Socialist Welfare in a Market Economy Yongxin Zhou, Nelson Chow, Yeubin Xu, 2017-11-22 This title was first published in 2001 Using the city of Guangzhou as a case study this text looks at how China has adopted a market economy whilst still maintaining state owned enterprises and an all embracing social security system which protects the majority of Chinese workers This volume examines three questions can socialist social welfare co exist with the market economy can state owned enterprises survive in a market economy and has China succeeded in creating a market economy without sacrificing its socialist ideals The study demonstrates that compromises have been necessary to accomodate both socialist and market objectives continuing to support workers with social security benefits has for example made enterprises less competitive and disparities in benefits arise as workers are allowed to supplement the minimum guaranteed income through savings in individual accounts

Powell, 2012-02-02 China which is fast on its way to becoming the most powerful economic force in the world has four unique characteristics that distinguish it from other countries in Asia 1 The proportion of aging population is growing faster than that of Japan the country previously recognized as having the fastest rate and much faster than nations in western Europe 2 An early arrival of an aging population before modernization has fully taken place with social policy implications It is certain that China will face a severely aged population before it has sufficient time and resources to establish an adequate social security and service system for older people 3 There will be fluctuations in the total dependency ratio The Chinese government estimates are that the country will reach a higher dependent burden earlier in the twenty first century than was previously forecast 4 The government's fertility policy single child per family and its implementation has a strong influence on the aging process Fewer children are being born but with more elderly people a conflict arises between the objectives to limit population increase and yet maintain a balanced age structure Peng and Guo 2001 The intersection of these fourfold factors means that the increased aging population is giving rise to serious concerns among Chinese social policy makers There is a chronic lack of good resource materials that attempt to make sense of social policy in its relationship to examining the problems and possibilities of human aging grounded in an analysis of economic of social policy in China and impact on rural and urban spaces Such analysis of China will be covered by conceptual theoretical and empirical approaches The book will also discuss substantive topics of housing community care family care pensions and mental health The book brings together a truly world class array of researchers to provide discussions of critical implications of aging social policy and the economic impact in China

Social Policy and Poverty in East Asia James Midgley, Kwong Leung Tang, 2009-09-11 This book looks at the role of social policy and particularly social security in addressing the ongoing challenge of poverty in East Asia despite the region's spectacular experience of economic growth in recent decades The East Asian miracle resulted over the last four decades in a transformation of the region's traditional agrarian economies and significant increases in standards of living for many ordinary people Even though it was given little attention poverty has remained an ongoing problem The problem became particularly evident however with the Asian financial crisis of 1997 when many low income and middle class workers became unemployed As a result of this crisis the need for effective social policies and social security programs were recognized The idea that economic growth would solve the problem of poverty was increasingly challenged Even in China today where rapid growth has created new employment opportunities and the promise of prosperity for many the government has recognized that the problem of poverty cannot be addressed only through economic growth but that comprehensive social policies must be formulated and this includes the development of an effective security system

China's Changing Welfare Mix Beatriz Carrillo, Jane Duckett, 2011-06-10 This book draws attention to two neglected areas in the growing body of research on welfare in China subnational variation and the changing mix of state and non state provision The contributors to this volume demonstrate the diversity of local welfare provision that lies behind broad national policies and programmes Their focus on local diversity is particularly relevant to understanding the welfare system in China because national state programmes are so often organized by local governments in line with the specifics of their economic and social development At the same time that social and economic development is itself independently creating an array of different conditions that shape non state family business and third sector welfare roles Through chapters that draw on original research in eight provinces the book adopts a local perspective to illustrate and explain some of the transformations that are under way and discuss not only local government initiatives and programmes but also the services and support provided by families informal social networks and community or third sector organizations as well as those delivered by private businesses on a commercial for profit basis This book will be of interest to students and scholars of Chinese society social policy and Chinese studies more widely Beatriz Carrillo is Lecturer in Asian Studies at the University of Technology Sydney Australia Jane Duckett is Professor of Chinese and Comparative Politics at the University of Glasgow UK

Teets, William Hurst, 2014-10-30 Despite a centralized formal structure Chinese politics and policy making have long been marked by substantial degrees of regional and local variation and experimentation These trends have if anything intensified as China's reform matures Though often remarked upon the politics of policy formation diffusion and implementation at the subnational level have not previously been comprehensively described let alone satisfactorily explained Based on extensive fieldwork this book explores how policies diffuse across China today the mechanisms through which local governments actually arrive at specific solutions and the implications for China's political development and stability in the years ahead The chapters examine how local level institutions solve governance challenges such as rural development enterprise reform and social service provision Focusing on diverse policy areas that include land use state owned enterprise reform and house churches the contributors all address the same overarching question how do local policymakers innovate in each issue area to address a governance challenges and how if at all do these innovations diffuse into national politics As a study of local governance in China today this book will appeal to both students and scholars of Chinese politics comparative politics governance and development studies and also to policy makers interested in authoritarianism and governance

