Processing interclausal Relationships Jean Costermans,Michel Fayol,2014-03-18 During the last 10 years more and more linguistic and psycholinguistic research has been devoted to the study of discourse and written texts Much of this research deals with the markers that underline the connections and the breaks between clauses and sentences plus the use of these markers by adults and children in the production and comprehension of oral and written material In this volume major observations and theoretical views from both sides of the Atlantic are brought together to appeal to a wide range of linguists psychologists and speech therapists The volume presents contributions from researchers interested specifically in adult language and from others concerned with developmental aspects of language Some contributors deal primarily with production whereas others concentrate on comprehension Some direct their attention to oral discourse while others focus on written texts To preserve overall coherence however the contributors were given the following recommendations With regard to the level of linguistic analysis the emphasis should be on the clause level more particularly on the relationships between clauses Special emphasis should also be placed on linguistic markers e g connectives markers of segmentation punctuation An overview of a given field of research should be offered and current research should be put

into perspective For contributors in the developmental field attention should be paid to the fact that an account of the acquisition of some language functions throughout childhood should be included only if general principles of interclause relations that might be masked by the exclusive examination of adult evidence could be derived from it Conversations About Anthropology & Sociology Howard Burton, 2021-05-17 Conversations About Anthropology Sociology include the following 5 wide ranging Ideas Roadshow Conversations featuring leading experts This collection includes a detailed preface highlighting the connections between the different books Each book is broken into chapters with a detailed introduction and questions for discussion at the end of each chapter I The Science of Siren Songs Stradivari Unveiled A Conversation with master violinmaker acoustician and MacArthur Fellow Joseph Curtin This wide ranging conversation explores Curtin s long quest to characterize the sound of a Stradivari violin and the rigorous series of double blind tests he and his colleagues developed to probe whether or not professional musicians can really tell the difference between a Stradivari and a modern violin This thought provoking book also examines violin acoustics and how acoustic science can be married to the art of violin making while merging time honoured techniques with new materials and design II In the Cards A Conversation with Fred Gitelman world champion bridge player and co founder of Bridge Base Online This comprehensive conversation provides behind the scenes insights into the world of professional bridge the psychological stress of top flight competition how the human mind can compute amazing feats of memory bridge in schools coaching Bill Gates and Warren Buffett and more III Embracing the Anthropocene Managing Human Impact A Conversation with Mark Maslin Professor of Geography at University College London This in depth conversation explores Mark Maslin s research on the Anthropocene which according to his definition began when human impacts on the planet irrevocably started to change the course of the Earth s biological and geographical trajectory leading to climate change loss of biodiversity deforestation and more IV The Joy of Mathematics A Conversation with Ian Stewart Emeritus Professor of Mathematics at the University of Warwick and bestselling science and science fiction writer For Ian Stewart mathematics is far more than dreary arithmetic while mathematical thinking is one of the most important and overlooked aspects of contemporary society This conversation explores what mathematics is and why it s worth doing symmetry networks and patterns the relationship between logic and proof the role of beauty in mathematical thinking the future of mathematics linking mathematical oscillations to animal gaits how to deal with the peculiarities of the mathematical community and much more V On Atheists and Bonobos A Conversation with primatologist Frans de Waal the Charles Howard Candler Professor of Primate Behavior in the Department of Psychology at Emory University and director of the Living Links Center at the Yerkes National Primate Research Center at Emory Frans de Waal is renowned for his work on the behaviour and social intelligence of primates This thought provoking conversation examines fascinating questions such as Are we born with an innate sense of the good Do we learn from others what is wrong Does religion determine or is it a result of morality and more Howard Burton is the founder and host of all Ideas Roadshow Conversations and was the Founding
