**Building in China** Jeffrey W Cody, 2021-01-15 Building in China is about striking an architectural balance between the pull of monumental tradition and the push of technological novelty Centering on the dynamic period of post imperial and pre Communist China the book focuses on the building and city planning initiatives of Henry Murphy a little known American architect who initially ventured to China in 1914 to design a campus for the Yale in China programme but who then found himself captivated by a professional and cultural challenge that lasted two decades how to preserve China's rich architectural traditions while also designing new buildings using up to date Western technologies Murphy's buildings were compromises wine in old bottles as he once called them and the book uses those tales as lenses through which to understand not only Murphy's quest to find a middle ground for his architecture in China but also to gaze at a tumultuous society facing an uncertain future Murphy's buildings were more than vessels for either aesthetic visions or technical expertise inadvertently they became political emblems as Chinese rulers such as Chiang Kai shek and Sun Yat sen's son called on Murphy for city planning advice to complement their hopes for urban reconstruction There are few serious studies of Western architects in the twentieth century who practiced in non Western contexts and those scant studies that have been published concentrate largely on British French or Dutch examples in colonial settings Hence the book makes significant contributions to the fields of both American and Chinese architectural history

**Architecture and Nationalism in Sri Lanka** Anoma Pieris, 2013 The role of the home the domestic sphere and the intimate ethno cultural identities that are cultivated within it are critical to understanding the polemical constructions of country and city tradition and modernity and regionalism and cosmopolitanism The home is fundamental to ideas of the homeland that give nationalism its imaginative form and its political trajectory This book explores positions that are vital to ideas of national belonging through the history of colonial bourgeois self fashioning and post colonial identity construction in Sri Lanka The country remains central to related architectural discourses due to its emergence as a critical site for regional architecture post independence Suggesting patterns of indigenous accommodation and resistance that are expressed through built form the book argues that the nation grows as an extension of an indigenous private sphere ostensibly uncontaminated by colonial influences domesticating institutions and appropriating rural geographies in the pursuit of its hegemonic ideals This ambitious comprehensive wide ranging book presents an abundance of new and original material and many imaginative insights into the history of architecture and nationalism from the mid nineteenth century to the present day

**Behind the Postcolonial** Abidin Kusno, 2014-04-04 In Behind the Postcolonial Abidin Kusno shows how colonial representations have been

revived and rearticulated in postcolonial Indonesia The book shows how architecture and urban space can be seen both historically and theoretically as representations of political and cultural tendencies that characterize an emerging as well as a declining social order It addresses the complex interactions between public memories of the present and past between images of global urban cultures and the concrete historical meanings of the local It shows how one might write a political history of postcolonial architecture and urban space that recognizes the political cultures of the present without neglecting the importance of the colonial past In the process it poses serious questions for the analysis and understanding of postcolonial states

**Pluriversal sovereignty and the state** Ajay Parasram,2024-06-11 This book documents the political and cosmological processes through which the idea of total territorial rule came into being in the context of early to mid nineteenth century Ceylon Sri Lanka Analysing ideas at the core of the modern international system Pluriversal sovereignty and the state develops a decolonial theoretical framework informed by a pluriverse of multiple ontologies of sovereignty to argue that the territorial state itself is an outcome of imperial globalisation Anti colonialism up to the middle of the nineteenth century was grounded in genealogies and practices of sovereignty that developed in many localities By the second half of the century however the global state system and the states within it were forming through colonising and anti colonising vectors By focusing on the ontological conflicts that shaped the state and empire we can rethink the birth of the British Raj and locate it in Ceylon some 50 years earlier than in India In this way the book makes a theoretical contribution to postcolonial and decolonial studies in globalisation and international relations by considering the ontological significance of total territorial rule as it emerged historically in Ceylon Through emphasising one important manifestation of modernity and coloniality the territorial state the book contributes to studies in the politics of ontological pluralism in sovereignty postcolonial and decolonial international studies and globalisation through colonial encounters

Loo,2016-04-08 Kuala Lumpur the capital city of Malaysia is a former colony of the British Empire which today prides itself in being a multicultural society par excellence However the Islamisation of the urban landscape which is at the core of Malaysia s decolonisation projects has marginalised the Chinese urban spaces which were once at the heart of Kuala Lumpur Engaging with complex colonial and postcolonial aspects of the city from the British colonial era in the 1880s to the modernisation period in the 1990s this book demonstrates how Kuala Lumpur s urban landscape is overwritten by a racial agenda through the promotion of Malaysian Architecture including the world famous mega projects of the Petronas Twin Towers and the new administrative capital of Putrajaya Drawing on a wide range of Chinese community archives interviews and resources the book illustrates how Kuala Lumpur s Chinese spaces have been subjugated This includes original case studies showing how the Chinese re appropriated the Kuala Lumpur old city centre of Chinatown and Chinese cemeteries as a way of contesting state s hegemonic national identity and ideology This book is arguably the first academic book to examine the relationship of Malaysia s large Chinese minority with the politics of architecture and urbanism in Kuala Lumpur It is also one of the few academic books to situate the Chinese diaspora spaces at the centre of the construction of city and nation By including the spatial contestation of those from the margins and their resistance against the state ideology this book proposes a recuperative urban and architectural history seeking to revalidate the marginalised spaces of minority community and re script them into the narrative of the postcolonial nation state
