Johnson,Steven E. Lindberg,2013-11-11 Over the past decade there has been considerable interest in the effects of atmospheric deposition on forest ecosystems This volume summarizes the results of the Integrated Forest Study IFS one of the most comprehensive research programs conducted It involved intensive measurements of deposition and nutrient cycling at seventeen diverse forested sites in the United States Canada and Norway The IFS is unique as an applied research project in its complete ecosystem level evaluation of nutrient budgets including significant inputs outputs and internal fluxes It is also noteworthy as a more basic investigation of ecosystem nutrient cycling because of its incorporation of state of the art methods such as quantifying dry and cloud water deposition Most significantly the IFS data was used to test several general hypotheses regarding atmospheric deposition and its effects The data sets also allow for far reaching conclusions because all sites were monitored over the same period using comparable instruments and standardized protocols **Recent Advances**

and international scales *Biogeochemistry of a Subalpine Ecosystem* Jill Baron, 2012-12-06 Rocky Mountain National Park was established in 1915 one year before the creation of the National Park Service The mandate of the National Park Service is to preserve and protect areas of exquisite beauty and cultural value for the benefit and enjoyment of future generations National parks mean many things to many people and in often stirring words a National Parks and Conservation Association report states the National Park System is a magnificent and uniquely American gift to the American people and the world In the early years of the Service park superintendents actively promoted and developed parks to accommodate visitors Then as now parks represented a democratic ideal that even the greatest treasures should be available to all Seventy five years ago however park managers saw little need for active management of natural resources unless it was to enhance visitors experience And few managers saw the need for a stable and independent research program on which to base management decisions Thus began a legacy of erratic often passive resource management based more on politics and in house studies than on validated scientific information The world is a different place than it was 75 years ago Human population growth changes in land use and ever more sophisticated technology affect the very fabric of life on Earth As local regional and global scale changes occur from human tampering with the environment the integrity of natural ecosystems is threatened worldwide *Carbon and Nitrogen Cycling in European Forest Ecosystems* Ernst-Detlef Schulze, 2013-12-01 The storage of carbon in forest ecosystems has received special attention in the Kyoto protocol of the Climate Convention which attempts to equilibrate fossil fuel emissions with biological sinks This volume quantifies carbon storage in managed forest ecosystems not only in biomass but also in all soil compartments It investigates the interaction between the carbon and nitrogen cycles by working along a north south transect through Europe which starts in northern Sweden passes through a N deposition maximum in central Europe and ends in Italy Surprisingly C storage in soils increases with N deposition in addition not young reforestations but old growth forests have the highest rate of carbon sequestration For the first time biogeochemical processes are linked to biodiversity on a large geographic scale and with special focus on soil organisms The enclosed CD ROM provides a complete database of all flux storage and species observations for modellers *Dryland Ecohydrology* Paolo D'Odorico, Amilcare Porporato, Christiane Wilkinson Runyan, 2019-10-26 By combining the analysis of biotic and abiotic components of terrestrial ecosystems this book synthesizes material on arid and semiarid landscapes which was previously scattered among various books and journal articles It focuses on water limited ecosystems which are highly sensitive to fluctuations in hydrologic conditions and in turn play an important role in affecting the regional water cycle Intended as a tool for scientists working in the area of the earth and environmental sciences this book presents the basic principles of eco hydrology as well as a broad spectrum of topics and advances in this research field Written by authors with diverse areas of expertise who work in arid areas around the world the contributions describe the various interactions between the biological and physical dynamics in dryland ecosystems ranging from basic processes in the soil vegetation climate system to landscape

scale hydrologic and geomorphic processes ecohydrologic controls on soil nutrient dynamics and multiscale analyses of disturbances and patterns *Acidic Deposition and Aquatic Ecosystems* Susan Christie, Donald F. Charles, 2013-04-17 Acidic deposition and its effect on aquatic ecosystems have become major scientific and public policy issues in the United States since the early 1970s and many diverse studies have been completed This book is the first comprehensive integrated synthesis of available information on current and potential effects of acidic precipitation on lakes and streams in geographic regions with a high number of low alkalinity surface water from the Adirondacks and the Southern Blue Ridge to the Upper Midwest to the Rocky Mountains the Sierra Nevada and the Cascades Written by leading authors the book examines the current status of water chemistry and characterizes the processes controlling water chemistry on a regional basis by using and comparing high quality data sets Methods for the assessment of long term changes in water chemistry and their effects in fish and other biota are also presented The book amply illustrates the substantial diversity among geographical regions with respect to the nature of surface waters and the complexity of their response to acidic deposition This volume will be of great interest to researchers in limnology aquatic ecology environmental chemistry hydrology and atmospheric sciences It will also serve as an important reference for environmental managers and policy makers *Annual Report ...
