Social Control And Multiple Discovery In Science:

Social Control and Multiple Discovery in Science Susan E. Cozzens, 1989-07-01 Recognition for accomplishment is a major institutional reward in the scientific community thus regulating disputes over credit for discovery can be viewed as an important problem in social control Cozzens examines a well known dispute one that took place with the discovery of the opiate receptor in neuropharmacological research The issues Cozzens discusses priority disputes social control and norms and morals are important throughout the sciences they are crucial factors in the lives of scientists the functioning of scientific communities and the day to day operations of scientific organizations **NIH Extramural Center Programs** Institute of Medicine, Board on Health Sciences Policy, Committee for Assessment of NIH Centers of Excellence Programs, 2004-04-21 Grants for research centers located in universities medical centers and other nonprofit research institutions account for about 9 percent of the National Institutes of Health budget Centers are popular because they can bring visibility focus and increased resources to bear on specific diseases However congressional debate in 2001 over proposed legislation directing NIH to set up centers for muscular dystrophy research highlighted several areas of uncertainty about how to decide when centers are an appropriate research mechanism in specific cases The debate also highlighted a growing trend among patient advocacy groups to regard centers as a key element of every disease research program regardless of how much is known about the disease in question the availability of experienced researchers and other factors This book examines the criteria and procedures used in deciding whether to establish new specialized research centers It discusses the future role of centers in light of the growing trend of large scale research in biomedicine and it offers recommendations for improving the classification and tracking of center programs clarifying and improving the decision process and criteria for initiating center programs resolving the occasional disagreements over the appropriateness of centers and evaluating the performance of center programs more regularly and systematically **Visions of STS** Stephen H. Cutcliffe, Carl Mitcham, 2001-02-01 Maps interconnections between science technology and society in order to understand both benefits and costs [The Historiography of Contemporary Science and Technology](#) Thomas Söderquist, 2013-01-11 More than ninety percent of all scientific history has been made during the last half century So far however only a fraction of historical scholarship has dealt with this period Merely a decade ago most scientific historians considered recent science the scientific culture created lived and remembered by contemporary scientists an area of study best left to the historical actors themselves **Women Scientists in America** Margaret W. Rossiter, 2012-04-02 This survey of female scientists in recent American history offers compelling data alongside the multiple stories of individual women Science The third volume of Margaret W. Rossiter's landmark survey of the history of American women scientists focuses on their pioneering efforts and contributions from 1972 to the present Central to this story are the struggles and successes of women scientists in the era of affirmative action Scores of previously isolated women scientists were suddenly energized to do things they had rarely if ever

done before form organizations and recruit new members start rosters and projects put out newsletters confront authorities and even fight and win lawsuits Rossiter follows the major activities of these groups in several fields from engineering to the physical biological and social sciences and their campaigns to raise consciousness see legislation enforced lobby for passage of the Equal Rights Amendment and serve as watchdogs of the media This comprehensive volume also covers the changing employment circumstances in the federal government academia industry and the nonprofit sector and discusses contemporary battles to increase the number of women members of the National Academy of Science and women presidents of scientific societies In writing this book Rossiter mined nearly one hundred previously unexamined archival collections and more than fifty oral histories With the thoroughness and resourcefulness that characterize the earlier volumes she recounts the rich history of the courageous and resolute women determined to realize their scientific ambitions The Origin of Values Michael Hechter, Lynn Nadel, Richard E. Michod, 1993-01-01 Although values play a leading role in nearly every explanatory theory in the broad realm of the social and behavioral sciences very little multidisciplinary research material on values is available Addressing this need the editors bring together distinguished social scientists psychologists and biologists who collaboratively explore fundamental questions about values What are the determinants of social values taboos and ideologies What are the determinants of individual values What is the nature of motivations and rewards Is there an evolutionary basis for the development of values *Current Catalog* National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 Science as Autobiography Thomas Soderqvist, 2008-10-01 This biography probes the unusual mind the dramatic life and the outstanding scientific work of Danish born immunologist Niels Jerne 1911 1994 Jerne s Nobel Prize winning achievements in the field of immunology place him in the pantheon of great twentieth century biomedical theorists yet his life is perhaps even more interesting than his science Science as Autobiography tells Jerne s story weaving together a narrative of his life experiences emotional life and extraordinarily creative scientific work A legendary figure who preferred an afternoon of conversation in a Paris wine bar to work in the laboratory Jerne was renowned for his unparalleled powers of concentration and analytical keenness as well as his dissonant personal life The book explores Jerne the man and scientist making the fascinating argument that his life experience and view of himself became a metaphorical resource for the construction of his theories The book also probes the moral issues that surrounded Jerne s choice to sacrifice his family in favor of scientific goals and the pursuit of excellence **OD** Nancy D. Campbell, 2020-03-03 The history of an unnatural disaster drug overdose and the emergence of naloxone as a social and technological solution For years drug overdose was unmentionable in polite society OD was understood to be something that took place in dark alleys an ugly death awaiting social deviants neither scientifically nor clinically interesting But over the last several years overdose prevention has become the unlikely object of a social movement powered by the miracle drug naloxone In OD Nancy Campbell charts the emergence of naloxone as a technological fix for overdose and describes the

