**The Palgrave Handbook of African Political Economy** Samuel Ojo Oloruntoba,Toyin Falola,2020-06-23 This handbook constitutes a specialist single compendium that analyses African political economy in its theoretical historical and policy dimensions It emphasizes the uniqueness of African political economy within a global capitalist system that is ever changing and complex Chapters in the book discuss how domestic and international political economic forces have shaped and continue to shape development outcomes on the continent Contributors also provoke new thinking on theories and policies to better position the continent's economy to be a critical global force The uniqueness of the handbook lies in linking theory and praxis with the past future and various dimensions of the political economy of Africa

**Statistical Tragedy in Africa?** Morten Jerven,Deborah Johnston,2017-10-02 What do we know about economic development in Africa The answer is that we know much less than we would like to think This collection assesses the knowledge problem present in statistics on poverty agriculture labour education health and economic growth While diverse in origin the contributors to this book are unified in two conclusions the quality and quantity of data needs to be improved and this is a concern not just for statisticians Weaknesses in statistical methodology and practice can misinform policy makers international agencies donors the private sector and the citizens of African countries themselves This is also a problem for academics from various disciplines from history and economics to social epidemiology and education policy Not only does academic work on Africa regularly use flawed data but many problems encountered in surveys challenge common academic abstractions By exploring these flaws this book will provide a guide for scholars policy makers and all those using and commissioning surveys in Africa This book was originally published as a special issue of The Journal of Development

Studies *Economic Growth and Measurement Reconsidered in Botswana, Kenya, Tanzania, and Zambia, 1965-1995*

Morten Jerven, 2014-03-27 How do we measure African economic performance This volume studies how growth is measured in Botswana Kenya Tanzania and Zambia and challenges commonly held beliefs of African economic performance The volume offers a reconsideration of economic growth in Africa in three respects First it shows that the focus has been on average economic growth and that there has been no failure of economic growth In particular the gains made in the 1960s and 1970s have been neglected Second it emphasizes that for many countries the decline in economic growth in the 1980s was overstated as was the improvement in economic growth in the 1990s The coverage of economic activities in GDP measures is incomplete In the 1980s many economic activities were increasingly missed in the official records thus the decline in the 1980s was overestimated resulting from declining coverage and the increase in the 1990s was overestimated resulting from increasing coverage The third important reconsideration is that there is no clear association between economic growth and orthodox economic policies This is counter to the mainstream interpretation and suggests that the importance of sound economic policies has been overstated and that the importance of the external economic conditions have been understated in the prevailing explanation of African economic performance

**Africa Rising?** Ian Taylor, 2014 Africa is said to be rising turning a definitive page in its history heralding new and exciting possibilities for the continent This discourse maintains that with upsurge in economic growth comes improved governance and endogenous dynamics that the emerging economies and especially the BRICS Brazil Russia India China South Africa have been instrumental in diversifying Africa's international relations perhaps leading to a radical change in the global order favourable to the developing world But to what extent is this true and how deep and how broad has been the impact on society at large This book takes a critical look at the prevalent Africa Rising discourse and explores the nature and implications of Africa's rise and the role that the BRICS have played in it The author argues that Africa has still to undergo any structural transformation that there is strong evidence that deindustrialisation and jobless growth have accompanied the upsurge of interest in the continent and that far from making a radical turn in its developmental trajectory Africa is being pushed into the resource corner as commodity exporters to the North and now the BRICS with little scope for industrial progress or skills advancement Hope that the BRICS might offer an alternative to the extant neoliberal order are misplaced for the BRICS have a stake in maintaining the current global inequality Africa must therefore fashion its own independent path while the emerging economies will be important relying on external actors may simply reproduce anew the current state of underdevelopment Ian Taylor is Professor in International Relations and African Politics University of St Andrews Chair Professor Renmin University of China Professor Extraordinary University of Stellenbosch South Africa Honorary Professor Institute of African Studies Zhejiang Normal University China and a Visiting Scholar at Mbarara University of Science and Technology Uganda

Reconfiguration of the Global South  
Eckart Woertz, 2016-10-04 Since the 1980s there has been a steady shift from West to East in the international system

economically politically and culturally Emerging markets in Asia have moved up the value chain of industrial production processes while the share of Western industrialized countries in global gross domestic product has declined Countries such as China and India are asserting themselves in security matters and seeking new avenues for investment flows and development co operation China s expected shift from export led growth to domestic consumption might further change patterns of trade and capital flows and it is an open debate whether the growth dynamics of India might outstrip those of China While the rise of China and other Asian powers has been studied extensively much less work has been done on how Africa and Latin America position themselves in this process What will the role be of Africa and Latin America in the Asian Century and associated reconfigurations of global value chains Will these regions be able to assert themselves and find a voice of their own Will they manage to develop industries of their own and diversify trade relations Will they launch new ways of regional south south co operation What is the role of migrant communities and cultural exchange Do Western and Asian approaches to these regions differ Washington vs Beijing consensus This book brings together renowned academics from Africa Latin America Europe and the USA who bring refreshing perspectives on an under researched topic ranging from a conceptualization of the issue within new theoretical approaches to unique case studies based on field work The Routledge Handbook of African Demography Clifford O. **The Oxford Handbook of Africa and Economics** Célestin Monga, Justin Yifu Lin, 2015-07-02 For a long time economic research on Africa was not seen as a profitable venture intellectually or professionally few researchers in top ranked institutions around the world chose to become experts in the field This was understandable the reputation of Africa centered economic research was not enhanced by the well known limitations of economic data across the continent Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply

rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa s contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists
