Do More Good is a self help book for people looking for ways to make their lives more meaningful by helping others. In today's world with so much that feels beyond our control and so many people in need, many of us are inspired to take action. To make change. To move the needle even if only in one small way. Yet we struggle with knowing how to do just that. How can we each do more good without wasting hours in a research rabbit hole trying to figure out where to put our time, money and energy for real impact. In Do More Good, Neil Ghosh delivers not only the answers to that question but also the inspiration and guidance to take action now. Within its pages, readers will encounter the curated wisdom of thirty leaders, celebrities and inspirational figures, each of whom has consciously bettered the world in their own way. Drawing upon his personal contacts with these luminaries, Ghosh shares their wisdom and reveals how we can make use of it in our lives. Do More Good is an inspiring reminder that in our interdependent world, everyone has the power and the responsibility to make a difference in the lives of others. It couldn't come at a more important time. President Bill Clinton. *The Necessity of Strangers* Alan Gregerman, 2013-08-22 A counterintuitive approach to fostering greater innovation, collaboration and engagement. Most of us assume our success relies on a network of friends and close contacts. But innovative thinking requires a steady stream of fresh ideas and new possibilities which strangers are more likely to introduce. Our survival instincts naturally cause us to look upon strangers with suspicion and distrust, but in *The Necessity of Strangers*, Alan Gregerman offers the provocative idea that engaging with strangers is an opportunity, not a threat, and that engaging with the right strangers is essential to unlocking our real potential. *The Necessity of Strangers* reveals how strangers challenge us to think differently about ourselves and the problems we face. Shows how strangers can help us innovate, better get the most out of each other and achieve genuine collaboration. Presents principles for developing a stranger-centric mindset to develop new markets and stronger customer relationships, leverage the full potential of partnerships and become more effective leaders. Includes practical guidance and a toolkit for being more open, creating new ideas that matter, finding the right strangers in all walks of life and tapping the real brilliance in yourself. To stay competitive, you and your business need access to more new ideas, insights and perspectives.

Dying for a Hamburger Murray Waldman, Marjorie Lamb, 2025-06-25 One in ten people older than sixty five and nearly half of those older than eighty five have Alzheimer's disease. It's widely accepted nowadays that memory loss comes with age. Alzheimer's currently robs at least 15 million people of their identity worldwide. This book makes the controversial claim that eating meat may contribute to the development of the disease. In *Dying for a Hamburger* Dr Murray Waldman and Marjorie Lamb draw upon documentary evidence, historical testimony and inspired speculation to suggest that Alzheimer's is a new disease elderly people did not experience symptoms of dementia in such alarming numbers in the past began appearing after modern meat production techniques were introduced. Has soared in nations where these techniques are used hardly exists in cultures where meat consumption is low. Has been attributed to many deaths that are actually the human equivalent of mad cow disease. They present startling evidence that Alzheimer's may be part of a family of diseases linked to malformed proteins known as prions. They hypothesize that the conditions that allow these brain disorders to be triggered are similar. They propose that mad cow is its human equivalent Creutzfeldt Jakob disease CJD other encephalitic diseases and Alzheimer's may have a common antecedent. We know that a form of CJD is transmitted to humans who eat contaminated beef. And we are becoming increasingly aware of the need to monitor the meat supply closely to avoid a repetition of the mad cow scare in Great Britain. But suppose that Alzheimer's also involves prions the evidence that points in this direction is growing. And suppose that Alzheimer's is also associated with tainted meat. This conclusion seems far fetched at first. In this compelling book the authors come to a frightening conclusion about our seemingly insatiable hunger for hamburgers. Destined to provoke heated argument this book on the prevention of Alzheimer's is definitely food for thought.
