South Africa From Segregation To Plural Democracy

Robert R. Redfield

South Africa From Segregation To Plural Democracy:

South Africa, from Segregation to Plural Democracy Jan Adriaan Du Plessis,1978 **South Africa** ,1978

Power-sharing in South Africa Arend Lijphart,1985 *Deliberative Democracy and the Plural Polity* Michael

Rabinder James,2004 In this pathbreaking work the author integrates questions of justice and stability through a model of deliberative democracy in the plural polity *Deliberative Democracy and the Plural Polity* provides a realistic but critical

reform agenda that can animate struggles for justice in an enormously diverse world **Soldiers Without Politics** Kenneth

W. Grundy,Kenneth William Grundy,1983-01-01 *Opposition and Democracy in South Africa* Roger Southall,2014-01-14

This collection examines the nature scope and prospects for political opposition under African National Congress political dominance *Political Opposition and Democracy in Sub-Saharan Africa* Elliott Green,Johanna Söderström,Emil

Uddhammar,2016-04-08 This book takes a closer look at the role and meaning of political opposition for the development of democracy across sub Saharan Africa Why is room for political opposition in most cases so severely limited Under what circumstances has the political opposition been able to establish itself in a legitimate role in African politics To answer these questions this edited volume focuses on the institutional settings the nature and dynamics within and between political parties and the relationship between the citizens and political parties It is found that regional devolution and federalist structures enable political opposition to organize and gain local power as a supplement to influence at the central level Generally however opposition parties are lacking in organization and institutionalization as well as in their ability to find support in civil society and promote the issues that voters find most important Overall strong executive powers unchecked by democratic institutions in combination with deferential values and fear of conflict undermine legitimate opposition activity

This book was originally published as a special issue of *Democratization* *Race and Reconciliation in South Africa* William E. Van Vugt,G. Daan Cloete,2000-01-01 In the mid 1990s the Truth and Reconciliation Commission disclosed its findings on the awful reality of the apartheid era in South Africa The Commission inspired scholars from Europe North America and South Africa to convene a group of their own to investigate in multicultural scholarly dialogue the history theology philosophy and politics of race and reconciliation in South Africa This volume is the product of that important dialogue And while the focus is the particular environment of South Africa the contributors work within a comparative perspective using examples from other nations and cultures to explore that which makes South Africa unique Ultimately the book aims to offer not only a better understanding of the depth of injustice in South Africa s past but also a deeper appreciation for the achievement of the present and the promise of the future in South Africa and in every other multiethnic region in the world

Democracy and Apartheid A. Butler,1998-09-27 South Africa s 1994 election was widely hailed around the world as miraculous In this book Anthony Butler examines South African experiences to cast doubt on this celebratory attitude to democracy Contemporary political analysis highlights the benefits that democracy can sometimes bring Butler by contrast

argues that democracy can be malign He attacks the myth that democracy ended apartheid and shows that democratic practices themselves contributed to its evils The author also explores weaknesses in political science as a discipline This book will be essential reading for specialists in South Africa and will appeal to political theorists students of comparative politics and historians Black Political Thought in the Making of South African Democracy C.R.D. Halisi, 1999 a comprehensive analytical survey of the multidimensional evolution of black political thought in South Africa s politicization process Choice Many citizens experience a sense of reluctance to share a single national identity with all of those who are defined by law to be their compatriots This problem can be explained and surmounted but it cannot be evaded by those who aspire to build a stable democracy in South Africa Richard L Sklar from the Foreword What will it mean to be a citizen in the new South Africa This penetrating study analyzes the issues of dual citizenship black consciousness populism racial proletarianization and their interaction with various political ideologies Halisi s analysis has practical implications for the development of political identity in the new South Africa A Survey of Race Relations in South Africa South African Institute of Race Relations, 1978

The Challenge of the New Industrial Relations Dispensation in South Africa B. U. Lombard, 1979 **The African Book Publishing Record**, 1979 *Capital & Labour In South Africa* D. du Toit, 2013-02-01 Published in the year 1981 Capital Labour In South Africa is a valuable contribution to the field of Social Science African Studies Center Newsletter, 1980

