Social Organization Of Law Introductory Readings By Sarat:

Social Organization of Law Austin Sarat, 2004 Austin Sarat's *The Social Organization of Law* Introductory Readings begins with a simple premise law seeks to work in the world to order change and give meaning to society and describes legal processes as socially organized This book connects legal studies to the study of society in two different senses First the readings highlight law's responsiveness to various dimensions of social stratification They also draw attention to the questions of when why and how legal decisions and actions respond to the social characteristics e g race class and gender of those making the decisions as well as those who are subject to them These questions inevitably raise issues of justice and fairness highlighting the moral dimensions of legal life Second Sarat treats law itself as a social organization emphasizing the complex relations between its various component parts e g judges and jurors police and prosecutors appellate courts and trial courts The book examines the traditional subject of professional legal study namely appellate court opinions and describes some of the most pressing controversies of legal interpretation while questioning how those opinions take on meaning in social life Sarat also questions whether those at the top of law's bureaucratic structure effectively control the behavior of others in the legal system's chain of command This anthology provides accessible up to date materials such as readings on terrorism and the challenges it poses to law racial profiling and gay rights juxtaposed to the classics of the field Introductions to each reading along with the notes and questions written by the author unpack the issues and engage students enabling them to link the material from one chapter to another Additional suggested readings provide stimulus for further inquiry *The Social Organization of Law* offers students a broad perspective that treats law as a set of institutions and practices combining moral argument distinctive interpretive traditions and the social organization of violence

Feminist Global Political Economies of the Everyday Juanita Elias, Adrienne Roberts, 2018-12-07. This collection interrogates the multifaceted ways in which global transformations are constituted by deeply gendered socio-economic practices at the level of the everyday. It brings feminist insights to bear on the emerging International Political Economy (IPE) debates about the everyday, showing how gender is key to understanding how political economy is enacted and performed at the local level by non-elites and via various cultural practices. Drawing on everyday IPE and a longer standing body of feminist scholarship that documents and theorizes the mutually constitutive nature of on the one hand global markets and on the other households/families, relations of social reproduction and gendered socio-economic practices, this collection charts the lived realities of people and communities across a wide range of sites and spaces of the global political economy. It considers how globalizing capitalism affects and is in turn affected by Argentine sex workers, Nepalese private security contractors, Canadian call centre workers, Southeast Asian domestic workers, workers and players in British bingo halls, working class households in the UK and much more. It demonstrates through detailed empirical research that a gender lens is crucial for understanding how and on what terms individuals and households are becoming ever more enmeshed in capitalist social relations and how they actively and creatively resist these processes. The chapters, originally published as a special issue in *Globalizations*.

Featuring new chapters, pedagogy sections on controversies in the field, and autobiographical essays by leaders in grassroots anti-violence work, the Third Edition has been designed to encourage discussion and debate to address issues of diversity and cultural contexts and to examine inequalities of race and ethnicity, social class, physical ability, sexual orientation, and geographic location.

Bingo Capitalism Kate Bedford, 2019-09-26. Casinos are often used by political economists and popular commentators to think critically about capitalism. Bingo, an equal chance numbers game played in many parts of the world, is overlooked in these conversations about gambling and political economy. *Bingo Capitalism* challenges that omission by asking what bingo in England and Wales can teach us about capitalism and the regulation of everyday gambling economies. The book draws on official records of parliamentary debate, case law, regulations, and in-depth interviews with both bingo players and workers to offer the first socio-legal account of this globally significant and immensely popular pastime. It explores the legal and political history of bingo and how gender shapes and is shaped by diverse state rules on gambling. It also sheds light on the regulation of workers, players, products, places, and technologies. In so doing, it

adds a vital new dimension to accounts of UK gambling law and regulation Through Bingo Capitalism Bedford makes a key theoretical contribution to our understanding of the relationship between gambling and political economy showing the role of the state in supporting and then eclipsing environments where gambling played a key role as mutual aid In centring the regulatory entanglement between vernacular play forms self organised membership activity and corporate leisure experiences she offers a fresh vision of gambling law from the everyday perspective of bingo *Troubling Criminology* Michael C. K. Ma, Mike Larsen, 2025-10-14 Crime doesn't happen in a vacuum but in the complex world we all live in In *Troubling Criminology* professors Michael C K Ma and Mike Larsen untangle the discipline of criminology in a series of insightful conversations Rather than presenting a fixed canon of knowledge this book encourages readers to draw on their own experiences and perspectives fostering dialogue and collaborative thinking It examines how crime justice and deviance are socially constructed shaped by historical and cultural contexts and influenced by power inequality and systemic oppression Perfect for students and educators alike this book is not just a textbook it's an invitation to join an ongoing conversation about what criminology means today to help us envision a more just future *The State Courts* Robert A. Carp, Ronald Stidham, Kenneth L.