remaking of overdose into an experience recognized as common predictable patterned and above all preventable Naloxone which made resuscitation rescue and reversal after an overdose possible became a tool for shifting law policy clinical medicine and science toward harm reduction Liberated from emergency room protocols and distributed in take home kits to non medical professionals it also became a tool of empowerment After recounting the prehistory of naloxone the early treatment of OD as a problem of poisoning the development of nalorphine naloxone s predecessor the idea of reanimatology Campbell describes how naloxone emerged as a tool of harm reduction She reports on naloxone use in far flung locations that include post Thatcherite Britain rural New Mexico and cities and towns in Massachusetts Drawing on interviews with approximately sixty advocates drug users former users friends families witnesses clinicians and scientists whom she calls the protagonists of her story Campbell tells a story of saving lives amid the complex difficult conditions of an unfolding unnatural disaster

Against Essentialism Stephan Fuchs, 2009-07 *Against Essentialism* presents a sociological theory of culture This interdisciplinary and foundational work deals with basic issues common to current debates in social theory including society culture meaning truth and communication Stephan Fuchs argues that many mysteries about these concepts lose their mysteriousness when dynamic variations are introduced Fuchs proposes a theory of culture and society that merges two core traditions American network theory and European Luhmannian systems theory His book distinguishes four major types of social observers encounters groups organizations and networks Society takes place in these four modes of association Each generates levels of observation linked with each other into a culture the unity of these observations *Against Essentialism* presents a groundbreaking new approach to the construction of society culture and personhood The book invites both social scientists and philosophers to see what happens when essentialism is abandoned

Reordering Life Stephen Hilgartner, 2017-05-19 How the regimes governing biological research changed during the genomics revolution focusing on the Human Genome Project The rise of genomics engendered intense struggle over the control of knowledge In *Reordering Life* Stephen Hilgartner examines the genomics revolution and develops a novel approach to studying the dynamics of change in knowledge and control Hilgartner focuses on the Human Genome Project HGP the symbolic and scientific centerpiece of the emerging field showing how problems of governance arose in concert with new knowledge and technology Using a theoretical framework that analyzes knowledge control regimes Hilgartner investigates change in how control was secured contested allocated resisted justified and reshaped as biological knowledge was transformed Beyond illuminating genomics *Reordering Life* sheds new light on broader issues about secrecy and openness in science data access and ownership and the politics of research communities Drawing on real time interviews and observations made during the HGP *Reordering Life* describes the sociotechnical challenges and contentious issues that the genomics community faced throughout the project Hilgartner analyzes how laboratories control access to data biomaterials plans preliminary results and rumors compares conflicting visions of how to impose coordinating mechanisms examines the repeated destabilization and restabilization of

the regimes governing genome databases and examines the fierce competition between the publicly funded HGP and the private company Celera Genomics The result is at once a path breaking study of a self consciously revolutionary science and a provocative analysis of how knowledge and control are reconfigured during transformative scientific change A
Companion to Early Cinema André Gaudreault, Nicolas Dulac, Santiago Hidalgo, 2012-07-17 A COMPANION TO EARLY
CINEMA This collection of essays by early cinema scholars from Europe and North America offers manifold perspectives on
early cinema fiction which perfectly reflect the state of international research Martin Loiperdinger Universitaet Trier A
fabulous selection of first rate articles Rick Altman University of Iowa One of the most challenging books in recent film
studies in it early cinema is both a historical object and a contemporary presence As in a great novel we can retrace the
adventures of the past the films styles discourses and receptions that made cinema the breakthrough reality it was in its first
decades But we can also come to appreciate how much of this reality is still present in our digital world Francesco Casetti
Yale University A Companion to Early Cinema is an authoritative reference on the field of early cinema Its 30 peer reviewed
chapters offer cutting edge research and original perspectives on the major concerns in early cinema studies and take an
ambitious look at ideas and themes that will lead discussions about early cinema into the future Including work by both
established and up and coming scholars in early cinema film theory and film history this will be the definitive volume on early

Robinson, 2001-05-17 Synaptic transmission plays a central role in the nervous system as the mechanism that allows for
chemical and electrical communication between cells and thus connects discrete elements into the functioning whole This is
a broad account of anatomical biochemical embryological medical pathological pharmacological and physiological studies on
synaptic transmission during the hundred years beginning in 1890 During this century the process of synaptic transmission
came to be recognized not only as the most fundamental neurophysiological process but also as a seat of pathological
changes and as the predominant site of action for drugs used to treat a wide range of psychiatric and neurological disorders
At the same time research from these various disciplines was transformed into a new and unifying field neuroscience The
course of these investigations reveals ingenious experiments powerful new techniques and imaginative insights The author
describes broadly who did what when where and how and in cases where it is apparent why and uses experimental results
and interpretations to display the evolutionary course to our current understanding of how nerve cells communicate the basic
principle of neural functioning The book will be of interest to basic and clinical neuroscientists pharmacologists and
physiologists to historians and philosophers of the life sciences and medicine and to their respective students *Annual*
