian Martin, 1996-04-04 Confronting the Experts brings together six personal case histories of challenges to establishment experts The authors tell why they questioned conventional wisdom what methods they used how they dealt with the experts response and what lessons they learned Because the book shows how powerful groups can get their way by gaining the support of intellectual authorities and also how these authorities can be challenged it provides insights into the issues of power dissent and social change Included are Sharon Beder s research on sewage and how it helped to undermine the credibility of the Sydney Water Board Mark Diesendorf s scientific and social critique of fluoridation Edward Herman s exposition of the flaws in the establishment perspective on terrorism Harold Hillman s questioning of the validity of standard methods used in biology such as subcellular fractionation and electron microscopy Michael Mallory and Gordon Moran s challenge to the orthodox interpretation of a famous painting in Siena Italy and Dhirendra Sharma s confrontation with India s nuclear establishment Expert Political Judgment Philip E. Tetlock, 2017-08-29 Since its original publication Expert Political Judgment by New York Times bestselling author Philip Tetlock has established itself as a contemporary classic in the literature on evaluating expert opinion Tetlock first discusses arguments about whether the world is too complex for people to find the tools to understand political phenomena let alone predict the future He evaluates predictions from experts in different fields comparing them to predictions by well informed laity or those based on simple extrapolation from current trends He goes on to analyze which styles of thinking are more successful in forecasting Classifying thinking styles using Isaiah Berlin s prototypes of the fox and the hedgehog Tetlock contends that the fox the thinker who knows many little things draws from an eclectic array of traditions and is better able to improvise in response to changing events is more successful in predicting the future than the hedgehog who knows one big thing toils devotedly within one tradition and imposes formulaic solutions on ill defined problems He notes a perversely inverse relationship between the best scientific indicators of good judgement and the qualities that the media most prizes in pundits the single minded determination required to prevail in ideological combat Clearly written and impeccably researched the book fills a huge void in the literature on evaluating expert opinion It will appeal across many academic disciplines as well as to corporations seeking to develop standards for judging expert decision making Now with a new preface in which Tetlock discusses the latest research in the field the book explores what constitutes good judgment in predicting future events and looks at why experts are often wrong in their forecasts *Time in Twenty-First-Century British and American Literature* Sonia Front, 2025-06-20 This book investigates representations of time in twenty first century Anglo American literature In the digital era characterized by a new regime of time fiction offers revisions of prevalent oppressive notions of time that can serve as productive political strategies to reclaim the agency of the subject This book discusses literary texts

that craft innovative temporal structures out of sync with the new time logic suspended temporality Chapter 1 time as a conflation of phenomenological experience and cosmological laws Chapter 2 previewing the future Chapter 3 and networked memory Chapter 4 The proposed politically productive temporalities such as deep presence or resonance compatibilism contingency and the use of narrative as a chronologizing strategy ground a vision of change and suggest a way out of the crisis of time Identifying new timeframes in twenty first century fiction by an array of writers this book demonstrates that literature remains a valid medium for theorizing and representing time