The Routledge Handbook of Chinese Citizenship Zhonghua Guo, 2021-11-29 Two assumptions prevail in the study of Chinese citizenship one holds that citizenship is unique to the Western political culture and China has historically lacked the necessary conditions for its development the other implies that China is an authoritarian regime that has always been subject to autocratic power in

which citizens and citizenship play a limited role This volume negates both assumptions On the one hand it shows that China has its own unique and rich experiences of the emergence development rights obligations acts culture education and sites of citizenship indicating the need to widen the scope of citizenship studies to include non Western societies On the other hand it aims to show that citizenship has been a core issue running through China's political development since the modern period urging scholars to bring citizenship into consideration in the study of Chinese politics This Handbook sets a new agenda for citizenship studies and Chinese politics Its clear accessible style makes it essential reading for students and scholars interested in citizenship and China studies

Social Protection as Development Policy Sarah Cook, Naila Kabeer, 2016-01-21 The Asian crisis of the late 1990s severely affected some of the most successful economies in the region placing the issue of social protection high on the regional and international agenda Subsequently growth rates revived but the fruits of growth have not been evenly distributed and inequality has risen Behind this trend lie deeply entrenched forms of poverty and social exclusion as well as new forms of vulnerability resulting from the liberalisation of markets and growing exposure to the global economy This volume deals with issues of poverty vulnerability and social exclusion in the Asian context The articles deal with different groups of vulnerable people exploring some of the characteristics of vulnerability in different contexts and reflecting on appropriate policy responses Collectively they emphasise a broad based systemic approach to the problems of vulnerability and insecurity where social protection needs to be rescued from its dominant current conceptualisation as a response to risk and crisis and instead be integrated into the mainstream of development policy This book will interest scholars of economics

politics development studies development economics sociology social policy and South Asian studies States' Gains, Labor's Losses Dorothy J. Solinger, 2018-07-05 In this explicitly comparative work Dorothy J Solinger examines the effects of global markets on the domestic politics of major states In the late 1970s leaders around the world faced a need both to continue productive investment and to cut labor costs to compete internationally in a changed world market To accommodate forces seemingly beyond their control they often opted to reduce social protections and benefits that citizens had come to expect in the process recalibrating their established political economic coalitions For countries whose governance was built on a coalition between workers and the state the political conundrum was particularly intense States Gains Labor's Losses concentrates on three countries China France and Mexico where revolution inspired political compacts between labor and the state had to be renegotiated In all three cases choices to forge a deepened dependence on international capital markets required the ruling parties to fire large numbers of workers and cut social benefits while attempting not to provoke widespread social unrest or even full scale revolt among their supporters China France and Mexico also shared strong legacies of protectionism and state intervention in the economy so the decision of each to join a supranational economic organization France and the EU China and the GATT WTO Mexico and NAFTA in the hope of alleviating crises of capital shortage involved submission to a new set of liberal economic rules that further compromised their sociopolitical compacts Examining a fundamental question about the dynamics of globalization and worker protest through an innovative comparative perspective States Gains Labor's Losses emphasizes the growing tensions and new compromises between the working class and their political leaders in the face of intense international economic pressures *Corporate Social Responsibility and the Three Sectors in Asia* Samiul Hasan, 2017-03-31 This volume investigates how much governmental control is needed to reign in corporate and business greed and to make business socially responsible in Asia It also questions whether business entities need to be reigned in by the government itself or if other social religious or economic dynamics shape business entities in Asia Moreover it looks at how the Asian third sector influences BSR CSR activities China's Child Contracts Bao-Er, 2007 **After the Postcolonial Caribbean** Brian Meeks, 2023-01-20 Examines the history and possible futures of radical politics in the postcolonial Caribbean A book of rare beauty Bill Schwarz Professor at Queen Mary University of London Across the Anglophone Caribbean the great expectations of independence were never met From Black Power and Jamaican Democratic Socialism to the Grenada Revolution the radical currents that once animated the region recede into memory More than half a century later the likelihood of radical change appears vanishingly small on the horizon But what were the twists and turns in the postcolonial journey that brought us here And is there hope yet for the Caribbean to advance towards more just democratic and empowering futures After the Postcolonial Caribbean is structured into two parts In Remembering Brian Meeks employs an autobiographical form drawing on his own memories and experiences of the radical politics and culture of the Caribbean in the decades following the end of colonialism In Imagining he takes inspiration

from the likes of Edna Manley George Lamming and Stuart Hall in reaching toward a new theoretical framework that might help forge new currents of intellectual and political resistance Meeks concludes by making the case for reestablishing optimism as a necessary cornerstone for any reemergent progressive movement
