Sourcebook On The Greenhouse Effect:

Sourcebook on the Greenhouse Effect, 1990 **The Sourcebook for Teaching Science, Grades 6-12** Norman Herr, 2008-08-11 The Sourcebook for Teaching Science is a unique comprehensive resource designed to give middle and high school science teachers a wealth of information that will enhance any science curriculum Filled with innovative tools dynamic activities and practical lesson plans that are grounded in theory research and national standards the book offers both new and experienced science teachers powerful strategies and original ideas that will enhance the teaching of physics chemistry biology and the earth and space sciences **Nuclear Reactor Engineering** Samuel Glasstone, Alexander Sesonske, 2012-12-06 Dr Samuel Glasstone the senior author of the previous editions of this book was anxious to live until his ninetieth birthday but passed away in 1986 a few months short of this milestone I am grateful for the many years of stimulation received during our association and in preparing this edition have attempted to maintain his approach Previous editions of this book were intended to serve as a text for students and a reference for practicing engineers Emphasis was given to the broad perspective particularly for topics important to reactor design and operation with basic coverage provided in such supporting areas as neutronics thermal hydraulics and materials This the Fourth Edition was prepared with these same general objectives in mind However during the past three decades the nuclear industry and university educational programs have matured considerably presenting some challenges in meeting the objectives of this book Nuclear power reactors have become much more complex with an accompanying growth in supporting technology University programs now offer separate courses covering such basic topics as reactor physics thermal hydraulics and materials Finally the general availability of inexpensive xv xvi Preface powerful micro and minicomputers has transformed design and analysis procedures so that sophisticated methods are now commonly used instead of earlier more approximate approaches New at the Energy Library Energy Library, 1991 *Gale Environmental Sourcebook* Gale Research Inc, 1992 *Advances and Technology Development in Greenhouse Gases: Emission, Capture and Conversion* Mohammad Reza Rahimpour, Mohammad Amin Makarem, Maryam Meshksar, 2024-06-26 Approx 730 pages Introduces different sources of GHGs emission Describes different methods for controlling GHGs emission Includes geoengineering methods for decreasing GHGs emission *The Greenhouse Effect* Australia. Department of the Arts, Sport, the Environment, and Territories, Geography Teachers Association of NSW., 1993 *Acid Rain & the Environment, 1988-1991* Lesley Grayson, 1991 Includes references to the effects of acid rain on birds mammals and insects ground water and marine waters and acidification counter measures

Regional Development: Theory and Practice Baleshwar Thakur, H.S. Sharma, Suresh Misra, S. Chattopadhyay, Surendra Singh, 2017-01-01 The Five Volume Series on Regional Development Theory and Practice is a festschrift dedicated to Professor R P Misra a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India This five volume series with over one hundred research papers on different

aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking researching and writing about development in general and regional development in particular These five volumes each dealing with a specific aspect of regional development Vol 1 Concept of Regional Development Vol 2 Measuring Development Vol 3 Development Patterns and Structures Vol 4 Development Policies and Vol 5 Development Challenges Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development contemporary development in the discipline and the contrarian views expressed by various academics and policy makers Another significant aspect of these introductions is the global view and a comparative scenario of the developed developing and under developed economies of the world that the editors have kept in view in a debate seeking an universal theory of regional development Regions are specifics and often unique and regional development implies focusing on the assets of the territory its potential and constraints **The Assistant**

Assurance and Certification in Ecotourism Rosemary Black,Alice Crabtree,2007 Genuine ecotourism can have many positive impacts particularly the conservation of biodiversity and cultural heritage and the creation of economic opportunities for local communities While promoting these it aims to eliminate negative impacts such as environmental degradation cultural commoditisation and playground effects Unfortunately the concept is broadly misunderstood and its true definition is widely debated It is often used as a marketing tool with some operators taking advantage of the ecotourism label to attract

more business while behaving in environmentally irresponsible ways This book considers the important topic of quality control and accreditation in ecotourism describing the mechanisms that can be implemented to ensure quality in all aspects of the industry namely protected areas businesses products and tour guides Emerging Issues in Climate Smart Livestock Production Sukanta Mondal,Ram Lakhan Singh,2021-12-03 Emerging Issues in Climate Smart Livestock Production Biological Tools and Techniques furnishes a detailed reference on livestock sustainability and the role of biotechnology for creating more sustainable livestock production systems The book is a collection of scientific techniques including genetic engineering used to modify and improve animals fishes and microorganisms for human benefit The book is particularly attractive for scientists researchers students educators and professionals in agriculture veterinary and biotechnology science This book promotes several biotechnological approaches that can easily be evaluated in the field for quality assurance programs beneficial to producing livestock products and overall public health Biotechnology has the potential to improve the productivity of animals via increased growth carcass quality and reproduction improved nutrition and feed utilization improved food quality and safety improved animal health and welfare and reduced waste through more efficient utilization of resources Identifies and explores biotechnological approaches for sustainable livestock and fish production Focuses on strategies for enhancing livestock and fishery productivity and sustainability Presents the latest research on modern methods and technologies

Economics of International Environmental Agreements M. Özgür Kayalıca,Selim Çağatay,Hakan Mihçı,2017-02-17 International environmental agreements provide a basis for countries to address ecological problems on a global scale However countries are heterogeneous with respect to their economic structures and to the problems relating to the environment that they encounter Therefore economic externalities and global environmental conflicts are common and can cause problems in implementation and compliance with international agreements Economics of International Environmental Agreements illuminates those issues and factors that might cause some countries or firms to take different positions on common problems This book explores why international environmental agreements deal with some problems successfully but fail with others The chapters address issues that are global in nature such as transboundary pollution provision of global public goods individual preferences of inequality aversion global cooperation self enforcing international environmental agreements emission standards abatement costs environmental quota technology agreement and adoption and international institutions They examine the necessary conditions for the improved performance of international environmental agreements how cooperation among countries can be improved and the incentives that can be created for voluntary compliance with international environmental agreements This text is of great importance to academics students and policy makers who are interested in environmental economics policy and politics as well as environmental law