State Building and Democracy in Southern Africa Pierre Du Toit, 1995 What can South Africa learn from Botswana arguably Africa s most successful democracy and Zimbabwe one of South Africa s closest neighbours In this comparative study the author explores these southern African countries with the aim of highlighting those factors that appear to ensure a successful transition to democracy **State Capitalism** Lalita Som, 2022-01-12 The crises emanating from the Global Financial Crisis and the COVID 19 Pandemic have underscored the emergency role of the State and its smooth seamless reactivation for situations when private activity and markets are disrupted In many countries SOEs have been a crucial part in delivering on that effort as agents of the State While SOEs are increasingly sought to play a role during emergency situations evidence suggests that they misallocate capital and mismanage resources This is indicative of the conflicts of interests in owning and regulating enterprises as well as between the commercial and non commercial objectives of SOEs crony capitalism the private agenda of public officials internal management of SOEs the significant role played by state owned banks and financial institutions and the conflicts that arise in the State s primary role vs its ownership of enterprises The studies of eight countries from different regions undertaken for this book provide answers to these key policy questions related to state capitalism Generalizing from the results of multi country studies to arrive at universally applicable predictions prescriptions and policy recommendations is inherently difficult Individual countries are quite different in their socio economic historical political and institutional circumstances So are their experiences as the eight country studies highlight even as the book attempts to extrude from available research the principal common characteristics of and practices

followed by successful SOEs independently of country context Among other conditions the two most important conclusions that can be drawn from the country studies are that competition and regulation rather than ownership per se is key to efficiency

Hegemony, Security Infrastructures and the Politics of Crime Gideon van Riet, 2021-11-01 This book examines the politics of crime and the response to it in Potchefstroom a small settler colonial city in South Africa It draws on the city's everyday practices and experiences to offer local bottom up insights into security beyond the state The book provides a comprehensive understanding of security beyond the state and how security workers and residents experience and perceive their own security practices their daily interactions with other security providers which influences power dynamics between those who express fear through various platforms and those deemed potential criminals It aids in re conceptualising violence and security governance in South Africa with a view to analysing the processes of crime prevention and management the changing nature of public and private spaces and how these spaces interact with state and local authorities In a rigorous exploration of the ways to tackle the complex problem of crime the book critiques an overreliance on security infrastructures such as social media gated barriers neighbourhood residents associations and private security companies It also looks at how crime is treated as an individual as opposed to a societal problem The book addresses the urgent need for collaboration across these fault lines to promote a more inclusive security in a broader fragmented social and political context With a novel analytical approach based on the twin optics of infrastructure and post structural hegemony the book will be relevant to scholars and students of South African politics and critical security studies as well as international audience interested in crime and private security

Race and Ethnicity in Comparative Perspective Georgia A.

Persons, 2018-04-24 Contradictory forces are at play at the close of the twentieth century There is a growing closeness of peoples fueled by old and new technologies of modern aviation digital based communications new patterns of trade and commerce and growing affluence of significant portions of the world's population Television permits individuals around the world to learn about the cultures and lifestyles of peoples of physically distant lands These developments give real meaning to the notion of a global village Peoples of the world are growing closer in new and increasingly important ways Nonetheless there are disturbing signs of a growing awareness of ethnic differences in all parts of the world the United States included and a concomitant rise in ethnic based conflicts many of them extraordinarily violent in nature Fear resentment intolerance and mistreatment of the other abound in world news accounts Not only does this phenomenon pose an interesting juxtaposition to the concept of the emergent global village but its emergence in the post cold war era internationally and the post civil rights era in the United States raises significant and compelling questions Why are such conflicts occurring now How do analysts explain these developments The essays in Race and Ethnicity in Comparative Perspective lucidly explore some of the complexities of the persistence and re emergence of race and ethnicity as major lines of divisiveness around the world Contributors analyze manifestations of race based movements for political empowerment in Europe and Latin America

as well as racial intolerance in these same settings Attention is also given to the conceptual complexities of multidimensional and shared cultural roots of the overlapping phenomena of ethnicity nationalism identity and ideology The book greatly informs discussions of race and ethnicity in the international context and provides an interesting perspective against which to view America's changing problem of race Race and Ethnicity in Comparative Perspective is a timely thought provoking volume that will be of immense value to ethnic studies specialists African American studies scholars political scientists historians and sociologists

Racism and the Olympics Robert G. Weisbord, 2017-09-08 Sports are the opiate of the people particularly in the United States Europe and parts of South America Globally billions of fans feverishly focus on the summer and winter Olympics In theory international fraternalism is boosted by these friendly competitions but often national rivalries eclipse the theoretical amity How the Olympics have dealt with racism over the years offers a window to better understanding these dynamics Since their revival in 1896 the modern Olympics were periodically agitated by political and moral conundrums Racial tensions the topic of this volume reached their apex under the polarizing presidency of Avery Brundage Race in sports cannot be disentangled from societal problems nor can race or sports be fully understood separately Racial conflict must be contextualized Racism and the Olympics explores the racial landscape against which a number of major disputes evolved The book covers various topics and events in history that portray discrimination within Olympic games such as the Nazi games of 1936 the black American protest on the victory stand in Mexico City's Olympics as well as international political forces that removed South Africa and Rhodesia from the Olympics Robert G Weisbord considers the role of international politics and the criteria that should be used to determine nations that are selected to take part in and serve as venues for the Olympic Games
