Social Theory and Modern Sociology Anthony Giddens, 2013-04-25 In this book Anthony Giddens addresses a range of issues concerning current developments in social theory relating them to the prospects for sociology in the closing decades of the twentieth century Composed of closely integrated papers all written over the past few years the book includes seven essays not previously published plus two have not appeared in English before In assessing the likely future evolution of sociology in particular and the social sciences in general the author both draws upon ideas established in his more abstract theoretical writings and examines critically competing traditions of thought Those looking for an accessible introduction to Giddens's writing will find in this book a set of clear expositions of his basic ideas By situating these ideas in relation to the critical assessment of the views of others however the author provides new sources of insight into the distinctiveness of his own claims

Security, Identity and Interests Bill McSweeney, 1999-11-04 Bill McSweeney

addresses the central problem of international relations security and constructs a novel framework for its analysis He argues for the unity of the interpersonal societal and international levels of human behaviour and outlines a concept of security which more adequately reflects the complexity and ambiguity of the topic This book introduces an alternative way of theorizing the international order within which the idea of security takes on a broader range of meaning inviting a more critical and interpretative approach to understanding the concept and formulating security policy The recent shift to sociology in international relations theory has not as yet realized its critical potential for the study of security Drawing on contemporary trends in social theory Dr McSweeney argues that human agency and moral choice are inherent features of the construction of the social and thus international order and hence of our conception of security and security policy

Joint Venture Agreements in the Qatari Gas Industry Talal Abdulla Al-Emadi, 2019-03-29 This book addresses a question of importance for both theory and practice Why are joint venture agreements preferred over other types of agreements such as concession agreements service contracts and production sharing agreements in the Qatari gas industry On a theoretical level the author analyses this decision making process by developing an approach that integrates a micro level analysis more specifically within international oil companies with a macro level analysis that spring from the organisational culture of the Qatari gas industry At the micro level the author proposes John Dunning's eclectic paradigm as one set of theoretical ideas to explaining one element of the decision making process leading to the preference for joint venture agreements that is that of international oil companies At the macro level the author proposes Antony Giddens structuration theory as another set of theoretical ideas to explaining another part of this decision making process that is how it is being shaped by the organisational culture of the Qatari gas industry On an empirical level the proposed book applies a combination of a micro economic approach such as Dunning's eclectic paradigm with a macro sociological approach such as Giddens structuration theory by empirical investigation Grounded on a qualitative strategy that focuses on the meaning making which brings together different perspectives of this

Creativity and Critique Glenda Ballantyne, 2007-10-30 Many commentators have noted the fertile new intellectual period Critique of Modernity opened up in the social theory of Alain Touraine but until now its innovations have not been the subject of a sustained analysis This work locates the wellsprings of Touraine's renewed interpretive power in an implicit and unfinished but unmistakable hermeneutical turn To deepen and extend his potent but only partly developed insights the second part of the book develops

his hermeneutical premises more explicitly through a dialogue with the hermeneutical philosophy of Paul Ricoeur The outcome is a critical hermeneutics of the subject which opens new possibilities for theorising human agency and social creativity and renews the project of critical theory **Communication Yearbooks Vols 6-33 Set** Various,2021-12-02 The

pursuing doctoral or masters level degrees in LIS **Realist Criminology** John Lowman, Brian MacLean, 1992-01-01 In the 1980s in Britain a new school of critical criminology arose to challenge the political and philosophical idealism that characterized its critical predecessors and to offer an alternative to the crime control policies of the New Right Arguing that by overemphasizing the crimes of the powerful much of critical criminology had virtually ignored the impact of street crime on its victims a left realism emerged to reassert the centrality of the victim in the development of a progressive criminology Critical realism recognizes the seriousness of street crime for those people victimized by it particularly women acknowledges that a consensus as to the desirability of a core group of laws does exist and advocates various kinds of criminal justice reform and crime prevention strategies In this respect there are important parallels with debates in feminism concerning the role of the state in the problem of violence against women One of the most important contributions critical realism has made to criminological research is the development of local crime surveys which attempt to measure patterns of victimization and policing and how these are perceived by the general public Such research remains largely undeveloped in North America and it is the purpose of this book to begin to take stock of these developments and examine their relevance for North America This is the first text to include a critical examination of left realism examine its relationship to feminism and comment on its relevance outside Britain
