Social Science And Institutional Change:

Social Science and Institutional Change Robert R. Mayer, *Social Science and Institutional Change*, 1979 **A General Theory of Institutional Change** Shiping Tang, 2017-07-05 Institutional change is a central driving force behind social changes and thus a central topic in all major fields of social sciences Yet no general theory of institutional change exists Drawing from a diverse literature this book develops a general theory of institutional change based on a social evolutionary synthesis of the conflict approach and the harmony approach The book argues that because the whole process of institutional change can be understood as a process of selecting a few ideas and turning them into institutions competition of ideas and struggle for power to make rules are often at the heart of institutional change The general theory not only integrates more specific theories and insights on institutional change that have been scattered in different fields into a coherent general theory but also provides fundamental new insights and points to new directions for future research This book makes a fundamental contribution to all major fields of social sciences sociology sociological theory political sciences institutional economics and political theory It should be of general interest to scholars and students in all major fields of social science **Measuring the benefits of social science research** Smith, Vincent H., 1998-07-01 This paper addresses two questions The first is What are the benefits of social science research the second is How should they be measured The response to the first is that as with research in the physical sciences the benefits should be identified in terms of changes in economic surplus for different groups It may be useful to use a framework that considers the incidence of the effects of social science research on firms households and government agencies The response to the second question is that estimating returns to social science research using conventional econometric techniques may be particularly difficult Instead it may be necessary to resort to a case study approach but care must be taken to ensure that the cases selected for study are genuinely representative *Social Science Knowledge and Economic Development* Vernon W. Ruttan, 2003 The central premise of this book is that the demand for social science knowledge is derived from the demand for institutional change pref

Institutional Constructivism in Social Sciences and Law Dora Kostakopoulou, 2018-10-04 This book proposes a new institutional constructivist model for social scientific and legal enquiries based on the interrelations within the social and political world and the application of change in EU laws and politics Much of the research conducted in social sciences and law examines the diverse activities of individuals and collectivities and the role of institutions in the social and political world Although there exist many vantage points from which one can gain entry into understanding how agents in the world act interact shape and bear the world socio legal scientific epistemology has found monism and dualism to be convincing models This book argues that current models do not capture the complexity of our micro worlds macro worlds and meso worlds Nor can they account for the forms and patterns of socio legal change Mind time and change are brought together in an attempt to contribute to socio legal epistemology and to enhance its toolkit **Social Innovations, Institutional Change, and**

Russell,Norman K. Nicholson,2016-03-17 This title originally published in 1981 explores the difficult and at times volatile relationship between public choice and rural development in developing countries The book is organised into three major sections the first section examines important general themes the second describes how public choice and rural development intertwine in some areas of concern to aid donors and finally the third section revisits the major themes discussed in the book and offers further understanding to the critical questions and problems at hand It is a valuable resource for students interested in environmental studies and development studies The Structure of Social Science Michael H.

Lessnoff,2021-10-17 Originally published in 1974 this book provided a most useful introductory survey of all the major philosophical issues relating to the social sciences at the time While it covers a remarkable amount of ground in a short space it is never superficial for its lucid and careful analysis does full justice to the complexities and controversies of the subject Nor is it merely a survey for while putting all points of view with scrupulous fairness the author never fails to make clear his own and to support it with reasoned argument The book s basic framework is a comparison of physical and social science and in this context the author examines the problems of the mental aspect of social life general laws the individual and the social explanation and the relation of fact to value He is far from advocating as is often done the wholesale acceptance or rejection of the physical science model in the social sciences rather he carefully considers the various elements of the model in relation to the nature of social life A noteworthy feature of this book is the philosophical analysis of statistical correlations and tests of significance which bulk so large in the practice of social scientists yet are all too seldom discussed in books of this kind

Also of special interest is the penetrating and original analysis of functionalist explanation in social science. Students of the social sciences and of philosophy will find this an admirable introduction to an important aspect of their respective disciplines.

Institutions and Institutional Change in China F. Wang, 2016-01-18. Wang proposes and applies an innovative analytical framework to study the institutional continuity and changes in China. More specifically, this study examines and explains the peculiar premodernity and the profound modernization process of China. On the track of a state-led modernization, the dragon of China is found to be institutionally entering the nets of the market economy. An inquiry of China's labour allocation patterns and their changes serves as the indicator for the institutional analysis.

The Circular Economy and Institutional Change Yilmaz Kaplan, 2025-11-05. The climate crisis has emerged as a consequence of the linear economic system that developed in the aftermath of the Industrial Revolution. In recent years, global actors have recognised the need for institutional change from the linear economy to a more sustainable alternative. The circular economy. This book analyses the potential for transformative institutional change to a circular economy both in theory and in practice. At the theoretical level, the book evaluates the feasibility of transitioning from a linear economy system to a circular economy by drawing on the principles of New Institutionalism. It thoroughly examines the key parameters of institutional change, focusing on the role of actors and new ideas within the institutional change process. Building upon this theoretical framework, the book then delves into the practical implementations of key actors. It first explores the role of the state and the market as crucial institutional actors, referencing the historical debate between these two entities. Additionally, the book critically assesses the agenda-setting power of influential international organisations, specifically the United Nations and the World Trade Organization, in driving a circular institutional change. Furthermore, it analyses the circular economy policies of influential global actors such as the European Union, China, Japan, and the USA. Aligned with these analyses, the book also examines the potential of a circular institutional change to bring about a paradigm shift from the prevailing industrial and consumer-centric society to an ecologically oriented society. This book is invaluable for readers interested in the circular economy, new institutionalism, the impacts of climate change, and alternative economic policy.
